Update -- Bristow Helicopter Accident

HOUSTON, February 28, 2024— Earlier today, Bristow Group Inc. confirmed that one of its search and rescue helicopters, registration LN-OIJ with six crew members onboard, was involved in an accident during a training exercise approximately 15 nautical miles west of Bergen, Norway.

It is with deep sadness that we can report one fatality has been confirmed. The other five crew members have varying levels of injuries. Our thoughts are with all those affected during this incredibly difficult period.

At this time, the full resources of Bristow's incident response team are being mobilized. The Company is in the process of contacting and providing assistance to family members of those onboard and fully cooperating with authorities responding to the incident. Our highest priority is to take care of our crew and their family members and provide them with any assistance needed.

The Company is in the process of collecting pertinent information and will provide updates as appropriate.

About Bristow Group
