Safe Harbor Statement

This document includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical facts, included in this document that address activities, events, plans, expectations, objectives or developments that VAALCO expects, believes or anticipates will or may occur in the future are forward-looking statements. These statements may include the amounts due in connection with the Company's withdrawal from Angola, expected sources of future capital funding and future liquidity, future operating losses, future changes in oil and natural gas prices, future strategic alternatives, capital expenditures, future drilling plans, prospect evaluations, negotiations with governments and third parties including with the government of Gabon in connection with a revised production sharing contract, expectations regarding processing facilities, reserve growth, and other issues related to our exit from Angola. These statements are based on assumptions made by VAALCO based on its experience and perception of historical trends, current conditions, expected future developments and other factors it believes are appropriate in the circumstances. Such statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond VAALCO's control. These risks include, but are not limited to, oil and gas price volatility, inflation, general economic conditions, the Company's success in discovering, developing and producing reserves, decisions by our current lender or future lenders, the risks associated with our ability to continue as a going concern, the risk that our negotiations with the governments of Gabon and Republic of Angola will be unsuccessful, lack of availability of goods, services and capital, environmental risks, drilling risks, foreign regulatory and operational risks, and regulatory changes. These and other risks are further described in VAALCO's annual report on Form 10-K for the year ended December 31, 2016, quarterly report on Form 10-Q for March 31, 2017, and other reports filed with the SEC which can be reviewed at <http://www.sec.gov>, or which can be received by contacting VAALCO at 9800 Richmond Avenue, Suite 700, Houston, Texas 77042, (713) 623-0801. Investors are cautioned that forward-looking statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements. VAALCO disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

The SEC generally permits oil and natural gas companies, in filings made with the SEC, to disclose proved reserves, which are reserve estimates that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. In this press release and the conference call, the Company may use the terms "resource potential" and "oil in place", which the SEC guidelines restrict from being included in filings with the SEC without strict compliance with SEC definitions. These terms refer to the Company's internal estimates of unbooked hydrocarbon quantities that may be potentially added to proved reserves. Unbooked resource potential and oil in place do not constitute reserves within the meaning of the Society of Petroleum Engineer's Petroleum Resource Management System or SEC rules and do not include any proved reserves. Actual quantities of reserves that may be ultimately recovered from the Company's interests may differ substantially from those presented herein. Factors affecting ultimate recovery include the scope of the Company's ongoing drilling program, which will be directly affected by the availability of capital, decreases in oil and natural gas prices, drilling and production costs, availability of drilling services and equipment, drilling results, lease expirations, transportation constraints, processing costs, regulatory approvals, negative revisions to reserve estimates and other factors as well as actual drilling results, including geological and mechanical factors affecting recovery rates. Estimates of unproved reserves may change significantly as development of the Company's assets provides additional data. In addition, our production forecasts and expectations for future periods are dependent upon many assumptions, including estimates of production decline rates from existing wells and the undertaking and outcome of future drilling activity, which may be affected by significant commodity price declines or drilling cost increases.

We are committed to driving stockholder value by:

- Operating in a safe and environmentally responsible manner
- Increasing operational efficiencies and minimizing costs
- Leveraging our existing infrastructure, technical expertise, and experience as a West Africa operator overseeing production facilities and major projects
- Pursuing development wells and workovers in the Etame Marin Block
- Acquiring discovered, underdeveloped and low-risk resources in West Africa
- Evaluating value accretive merger and acquisition opportunities
- Enhancing margins and adding value

Execution of Our Strategy Will Provide Attractive Upside Optionality

Financial Performance and Position

- Maximizing cash by optimizing production and reducing costs
- Straightforward capital structure with minimal debt burden
- Public company with ability to access multiple sources of capital
- Fully weighted to oil (100%)
- Increase in Brent quickly adds cash to the balance sheet
- Put contract volumes for 2017 cover ~60% of projected production net of taxes at an average floor price of ~\$49.63
- Put contracts limit price downside risk and protect cash flow, but allow full upside realization with price increases

First Quarter 2017 (\$'s in millions)	
Cash and cash equivalents	\$ 24
Debt ⁽¹⁾	\$ 15
Financial performance – continuing operations	
Revenues	\$ 21
Production & G&A expenses	(11)
Exploration, DD&A, other operating expense	(2)
Operating income	8
Other expense and income tax	(4)
Income (loss) from continuing operations	4
Adjusted EBITDAX ⁽²⁾	\$ 10
Basic shares outstanding <i>(in millions)</i>	59
Earnings (Loss) per share from continuing operations	\$0.07

Goals: Maximize Margins, Minimize Risk, Manage Liquidity and Preserve Cash

(1) As of 3/31/2017, net of deferred financing costs
(2) Adjusted EBITDAX is a supplemental non-GAAP financial measure used by VAALCO's management and by external users of the Company's financial statements, reconciliation in Q1 2017 earning release

