THE INDUSTRY'S FASTEST EV CHARGING STATION NOW OFFERED TO FOUR SEASONS HOTEL MIAMI'S GUESTS

Miami, FL, May 21, 2019 (GLOBE NEWSWIRE) -- Blink Charging, and SP Plus, parking management services, are excited to announce that they have installed the fastest Level 2 electric vehicle (EV) charging stations available for guests of Four Seasons Hotel Miami located in Brickell. The coordination with the three companies further reinforces Four Seasons' commitment to sustainability and the increased driver demand for EV charging in urban areas. This installation replaces old EV charging equipment, now offering the most advanced, fastest EV charging stations.

Replacing the old Chargepoint equipment with the industry's fastest Level 2, 80-Amp Blink IQ200 equipment is the first step in providing additional EV amenities at the property. In the coming weeks, SP Plus will also increase the number of charging stations in the parking structure. The charging station is capable of charging any battery electric or plug-in hybrid vehicle and works on the Blink Network offering EV drivers easy access to charging as well as discounted rates when they sign up for a free blink membership.

The growing number of EV charging stations found at Four Seasons properties further highlights the company's commitment to sustainability and is just one of the many ways the luxury hotelier encourages employees and guests in the common goal of preserving and protecting the planet.

To utilize these fast-charging stations, an EV can ask the valet attendant to charge their EV while they stay, dine, or attend meetings at the property. For more information, please contact SP Plus at the Four Seasons or Blink Charging.
