

ContraFect

COMPANY OVERVIEW

ContraFect is a clinical stage biotechnology company focused on discovering and developing therapeutic proteins and antibodies for life-threatening, drug-resistant infectious diseases, particularly those treated in hospital settings. An estimated 700,000 deaths worldwide each year are attributed to antimicrobial-resistant infections. Our lysin and monoclonal antibody platforms target conserved regions of bacteria or viruses (regions that are not prone to mutation). ContraFect's initial product candidates include new agents to treat antibiotic-resistant infections such as MRSA (methicillin resistant *Staph aureus*) and influenza.