Successful Production Optimization

Q3 & Q4 2016 Negatively Impacted by ESP failures

Workovers Restored Production Entering 2017, Continue to Optimize Production

(1) Impacted by field wide six day turnaround
(2) Impacted by ESP failures on 2 Avouma wells

Net Production Expense Reductions

Q3 & Q4 2016 Cost per BOE Higher Due to Production Decreases from ESP failures
2017 Production Expense 11% Higher on Absolute Basis Due to 2016 Etame Acquisition from Sojitz

Maximizing Margins Through Ongoing Cost Containment Efforts

(1) Q1 2015 excludes non-cash, expensed costs for design work on CSP

(2) Q4 2015 excludes workovers and non-cash charge for suspension of CSP

(3) Q1,Q2, Q3, Q4 2016 and Q1 2017 excludes workovers

(4) Q3 & Q4 2016 impacted by lower projected sales due to ESP failures

(5) Q4 2016 Excludes non-recurring regulatory cost in Gabon

(6) Q2 2017E midpoint of guidance range

Projected Cash Margin Analysis

2017 Operational Margin Per Barrel⁽¹⁾

2017 Free Cash Flow Per Barrel⁽¹⁾

Each \$5/barrel improvement in oil price increases annualized cash flow by ~\$6MM
Free cash flow excludes 2017 principal payments of \$10.0mm⁽³⁾ and workovers

Operational Breakeven: ~\$27/BBL⁽⁵⁾

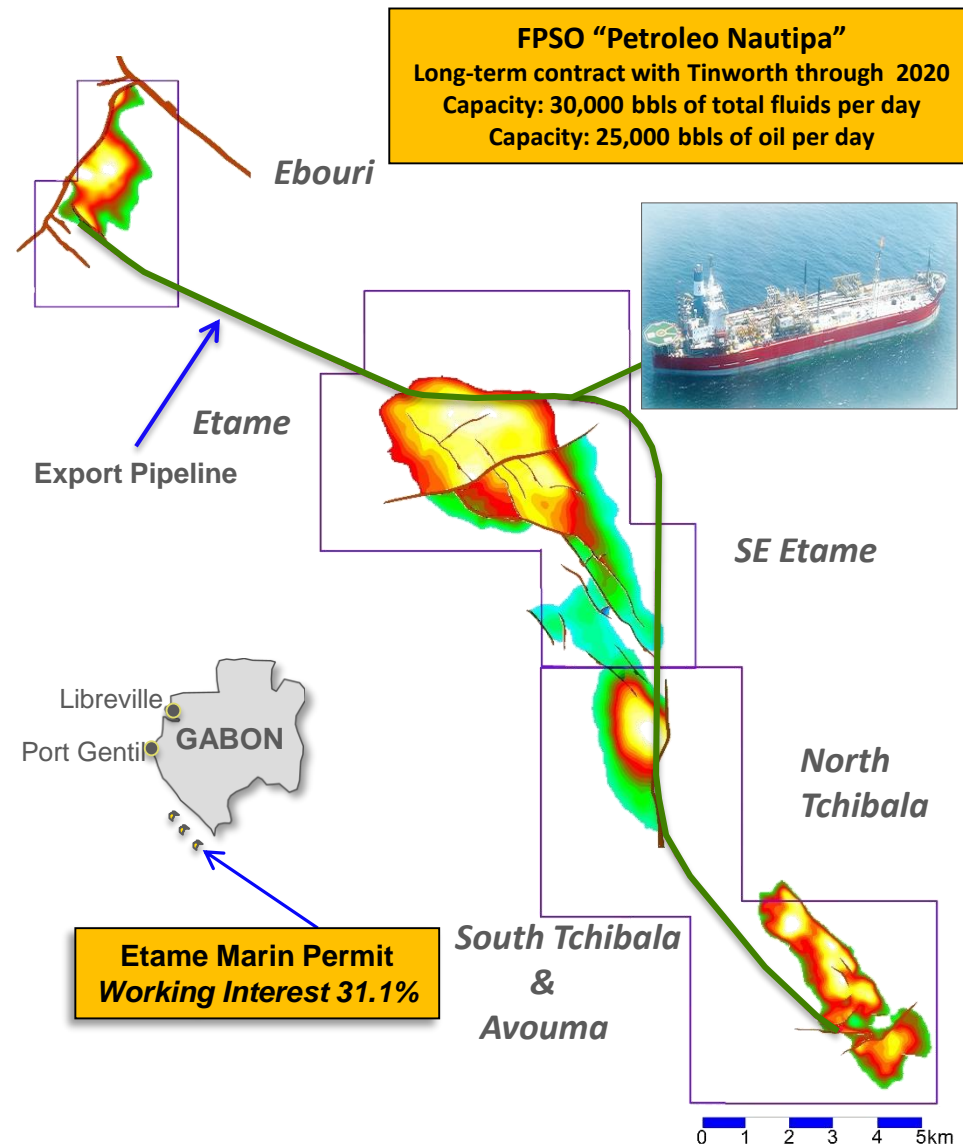

Free Cash Flow: ~\$39/BBL⁽⁵⁾

1) Excludes discontinued operations and workovers
2) Mid point of 2017 guidance range
3) Forecasted principal payments for 2017

