Media Alert: Intel Details Latest Innovations for the Data-Centric Era

SANTA CLARA, Calif.--(BUSINESS WIRE)-- On April 2, 2019, Intel will deliver an update on the company's broader transition to move, store and process the world's data within data centers, 5G networks and intelligent edge applications. Intel customers and partners will show how Intel's solutions and services are helping harness the value of data for their organizations.

Navin Shenoy, executive vice president and general manager of Intel's data center group, and Lisa Spelman, vice president and general manager of Intel® Xeon® products, will share the latest platform innovations across Intel's data-centric businesses related to breakthroughs in processing, memory and storage, and connectivity technologies, in addition to advancements in high-growth areas, such as artificial intelligence and cloud-ready networks.

What: Intel Details Latest Innovations for the Data-Centric Era

Where: San Francisco, Calif.

When: 9:30 a.m. PDT, April 2, 2019

RSVP: To request to attend in-person, email:
cloud@axicom.com
