Cellecstar Biosciences Receives Positive NASDAQ Listing Determination

MADISON, Wis., April 07, 2016 (GLOBE NEWSWIRE) -- Cellecstar Biosciences, Inc. (NASDAQ:CLRB) ("Cellecstar" or the "company"), an oncology-focused biotechnology company, announced today that on April 6, 2016, the NASDAQ Listing Qualifications Panel (the "panel") issued a determination granting the company's request for the continued listing of its common stock on the NASDAQ Capital Market ("NASDAQ").

The company's continued listing on NASDAQ is subject to, among other things, the company evidencing compliance with the minimum \$2.5 million stockholders' equity requirement by May 16, 2016. Cellecstar must also provide the panel with updated information regarding its ability to maintain compliance for a period of one year.

"We are pleased with the panel's decision to support Cellecstar's continued listing on NASDAQ," said Jim Caruso, president and CEO of Cellecstar Biosciences. "We are confident in our capability to successfully satisfy the required evidence of compliance."

The company is taking definitive steps to evidence compliance with the terms of the Panel's decision; however, there can be no assurance that it will be able to do so.

About Cellecstar Biosciences, Inc.

Cellecstar Biosciences is developing phospholipid drug conjugates (PDCs) designed to provide cancer targeted delivery of diverse oncologic payloads to a broad range of cancers and cancer stem cells. Cellecstar's PDC Delivery Platform is based on the company's proprietary phospholipid ether analogs. These novel small-molecules have demonstrated highly selective uptake and retention in a broad range of cancers. Cellecstar's PDC pipeline includes product candidates for cancer therapy and cancer diagnostic imaging. The company's lead therapeutic PDC, CLR 131, utilizes iodine-131, a cytotoxic radioisotope, as its payload. CLR 131 is currently being evaluated under an orphan drug designated Phase 1 study in patients with relapsed or refractory multiple myeloma. The company is also developing PDCs for targeted delivery of chemotherapeutics such as paclitaxel (CLR 1602-PTX), a preclinical stage product candidate, and plans to expand its PDC chemotherapeutic pipeline through both in-house and collaborative R&D efforts.