4) Forecasted 2017 Capex & ARO payment
5) At \$40 realized oil price

Offshore Gabon – Etame Marin Permit

- Operator with a 31.1% net W.I.
Partners: Sinopec (Addax), Sasol, PetroEnergy and Tullow
- Currently 9 producing wells
- Q1 2017 production averaged ~17,100 gross (4,622 net) BOPD
- 4.0 MMBO of net 2P reserves at year-end 2016
- Infrastructure in place to develop over 65 MMBO of gross unrisked recoverable contingent resources

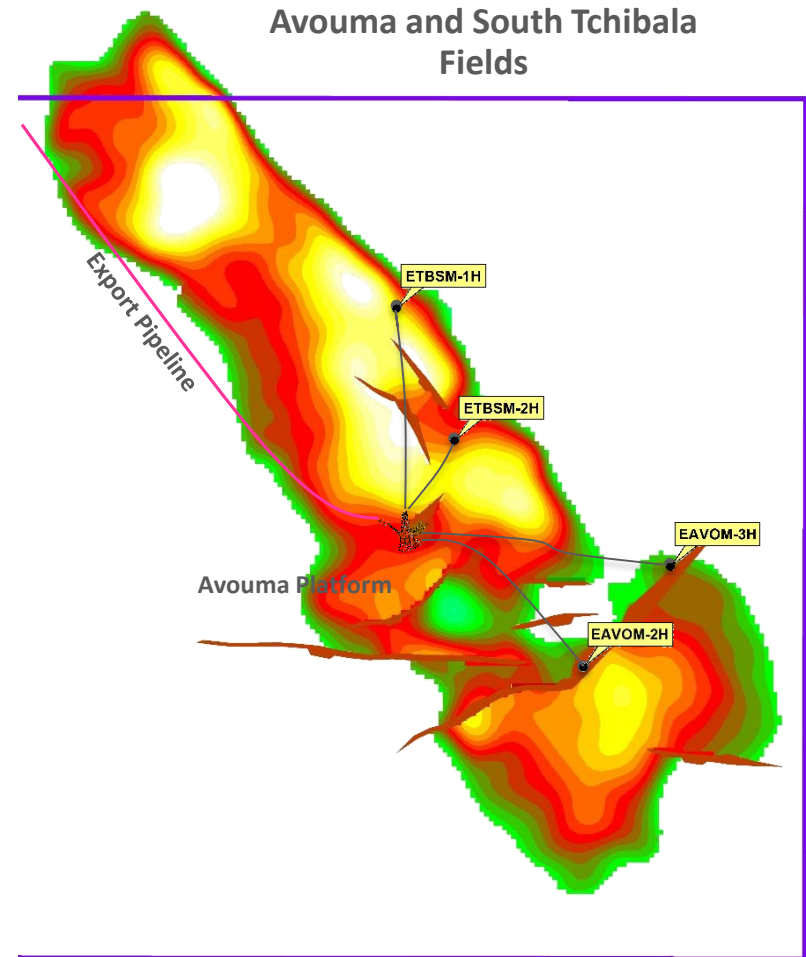

Cost Reduction Through Innovation

Two Well Workover Program on Avouma Platform to Replace ESPs

- South Tchibala 2-H workover successful
 - Restored 1,600 BOPD gross (430 BOPD net)
- Avouma 2-H workover successful
 - Restored ~2,700 BOPD gross (730 BOPD net)

