

## Company Overview

Akerna is a regulatory compliance technology company in the cannabis industry. The cornerstones of Akerna's service offerings are MJ Platform® and Leaf Data Systems®, which are highly-versatile platforms that provide clients and government entities with a central data management system for tracking regulated cannabis products—from seed to product to shelf to customer—through the complete supply chain. Since establishment in 2010, the company has tracked more than \$18 billion in cannabis sales across 14 countries and has served clients in 29 states across the U.S. As part of its business strategy, Akerna intends to grow through targeted, strategic acquisitions that are complementary to its current business and organically by accelerating its product development efforts. Akerna is based in Denver.
