CV Sciences, Inc. Introduces Purified Liquids™ - Premium Hemp-Derived Cannabidiol (CBD) Vape E-Liquids

Offering Unmatched Quality and Potency, Raising the Caliber of CBD Vape Blends

LAS VEGAS, NV -- (Marketwired) -- 08/05/16 -- CV Sciences, Inc. (OTCBB: CVSI), is pleased to announce the latest addition to its consumer products division, [Purified Liquids™](#), which offers the highest quality, premium CBD vape e-liquids available on the market today. The launch of this brand targets the booming vape industry, which is expected to reach US\$32.11 billion worldwide by 2021, according to [Research and Markets Assessment of the World Vape Market](#).

"Over the last 2 years, we observed the vape industry blossom into the powerhouse that it is today," stated Michael J. Mona, III, co-founder and chief operating officer at CV Sciences. "As the leader in hemp-derived CBD oil, our unwavering commitment to excellence resulted in over a year of research and development by our in-house laboratory team. In the end, we created a product line of consistently pure, safe, and solvent-free CBD vape e-liquids of which we are very proud."

Made from 99.9% CBD from hemp-derived crystals and containing 0% THC, each Purified Liquids™ product provides at least 360mg of hemp-derived CBD per 30mL bottle, offering 12mg of CBD per mL.

Purified Liquids™ is proud to introduce the first two delicious [CBD vape flavors](#):

- Inertia: Guava Honeydew with tangy, fruit-forward, and tropical notes
- Isotope: Watermelon Chill with a refreshing, sweet, clean taste and hints of spearmint

The bottles containing Purified Liquids™ were specially designed to block UV light. By blocking UV light, the CBD vape liquids are protected against oxidation and separation, leaving a great tasting product every time.

Using a proprietary process in CV Sciences' state-of-the-art GMP laboratory, Purified Liquids™ solvent-free solutions are unique from other CBD vape products. CBD crystals are derived from 100% agricultural hemp as opposed to synthetic chemicals or compounds. Each product is thoroughly lab tested to ensure the absence of harmful chemicals, heavy metals, solvents, or pesticides. Third party certificates of analysis are available upon request.

Purified Liquids™ are available for sale online and for wholesale distribution.

ABOUT CV SCIENCES: [CV Sciences, Inc.](#)(OTCBB: CVSI), formerly CannaVest Corp., located in Las Vegas, Nevada, focuses on drug development activities on products containing cannabidiol (CBD) as the active pharmaceutical ingredient, and is engaged in the development, marketing and sale of end consumer products containing CBD, which is refined into its PlusCBD Oil™ and Purified Liquids™ brands.
