

To Our Valued Shareholders,

We are pleased to report significant progress in 2015 at National Waste Management Holdings. National Waste's strategy is to become a full service solid waste management company and a dominant regional player by expanding organically and through strategic acquisitions. As such, we achieved a number of important initiatives and key objectives this year.

In September, we received an expansion permit and a 10-year permit renewal for our landfill operations. These permits will bring us well into the next decade and allow us to develop our current operations as well as identify additional growth opportunities to help fuel our expansion into a full service solid waste management company.

As we continue to execute on our business strategy, we have acquired Waste Recovery Enterprises LLC located in Bainbridge, New York. Waste Recovery Enterprises operates a permitted waste processing and disposal facility. The facility has been in continuous operation since 1998 and principally serves the northeastern U.S. industrial and residential markets. The addition of this facility to National Waste's family of permitted facilities provides us with a northeastern presence and an exceptional platform to better serve and expand into key waste markets. We expect this acquisition to generate revenue in excess of \$1.5 million annually with gross profit margins of approximately 45%.

In December, we acquired Gateway Rolloff Services, L.P., a portable dumpster service with pick up and drop off collection, specializing in the removal of debris, garbage, waste, hauling construction, and demolition debris located in Odessa, Florida. The completed acquisition is expected to generate revenue for National Waste in excess of \$2.3 million annually with gross profit margins of approximately 36%. By combining Gateways' roll-off services with our existing landfill business, we will be able to offer better rates and comprehensive end-to-end solid waste solutions for our customers. Moreover, it allows us to expand our footprint geographically while gaining economies of scale.

Most recently, we have secured a three-year contract with Citrus County in Florida to process their yard waste which is approximately 10,000-20,000 tons per year at their central landfill location. The term of our agreement is for three years with three, one year extensions. We have an established relationship with Citrus County and we expect to receive additional contracts in the future.

In 2015, we undertook a number of marketing initiatives by revamping our website and hiring Crescendo Communications, LLC for investor relations. We believe these initiatives coupled with executing on our business strategy will help increase our exposure within the U.S. capital markets.

"As we look toward 2016 and beyond," Jeff Chartier, President of National Waste stated, "We will continue the roll up strategy we established to become a dominant player in the solid waste management industry in Florida and New York and break into Georgia as well this year. We also plan to focus on the integration of these new acquisitions into National Waste and bring in key management to strengthen the Company and monetize our strategy of high margin revenue streams that will positively impact our 2016 results."

Looking forward, we have identified several other acquisitions that are consistent with our business strategy to acquire facilities that increase our geographic footprint, augment services to existing customers, and attract new customers under serviced markets. We believe this business strategy will help transform us into a leading vertically integrated solid waste management company.

We would like to thank our shareholders for their continued support of our efforts and look forward to keeping you apprised of developments at the company as they unfold.

Sincerely,

Louis Pavaglio,

Chief Executive Officer

FORWARD-LOOKING STATEMENTS

This shareholder letter contains forward-looking statements as defined within Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements relate to future events, including our ability to raise capital, or to our future financial performance, and involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance, or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. You should not place undue reliance on forward-looking statements since they involve known and unknown risks, uncertainties and other factors which are, in some cases, beyond our control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects our current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, growth strategy and liquidity. We assume no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.S

For a discussion of these risks and uncertainties, please see our filings with the Securities and Exchange Commission. Our public filings with the SEC are available from commercial document retrieval services and at the website maintained by the SEC at <http://www.sec.gov>.
