

#### Forward-Looking Statements

Certain statements in this presentation are forward-looking as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on current expectations, estimates, and projections about Brunswick's business and by their nature address matters that are, to different degrees, uncertain, Words such as "may," "could." "expect," "anticipate," "intend," "target," "plan," "seek," "estimate," "believe," "predict," "outlook," and similar expressions are intended to identify forward-looking statements. Forwardlooking statements are not guarantees of future performance and involve certain risks and uncertainties that may cause actual results to differ materially from expectations as of the date of this presentation. These risks include, but are not limited to: adverse general economic conditions, including reductions in consumer discretionary spending; our ability to implement our strategic plan and growth initiatives; the risk that strategic acquisitions or divestitures may not provide business benefits; the possibility that the proposed Fitness business separation will not be consummated within the anticipated time period or at all; our ability to integrate acquisitions, including the Global Marine & Mobile Business of Power Products: the potential for disruption to our business in connection with the Fitness business separation or Global Marine & Mobile Business of Power Products acquisition, making it more difficult to maintain business and operational relationships; the risk that unexpected costs will be incurred in connection with these transactions; the possibility that the expected synergies and value creation from these transactions will not be realized or will not be realized within the expected time period; changes to U.S. trade policy and tariffs; actual or anticipated increases in costs, disruptions of supply, or defects in raw materials, parts, or components we purchase from third parties, including as a result of new tariffs on raw materials; negative currency trends; fiscal policy concerns; adequate financing access for dealers and customers and our ability to access capital and credit markets; maintaining effective distribution; loss of key customers or changes in relationships; inventory reductions by dealers, retailers, or independent boat builders; requirements for us to repurchase inventory; attracting and retaining skilled labor and implementing succession plans for key leadership; our ability to meet supply objectives; higher energy and fuel costs; our ability to protect our brands and intellectual property; absorbing fixed costs in production; managing expansion or consolidation of manufacturing facilities; outages or breaches of technology systems, which could result in lost or stolen information and associated remediation costs; our ability to meet pension funding obligations; managing our share repurchases; competitive pricing pressures; our ability to develop new and innovative products and services at a competitive price, in legal compliance with existing rules; maintaining product quality and service standards; product liability, warranty, and other claims risks; legal and regulatory compliance, including increased costs, fines, and reputational risks; changes in income tax legislation or enforcement; having to record an impairment to the value of goodwill and other assets; certain divisive shareholder activist actions; international business risks; and weather and catastrophic event risks.

Additional risk factors are included in the Company's Annual Report on Form 10-K for 2017 and the Quarterly Reports on Form 10-Q for subsequent periods. Forward-looking statements speak only as of the date on which they are made, and Brunswick does not undertake any obligation to update them to reflect events or circumstances after the date of this presentation or for changes by wire services or Internet service providers.

Use of Non-GAAP Financial Information and Constant Currency Reporting

In this presentation, Brunswick uses certain non-GAAP financial measures, which are numerical measures of a registrant's historical or future financial performance, financial position or cash flows that exclude amounts, or are subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statements of operations, balance sheets or statements of cash flows of the registrant; or include amounts, or are subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented.

Brunswick has used certain non-GAAP financial measures that are included in this presentation for several years, both in presenting its results to shareholders and the investment community and in its internal evaluation and management of its businesses. Brunswick's management believes that these measures (including those that are non-GAAP financial measures) and the information they provide are useful to investors because they permit investors to view Brunswick's performance using the same tools that Brunswick uses and to better evaluate Brunswick's ongoing business performance. In addition, in order to better align Brunswick's reported results with the internal metrics used by the Company's management to evaluate business performance as well as to provide better comparisons to prior periods and peer data, non-GAAP measures exclude the impact of purchase accounting amortization related to the Power Products acquisition.

For additional information and reconciliations of GAAP to non-GAAP measures, please see Brunswick's Current Report on Form 8-K issued on January 31, 2019, which is available at <a href="https://www.brunswick.com">www.brunswick.com</a>, and the Appendix to this presentation.

Brunswick does not provide forward-looking guidance for certain financial measures on a GAAP basis because it is unable to predict certain items contained in the GAAP measures without unreasonable efforts. These items may include pension settlement charges, restructuring, exit, integration, and impairment costs, special tax items, costs related to the planned Fitness business separation, acquisition-related costs, and certain other unusual adjustments.

For purposes of comparison, 2018 net sales growth is also shown using 2017 exchange rates for the comparative period to enhance the visibility of the underlying business trends, excluding the impact of translation arising from foreign currency exchange rate fluctuations. We refer to this as "constant currency" reporting.

Presentation of Sea Ray Sport Yacht and Yacht Results

As a result of the June 25, 2018 announcement regarding Sea Ray, the results of the entire Sea Ray business are again being reported in continuing operations for GAAP purposes. However, as adjusted, non-GAAP results exclude the Sea Ray Sport Yacht and Yacht operations that are being wound down. Therefore, for all periods presented in this release, all figures and outlook statements incorporate these changes unless otherwise noted. For more information, please see the Form 8-K dated July 19, 2018, which includes metrics on a GAAP and as adjusted basis reflecting these changes.
