'Multiply Your Innovations' at Intel Developer Forum

Press/Analyst Pre-Registration Opens July 20

Intel Corporation:

WHEN: Sept. 18-20, 2007

WHERE: Moscone Center West, San Francisco

WHAT: Spanning the worlds of mobility, digital home, digital enterprise and technology and research, IDF will focus on Intel Corporation's directions for the next year and beyond.

Vision: IDF brings together top Intel technical experts, Intel Fellows, industry thought leaders and leading technology companies. A strong slate of Intel keynotes is one source for insights and inspiration. Keynoters are:

Day 1 -- Paul Otellini, Intel president and CEO; and Pat Gelsinger, Intel senior vice president and general manager, Digital Enterprise Group.

Day 2 -- David Perlmutter, Intel senior vice president and general manager, Mobility Group; and Anand Chandrasekher, Intel senior vice president and general manager, Ultra Mobility Group.

Day 3 -- Renee James, Intel vice president and general manager, Software and Solutions Group; and Justin Rattner, Intel chief technology officer and senior Fellow.

-- In a rare public appearance, Intel co-founder and technology industry luminary Gordon Moore has been added to the Day 1 speaker line-up. Moore and Dr. Moira Gunn of NPR's "Tech Nation" will have a candid conversation on the tremendous advancements the entire computer industry has made over the decades.

Exhibition: More than 170 leading companies from around the world will have hands-on demonstrations of their newest innovations and future technologies at the IDF Technology Showcase.

Networking: IDF offers valuable opportunities to speak one-to-one with Intel managers and engineers whose work will impact future technology directions. In

addition to two networking breakfasts and lunches, Chalk Talks will be an opportunity to have technical questions answered by Intel Fellows and Intel technical experts in a classroom setting.

Training: Technology tracks and technical sessions on such relevant themes as "High Performance Computing Technologies and Innovations," "Enabling Longer Battery Life for Mobility," "Intel(R) Processor Technology: Driving the Future of Computing," "Intel(R) Server Platform Technologies and Innovations," "Intel(R) vPro(TM) Processor Technology and Intel(R) Centrino(R) Pro Processor Technology," "Mobile Internet Devices on Low Power Intel(R) Architecture," "Next-Generation Wireless Solutions" and "Tera-Scale Computing Research: The Future of Multi-Core," "Desktop Platform Trends" and "Mobile Platform Technologies and Trends."

WHO ATTENDS: IDF is a must-attend event that allows you to network with potential partners, clients and suppliers:
-- Systems developers, engineers, implementers and architects
-- Communications developers, engineers, implementers and architects
-- Technical or business strategists and managers
-- Press and analysts who must stay current with industry news and trends

THEME: "Multiply Your Innovations"

SPONSORS: Gold: Cisco, Ericsson, IBM, Microsoft, Rambus, Samsung, Sun Microsystems and Supermicro; Silver: Hynix Semiconductor, Micron, Qimonda, Certified Wireless USB Community and VMware.
