

**GRAHAM CORPORATION**  
**ENTERPRISE ENVIRONMENTAL POLICY**

**ADOPTED: May 30, 2023**

Graham Corporation believes that a focus on environmental stewardship is fundamental and integral to the work we do every day to serve our customers, create value for our stockholders, and benefit our global community. As climate change concerns become more prevalent, we recognize the need to comply with increased regulations and stricter environmental standards.

Graham Corporation is focused on the following:

- fully complying with applicable environmental laws, rules and regulations;
- incorporating environmental considerations into business and operational planning and decision making;
- committing to being a good neighbor in the communities where we operate;
- reducing energy use and greenhouse gas emissions through improved energy and water management, material conservation, and increased renewable energy use;
- reducing our carbon footprint and safeguarding related natural resources through reduction in energy consumption and water use in operations;
- improving efficiencies in various areas, including energy and hazardous waste management, as well as fuel economy and emissions; and
- assisting with efforts to minimize the sources of pollution in our communities.

We believe that our focus on environmental sustainability, with the objective of reducing costs and improving sustainability of our operations, will provide us with a strategic benefit. We will continue to engage with suppliers throughout our global value chain to manage these impacts in order to conserve resources, reduce costs, and promote ethical practices.
