# Innoviz Reports First-Quarter 2023 Results and Updates 2023 Targets

Innoviz updates 2023 targets due to expanded relationship with a major existing customer along with other progress made year-to-date

**TEL AVIV, Israel, May 17, 2023** – <u>Innoviz Technologies Ltd.</u> (Nasdaq: INVZ) (the "Company" or "Innoviz"), a Tier-1 direct supplier of high-performance, automotive grade LiDAR sensors and perception software, today provided commercial and strategic updates on its business, reported its financial results for the first quarter ended March 31, 2023 and updated 2023 commercial and financial targets.

Innoviz today announced that a major existing global automotive customer aims to expand its use of the InnovizTwo LiDAR to a new light commercial vehicle program. With a mid-decade SOP target, development of the program is on an accelerated track, pending finalizing of technical requirements and commercial terms. Potential financial contributions from this program are anticipated to begin this year and played an important role in the decision to update previously communicated 2023 commercial and financial targets.

In addition, this collaboration includes an important integration with a major compute platform that we believe could lead to additional expansion opportunities in the future. Innoviz believes that working with the top autonomy platform partners should enable a faster time to market, accelerate the customer evaluation process, allow more seamless integration with other parts of the software stack, and position Innoviz well in its new customer acquisition efforts.

"It was another fast-moving quarter at Innoviz, and today's news marks a critical milestone in validating our strategy and highlighting the value of our technology," said Omer Keilaf, Innoviz Co-Founder and CEO. "An important part of our long-term business plan has been to show that we can gain a foothold with a large customer and earn the right to become their LiDAR vendor for multiple vehicles in their lineup. This expected expansion of business with one of our largest customers could achieve that, while also offering a meaningful financial contribution for 2023 and beyond."

Keilaf further added, "We are extremely excited by the momentum we have seen in our pipeline year-to-date and are encouraged by a noticeable step-up in customer activity that further reinforces our belief that LiDAR deployments are starting to accelerate."

#### **Commercial and Strategic Updates**

- Additional late-stage discussions with major existing customers In addition to the significant progress on the new light commercial vehicle program, the Company is in late-stage conversations for two additional program expansions with existing major customers.
- Record levels of activity in the Company's pipeline Innoviz added an additional program to its pipeline, this time bypassing the RFI stage and moving directly to the RFQ stage. The Company also saw multiple programs advance from the RFI to the RFQ stage during the quarter and has a record level of activity in the RFQ stage, with more than five RFQ's currently in process.
- **Potential displacement of a competitor** The Company believes that part of the reason the Company's new light commercial vehicle program is on an accelerated timeline is because it is

potentially displacing a development-stage competitor. Furthermore, two of the Company's advancing RFQs would possibly also displace the same development-stage competitor. Innoviz believes its 905nm solution is structurally advantaged, both in terms of technology and cost compared to 1550nm solutions.

- In discussions with NVIDIA for Hyperion platform Innoviz is in discussions with NVIDIA about integrating into series production programs leveraging the Hyperion platform. The conversations are running in parallel with several of the RFIs and RFQs in the Company's pipeline and have the potential to bring additional programs into the process.
- Innoviz is well-positioned towards 2023 Start of Production (SOP) The Company believes that it is well-positioned for production launches of Innoviz's BMW and shuttle programs, with volumes expected to increase in the second half of 2023.
- Innoviz moving up the software stack, quoting new Minimum Risk Maneuver (MRM) system MRM software and hardware acts as a failsafe to the primary autonomy system within a vehicle. In the event of a complication with the primary system and a failure of the driver to take over steering control during a transition period, the MRM system can assume control of the vehicle and deliver it to safety, typically by exiting the road. Historically, these have been camera-based systems. The Company is quoting both the hardware and the software for the system, offering a higher revenue and profit potential for vehicles that ultimately could include the technology. The Company also believes that the systems could be accretive to gross margins.
- Working with 8 of the top 10 global automakers When combined with Innoviz's existing
  customer order book, the Company has existing awards or is in an active sourcing process with
  eight out of the top ten global automakers.

#### First Quarter 2023 Financial Results

**Revenues** in Q1 2023 were \$1.0 million, down 43% compared to revenues of \$1.8 million in Q1 2022. The year-over-year decline in revenues was driven primarily by the progress in the BMW program as it approaches volume production at Magna, the Tier-1 on the program. The transition includes a shift from selling full LiDAR units to selling components to Magna at lower production average sales prices.

The decline of BMW program revenues was partially offset by meaningful growth in the volume of sales of InnovizTwo sample units, which we expect will to continue to grow in the coming quarters.

