

Birchtech to Collaborate with National Engineering Firm, Civil & Environmental Consultants, Inc. (CEC) for Utility Water Testing

Birchtech Analytical Design Center Expected to Perform Rapid Small-Scale Column Testing (RSSCT) for CEC's Nationwide Water Utility Customers, Offering a Meaningful Business Development Pathway

CORSICANA, Texas, Nov. 03, 2025 (GLOBE NEWSWIRE) -- Birchtech Corp. (TSX: BCHT) (OTCQB: BCHT) ("Birchtech" or the "Company"), a leader in specialty activated carbon technologies for sustainable air and water treatment, today announced it has signed a letter of intent to collaborate with Civil & Environmental Consultants, Inc. (CEC), a national engineering and environmental consulting firm, to provide Rapid Small-Scale Column Testing (RSSCT) for CEC water utility customers at its 34 offices nationwide.

Per the terms of the proposed arrangement, Birchtech is expected to provide RSSCTs for the national engineering firm's water utility customers at Birchtech's Analytical Design Center in Grand Forks, ND. This advanced facility is equipped to provide utilities and industries with comprehensive testing, analysis, and expert guidance to tackle complex water treatment challenges – all at a speed and cost unrivaled by the several competing RSSCT labs in the United States. RSSCT is a specialized testing methodology that simulates full-scale filter bed conditions in a fraction of the time enabling utilities to make confident decisions on granular activated carbon performance and optimize compliance strategies quickly and effectively.

Richard MacPherson, Birchtech CEO, commented: "This collaboration leverages complementary water treatment competencies between Birchtech and CEC, further strengthened due to the depth of our industry relationships, as well as our highly cost-effective and accurate analysis capabilities.

"This collaboration is also a critical step for our "Clean Water" business, providing a specialized test to CEC's water utility customers, both large and small. We currently have numerous potential water treatment solutions projects with utilities in our pipeline and many of these utilities currently work with CEC. I look forward to continued expansion of our water treatment technologies across this industry in the months ahead as we strive to generate sustainable, long-term value for my fellow shareholders."

About CEC, Inc.

Civil & Environmental Consultants, Inc. (CEC) provides comprehensive market-oriented consulting services that advance the strategic business objectives of its clients, with more than 1,600 team members and 34 offices nationwide. Headquartered in Pittsburgh,

Pennsylvania, CEC is consistently ranked on Engineering News-Record's annual lists of the Top Design Firms and Top Environmental Firms in the nation. CEC is recognized for its innovative design solutions and integrated expertise in air quality, civil engineering, cultural resources, ecological sciences, environmental engineering and sciences, manufacturing infrastructure services, planning, survey, transportation engineering, waste management, and water resources.
