Edison Nation Inc. Launches its "911 Help Now Pendant" in Partnership with Stealth Technologies Inc.

PHILLIPSBURG, NJ / ACCESSWIRE / March 12, 2019 Edison Nation Inc (NASDAQ: EDNT), a full-service product development company, has launched its "911 Help Now" Pendant in conjunction with a sales and marketing partnership with Stealth Technologies Inc., a sales and marketing company in the personal safety, health and technology markets.

The "911 Help Now" Pendant is a unique, wearable communicator that lets you speak to a 911 emergency responder with a single touch. Providing peace of mind for users and their loved ones who either live alone, or travel, hike and shop by themselves. The credit card-sized pendant provides an instant link should you need emergency assistance, regardless of their service provider or if cellular service exists in the users location. Unlike medical alert systems that rely on a call center middleman, with a push of a button this pendant's speakerphone contacts the nearest 911 operator via the cellular network to summon help quickly. with the "911 Help Now: Pendant requires no long-term contract, monthly service fees, or expensive batteries to replace, making it the most cost-effective solution for an independent, active lifestyle.

Edison Nation has secured Audio America, a leading distributor of consumer electronics, as its first significant customer for this product line and has current purchase orders in excess of \$800,000.

"Our new sales and marketing partnership with Stealth Technologies Inc has allowed us to introduce the '911 Help Now' Pendant, which will be the first of several new items that will be rolled out by our combined teams," said CEO Chris Ferguson, CEO of Edison Nation. "Stealth Technologies has a deep expertise in direct response and live shopping, and we look forward to the long-term growth potential of this partnership."

"We are happy to announce our partnership with Edison Nation and look forward to leveraging our direct response distribution avenues with their unique and innovative products," said Brian McFadden, CEO of Stealth Technologies.
