The determination of the tax attributes of the Company's distributions is made annually as of the end of the Company's fiscal year based upon its taxable income for the full year and distributions paid for the full year. Therefore, a determination made on a quarterly basis may not be representative of the actual tax attributes of its distributions for a full year. The tax attributes of its distributions for the years ended December 31, 2008 through June 30, 2019 were paid 100% from earnings and profits; however, there can be no certainty to shareholders that this determination is representative of the tax attributes of the Company's 2019 full year distributions to stockholders.
