

J.P. Morgan 41st Annual Healthcare Conference
January 12, 2023

**Putting accessible and affordable quality
healthcare in the hands of every person on Earth**

Disclaimer

Additional Information and Where to Find It

Babylon Holdings Limited (“Babylon”) is subject to the informational reporting requirements of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). We file reports and other information with the Securities and Exchange Commission (the “SEC”) under the Exchange Act. Our SEC filings are available over the Internet at the SEC’s website at www.sec.gov.

Forward-Looking Statements

This presentation contains “forward-looking statements” as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements generally relate to future events or our future financial or operating performance. When used in this presentation, the words “estimates,” “projected,” “expects,” “anticipates,” “forecasts,” “plans,” “intends,” “believes,” “seeks,” “may,” “will,” “should,” “future,” “propose” and variations of these words or similar expressions (or the negative versions of such words or expressions) are intended to identify forward-looking statements. These forward-looking statements include, without limitation, information concerning Babylon’s possible or assumed future results of operations, business strategies, debt levels, competitive position, industry environment and potential growth opportunities.

These forward-looking statements are not guarantees of future performance, conditions, or results, and involve a number of known and unknown risks, uncertainties, assumptions and other important factors, many of which are outside of Babylon’s management’s control, that could cause actual results to differ materially from the results discussed in the forward-looking statements. These risks, uncertainties, assumptions and other important factors include, but are not limited to: our future financial and operating results and ability to generate profits in the future and our timeline to profitability; that we may require additional financing and our ability to obtain additional financing on favorable terms; our ability to sell the Meritage Medical Network/Independent Physician Association business, including the timing of the sale and the sale price; the impact of our recently completed reverse share split on the price and trading market for our Class A ordinary shares; if we fail to comply with the continued listing standards and rules of the New York Stock Exchange (the “NYSE”), the NYSE may delist our Class A ordinary shares; uncertainties related to our ability to continue as a going concern; our ability to successfully execute our planned cost reduction actions and realize the expected cost savings; the growth of our business and organization; risks associated with impairment of goodwill and other intangible assets; our failure to compete successfully; our ability to renew contracts with existing customers, and risks of contract renewals at lower fee levels, or significant reductions in members, pricing or premiums under our contracts due to factors outside our control; our dependence on our relationships with physician-owned entities; our ability to maintain and expand a network of qualified providers; our ability to increase engagement of individual members or realize the member healthcare cost savings that we expect; a significant portion of our revenue comes from a limited number of customers; the uncertainty and potential inadequacy of our claims liability estimates for medical costs and expenses; risks associated with estimating the amount and timing of revenue recognized under our licensing agreements and value-based care agreements with health plans; risks associated with our physician partners’ failure to accurately, timely and sufficiently document their services; risks associated with inaccurate or unsupportable information regarding risk adjustment scores of members in records and submissions to health plans; risks associated with reduction of reimbursement rates paid by third-party payers or federal or state healthcare programs; risks associated with regulatory proposals directed at containing or lowering the cost of healthcare, including the ACO REACH model; immaturity and volatility of the market for telemedicine and our unproven digital-first approach; our ability to develop and release new solutions and services; difficulty in hiring and retaining talent to operate our business; risks associated with our international operations, economic uncertainty, or downturns; the impact of COVID-19 or any other pandemic, epidemic or outbreak of an infectious disease in the United States or worldwide on our business; risks associated with foreign currency exchange rate fluctuations and restrictions; and the other risks and uncertainties identified in Babylon’s Annual Report on Form 20-F filed with the SEC on March 30, 2022, and in other documents filed or to be filed by Babylon with the SEC and available at the SEC’s website at www.sec.gov.

Babylon cautions that the foregoing list of factors is not exclusive and cautions you not to place undue reliance upon any forward-looking statements, which speak only as of the date made. Except as required by law, Babylon does not undertake any obligation to update or revise its forward-looking statements to reflect events or circumstances after the date of this presentation.

Information Sources

The information herein is derived from various internal and external sources. Unless otherwise indicated, information contained in this presentation concerning Babylon’s industry and the regions in which it operates, including Babylon’s general expectations and market position, market opportunity, market share and other management estimates, is based on information obtained from various independent publicly available sources and reports provided to us, and other industry publications, surveys and forecasts. We have not independently verified the accuracy or completeness of any third-party information. Similarly, internal surveys, industry forecasts and market research, which we believe to be reliable based upon our management’s knowledge of the industry, have not been independently verified. While we believe that the market data, industry forecasts and similar information included in this presentation are generally reliable, such information is inherently imprecise. In addition, assumptions and estimates of our future performance and growth objectives and the future performance of our industry and the markets in which we operate are necessarily subject to a high degree of uncertainty and risk due to a variety of factors, including those discussed under the heading “Forward-Looking Statements” above and in our filings with the SEC.

