About Anixa Biosciences, Inc.

[Anixa](#) is a publicly-traded biotechnology company focused on harnessing the body's immune system in the fight against cancer. Anixa is developing a cancer immunotherapy program, which uses chimeric endocrine receptor t-cell (CER-T) technology, a novel type of CAR-T. Its CchekTM liquid biopsy technology is a series of inexpensive non-invasive blood tests for early detection of solid tumors based on the body's immune response to the presence of a malignancy. This technology enables cancer detection in its earliest stages in efforts to treat patients when the disease is most curable. Anixa continually examines emerging technologies in complementary fields for further development and commercialization.