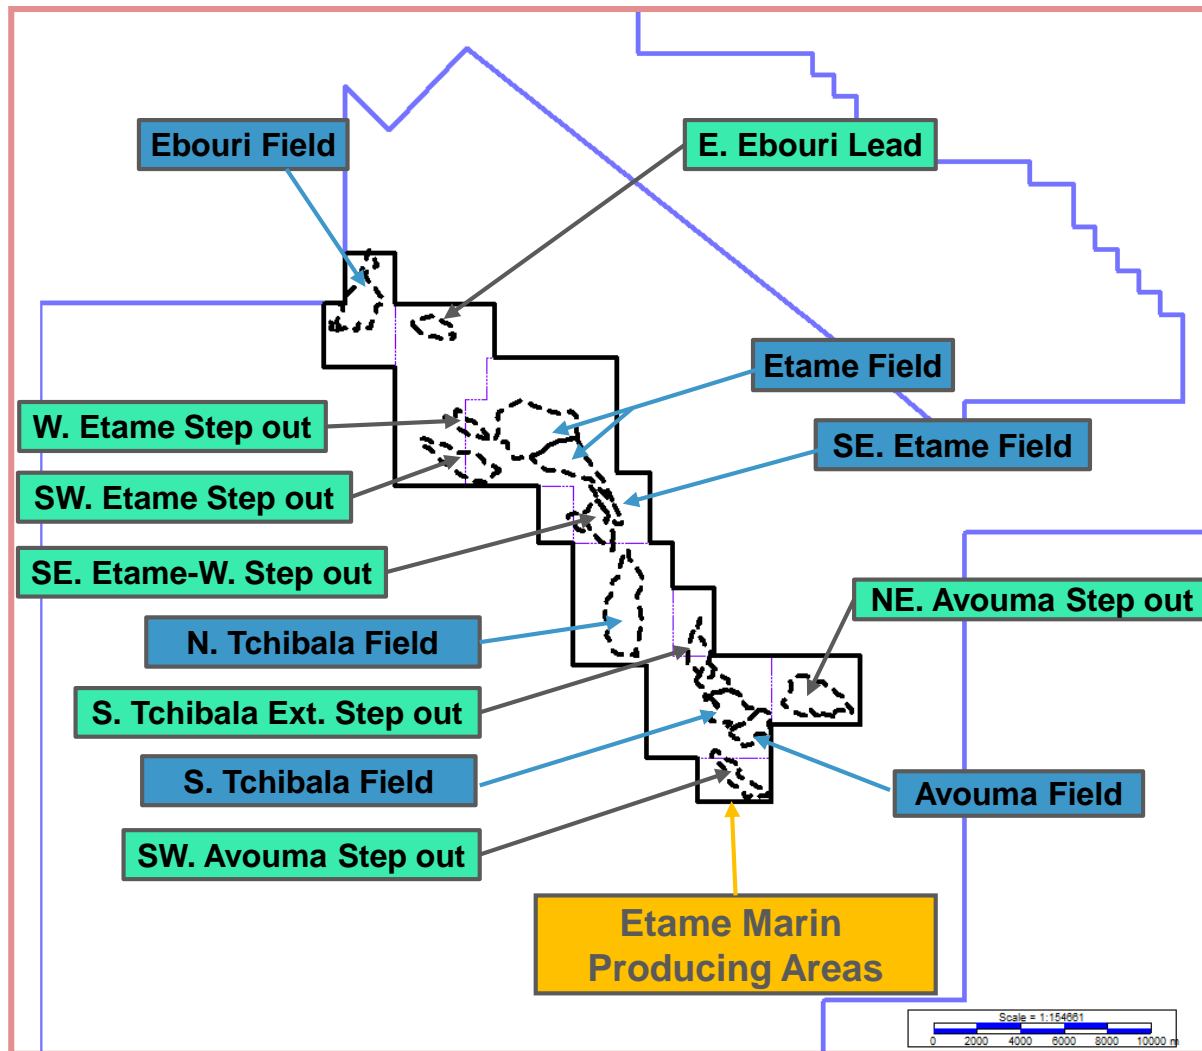

Utilized hydraulic workover unit to replace ESP systems quickly and efficiently

- Up to 50% more cost effective than using a standard drilling rig
- Improved availability and faster deployment for workover projects, minimizing downtime
- Enhances economic life of field for reserve reporting due to lower costs

Q4 2016 Workover Program Restored over 1,000 BOPD Net Production

Etame Opportunities for Future Growth

Infrastructure in place to develop opportunities

Near-Term Potential:

- Offset successful wells from the 2014/2015 development campaign

Long-Term Potential:

Etame Platform:

- Three Gamba and six Dentale infills (29 MMBBLS)

SEENT Platform:

- Four Gamba, four Dentale infills (25 MMBBLS)

Avouma Platform:

- Two Gamba and two Dentale infill (12 MMBBLS)

Over 65 MMBO of Gross Unrisked Recoverable Contingent Resources

Looking to the Future

Significant Development Opportunities at Etame

- Development opportunities identified that would extend the economic life
- Over 65 MMBO of gross unrisked recoverable contingent resources
- Operating infrastructure in place to support development

Etame License Extension

- Current license terminates in 2021
- Need license extension to enhance economics of new development wells

Angola Exit

- Relinquishing exploration license in Angola to focus on development in Gabon
- VAALCO believes that the accrued \$15 million liability will be substantially less
- Resolution would strengthen the balance sheet and improve access to capital

Growth

- Leverage existing infrastructure, technical expertise and experience in international offshore, major projects and production operations
- Seeking attractively valued new development opportunities in West Africa
- Evaluating value accretive merger and acquisition opportunities

Each Opportunity, When Realized, Should Add Significant Value