This presentation contains references to trademarks, trade names and service marks belonging to other entities. Solely for convenience, trademarks, trade names and service marks referred to in this presentation may appear without the ® or TM symbols, but such references are not intended to indicate, in any way, that the applicable licensor does not assert, to the fullest extent under applicable law, its rights to these trademarks and trade names. We do not intend our use or display of other companies’ trade names, trademarks or service marks to imply a relationship with, or endorsement or sponsorship of us by any other companies.

Use of Non-IFRS Financial Measures

This presentation includes certain financial measures to evaluate Babylon’s projected financial and operating performance, and measures calculated based on these measures, including Adjusted EBITDA, Adjusted EBITDA Margin, Medical Loss Ratio and Medical Margin, that are not prepared in accordance with IFRS. EBITDA is defined as profit (loss) for the period, adjusted for finance costs and income, depreciation and amortization, and tax provision or benefit. Adjusted EBITDA is defined as profit (loss) for the period, adjusted for finance costs and income, depreciation and amortization, tax provision or benefit, impairment expenses, change in fair value of warrant liabilities, loss on settlement of warrants, share-based compensation, foreign exchange gain or loss, restructuring and other one-time benefit arrangements and gain or loss on sale of subsidiaries. Loss for the period is the most directly comparable IFRS measure to Adjusted EBITDA. Adjusted EBITDA Margin is defined as Adjusted EBITDA divided by Total revenue for the corresponding period. IFRS Loss for the period margin is the most directly comparable IFRS measure to Adjusted EBITDA Margin. Medical Loss Ratio and Medical Margin are derived from amounts presented in Babylon’s Statement of Profit and other Comprehensive Loss for the applicable period, included in our reports filed with the SEC.

We believe that EBITDA, Adjusted EBITDA, Adjusted EBITDA Margin, Medical Loss Ratio and Medical Margin are useful metrics for investors to understand and evaluate our operating results and ongoing profitability because they permit investors to evaluate our recurring profitability from our ongoing operating activities. EBITDA, Adjusted EBITDA, Adjusted EBITDA Margin, Medical Loss Ratio and Medical Margin have certain limitations, and you should not consider them in isolation or as a substitute for analysis of our results of operations as reported under IFRS. We caution you that amounts presented in accordance with our definitions of EBITDA, Adjusted EBITDA, Adjusted EBITDA Margin, Medical Loss Ratio and Medical Margin may not be comparable to similar measures disclosed by other companies, because some companies calculate EBITDA, Adjusted EBITDA, Adjusted EBITDA Margin, Medical Loss Ratio and Medical Margin differently or not at all, limiting their usefulness as direct comparative measures. A reconciliation of Adjusted EBITDA and other non-IFRS financial measures to the most directly comparable IFRS measures, and calculation of certain non-IFRS measures, is included at the end of this presentation.

Any FY 2022 and Q4 2022 results, including estimated Medical Margins, described in this presentation are preliminary, unaudited and subject to change in connection with the completion of Babylon's financial closing process and the preparation of its audited financial statements for 2022.

Babylon is a purpose-built, digital-first platform for delivering value-based care at scale

Digital-first, AI-led, Scalable Model

- Powers **rapid scaling** and engagement of new populations
- **Intelligent, data-driven care** empowering clinicians and patients

50%+

member interactions via technology platform⁽¹⁾

85%

primary care consultations entirely virtual⁽²⁾

Comprehensive, Integrated, Cost Effective Care

- Uniquely end-to-end – **digital-only**, **virtual**, **in-person**
- Full longitudinal member coverage – **primary and secondary care**, **acute and chronic care**

1,500+

global, multispecialty provider network⁽³⁾

90%+

of which Babylon directly employs in the US

Intrinsically Value-based

- **VBC native** – capabilities (technologies, products, and services) **built from ground up**
- VBC model drives **strong alignment with customers, members, providers, and partners**

