Hewlett Packard Enterprise and Intel Collaborate to Deliver Proven, Open Solutions for the Internet of Things

PALO ALTO, Calif., November 12, 2015 - Hewlett Packard Enterprise (HPE) today announced an alliance with Intel Corporation to deliver open standards based Internet of Things (IoT) solutions that will enable organizations to quickly gain insights and create value from the growing amount of data collected from devices and sensors. The two companies will also establish three global IoT solutions labs to help customers accelerate their deployment of IoT applications. View [HPE press release](#).