Operating expenses in Q1 2023 were \$33.3 million, an increase of 7% compared to operating expenses of \$31.1 million in Q1 2022. Operating expenses for Q1 2023 included \$5.3 million of share-based compensation compared to \$4.7 million of share-based compensation in Q1 2022. The year-over-year increase in operating expense was driven primarily by higher R&D expense, which increased to \$26.1 million in Q1 2023 versus \$22.8 million in Q1 2022 and was partially offset by lower Sales and Marketing and General and Administrative costs. The increase in R&D expense was driven primarily by a year-over-year increase in headcount, leading to higher personnel expenses and share-based compensation, with Q1 2023 share-based compensation of \$3.5 million compared to \$2.7 million in Q1 2022.

**Liquidity in Q1 2023** was approximately \$156.5 million in cash and cash equivalents, short term deposits, short term restricted cash and marketable securities as of March 31, 2023.

#### **Updating 2023 Targets**

#### The Company is providing the following updated commercial targets for full year 2023:

- An additional one to three programs with existing customers, increasing the Company's previously announced expectations of one to two programs.
- Two series production awards with new customers.
- The new light commercial vehicle program coupled with progress on other automotive programs and new RFQs offers increased visibility into 2023 potential NRE bookings.

#### The Company is providing the following updated financial outlook for full year 2023:

- Total new NRE bookings in the range of \$20-40 million.
- 2023 revenues in the range of \$12-15 million.
- 2023 Cash Collection from Customers of \$20-30 million.

#### **Conference Call**

Innoviz management will hold a web conference today, May 17, 2023, at 9:00 a.m. Eastern time (6:00 a.m. Pacific time) to discuss commercial and strategic updates, financial results for the first quarter ended March 31, 2023 and 2023 operational and financial targets. Innoviz CEO Omer Keilaf and CFO Eldar Cegla will host the call, followed by a question-and-answer session.

Investors are invited to attend by registering in advance <u>here</u>. All relevant information will be sent upon registration.

A replay of the webinar will also be available shortly after the call in the <u>Investors section</u> of Innoviz's website for 90 days.

### **About Innoviz Technologies**

Innoviz is a global leader in LiDAR technology, working towards a future with safe autonomous vehicles on the world's roads. Innoviz's LiDAR and perception software "see" better than a human driver and reduce the possibility of error, meeting the automotive industry's strictest expectations for performance and safety. Operating across the U.S., Europe, and Asia, Innoviz has been selected by internationally recognized premium car brands for use in consumer vehicles as well as by other commercial and industrial leaders for a wide range of use cases. #### **Forward Looking Statements**

This announcement contains certain forward-looking statements within the meaning of the federal securities laws, including statements regarding the services offered by Innoviz, the anticipated technological capability of Innoviz's products, the markets in which Innoviz operates, Innoviz's projected future operational and financial results, including Cash Collection from Customers, revenue and non-recurring engineering (NRE) bookings. These forward-looking statements generally are identified by the words "believe," "project," "expect," "anticipate," "estimate," "intend," "strategy," "future," "opportunity," "plan," "may," "should," "will," "would," "will be," "will continue," "will likely result," and similar expressions. Forward-looking statements are predictions, projections and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties. "Cash Collection from Customers" is cash received by the Company from revenues, advances and NRE bookings as described in the following sentence. "NRE (Non-recurring Engineering) bookings" is booked services that may be ordered from Innoviz usually as part of a series production award or other program and includes, among other things, application engineering, product adaptation services, testing and validation services, standards and qualification work and change requests (usually during the lifetime of a program). The commitment for a certain NRE is usually provided around the initiation of the program and may be paid based on milestones over the development phase of the project which may take a few years.

Many factors could cause actual future events, and, in the case of our forward-looking revenue, Cash Collection from Customers, and NRE bookings, actual orders or actual payments, to differ materially from the forward-looking statements in this announcement including but not limited to, the ability to implement business plans, forecasts, and other expectations, the ability to convert series production awards or other programs into definitive orders and the magnitude of such orders, the possibility that NRE would be set off against liabilities and indemnities, the ability to identify and realize additional opportunities, and potential changes and developments in the highly competitive LiDAR technology and related industries. The foregoing list is not exhaustive. You should carefully consider such risk and the other risks and uncertainties described in Innoviz's annual report on Form 20-F filed with the SEC on March 9, 2023 and other documents filed by Innoviz from time to time with the SEC. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and Innoviz assumes no obligation and does not intend to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise. Innoviz gives no assurance that it will achieve its expectations.