~271K

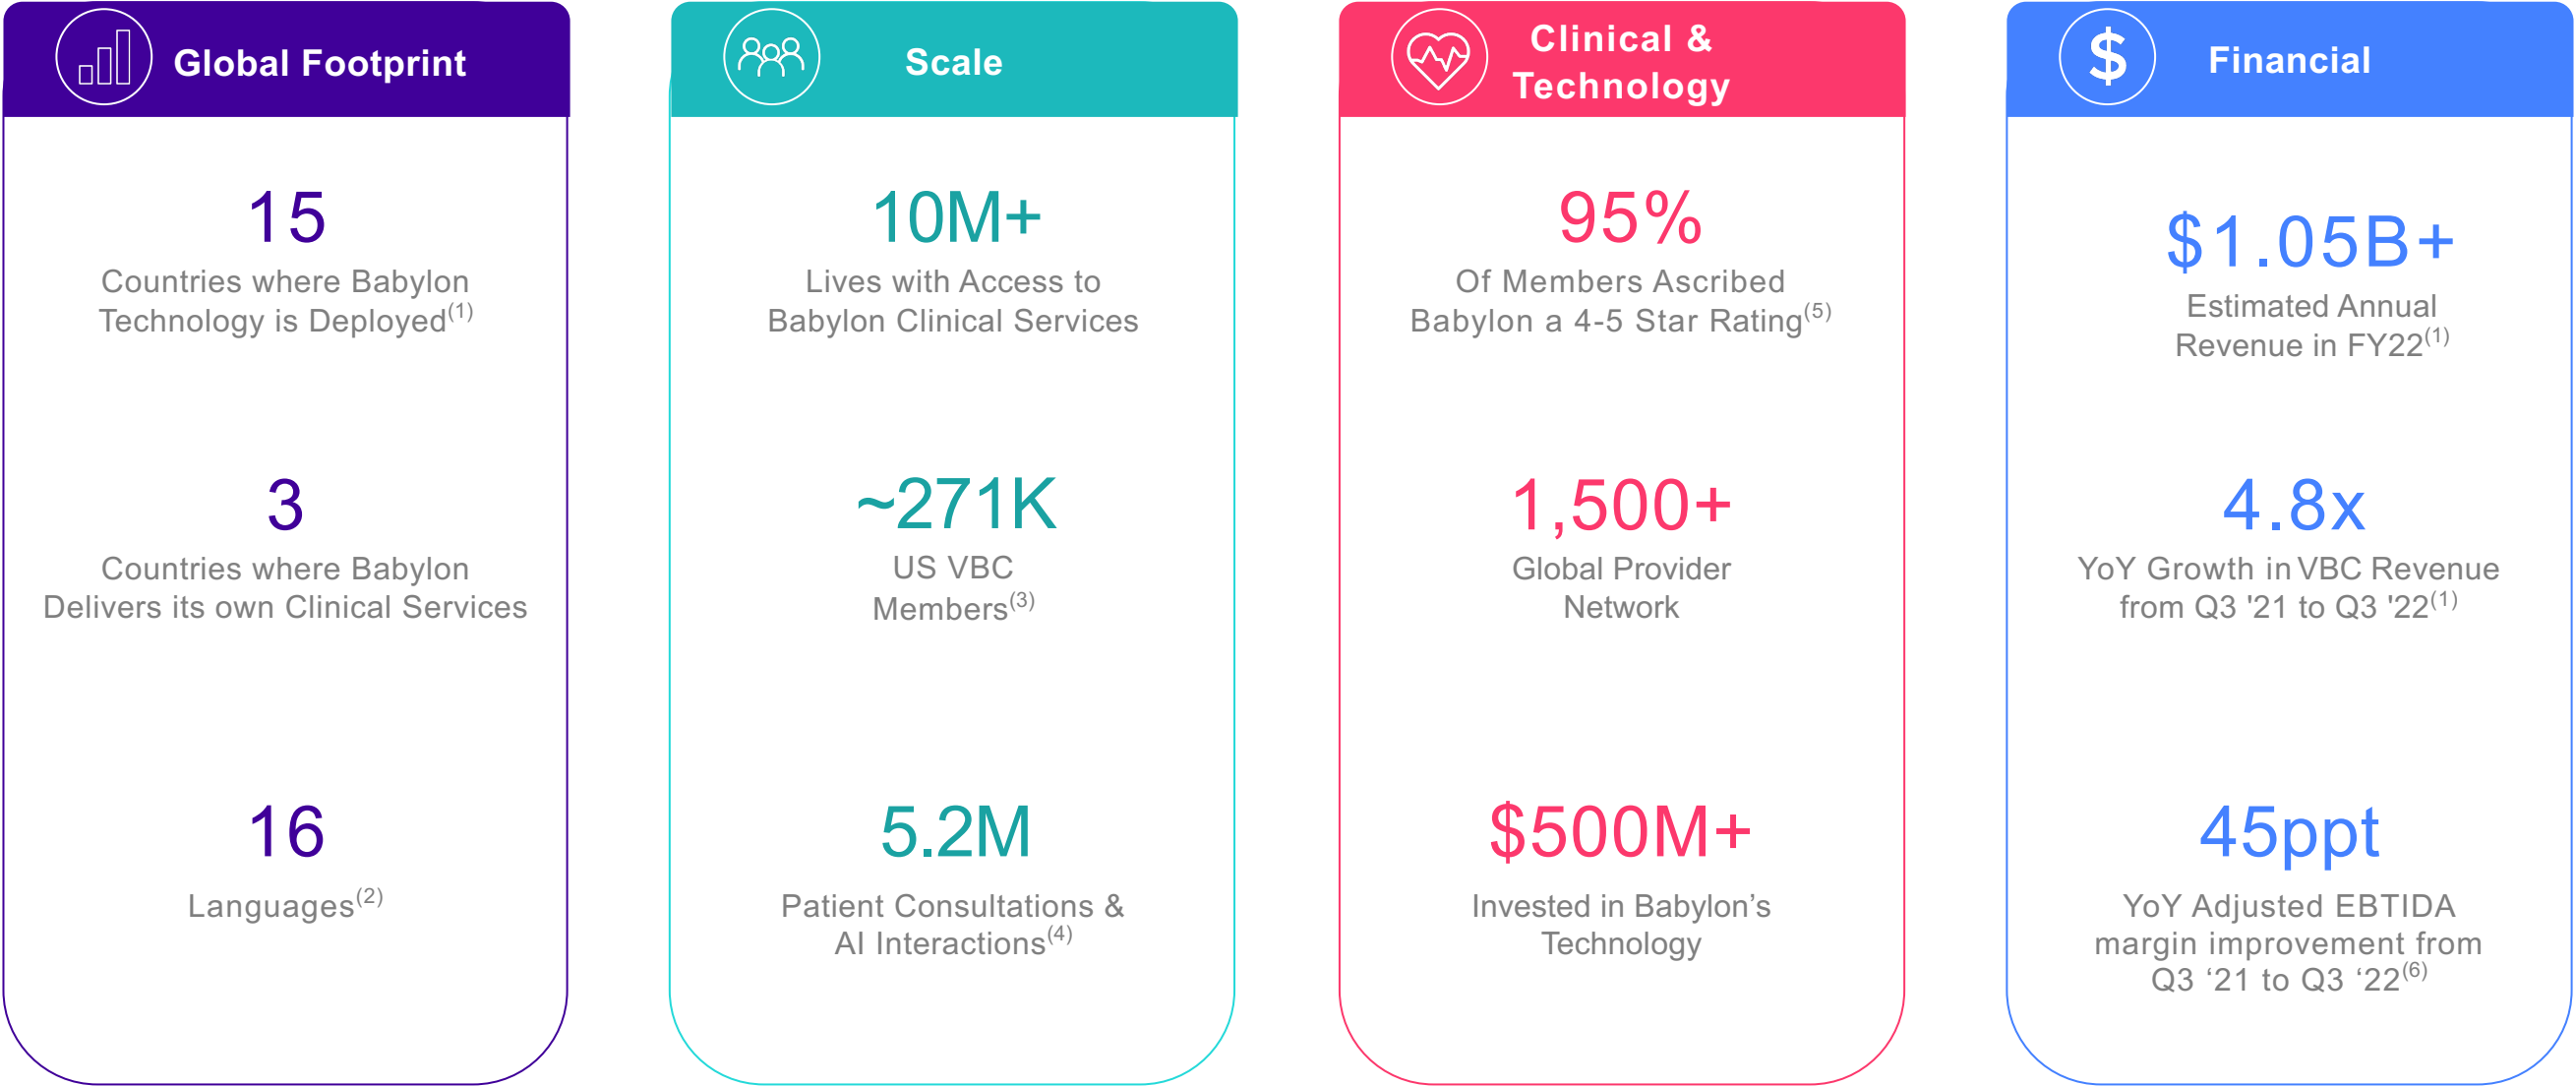

VBC members in the US⁽⁴⁾

12ppt

Estimated medical margin improvement in digital-first mature VBC cohorts⁽⁵⁾

Notes: (1) This metric was calculated using Babylon data from September 2021 to December 2021 from the following regions: US, UK, Rwanda, KS A, Canada and SE Asia. An 'interaction' takes place if a user engages with one of the following Babylon products/services: Consultation, Symptom Checker, Health Check, Health Assessment or Monitor. (2) Based on Babylon GP at Hand Internal data. (3) Babylon Internal Data as of December 16, 2022. (4) Under contract as of September 30, 2022. (5) Medical Margin is defined as 1 minus Medical Loss Ratio. Medical Loss Ratio defined as the absolute value of Claims Expense divided by VBC revenue. Data for NY, MS, GA cohorts from Q3 '21 to Q4 '22 YTD.

Babylon at a Glance

Babylon's digital-first model influences care at all stages of the member journey and is scalable across all populations

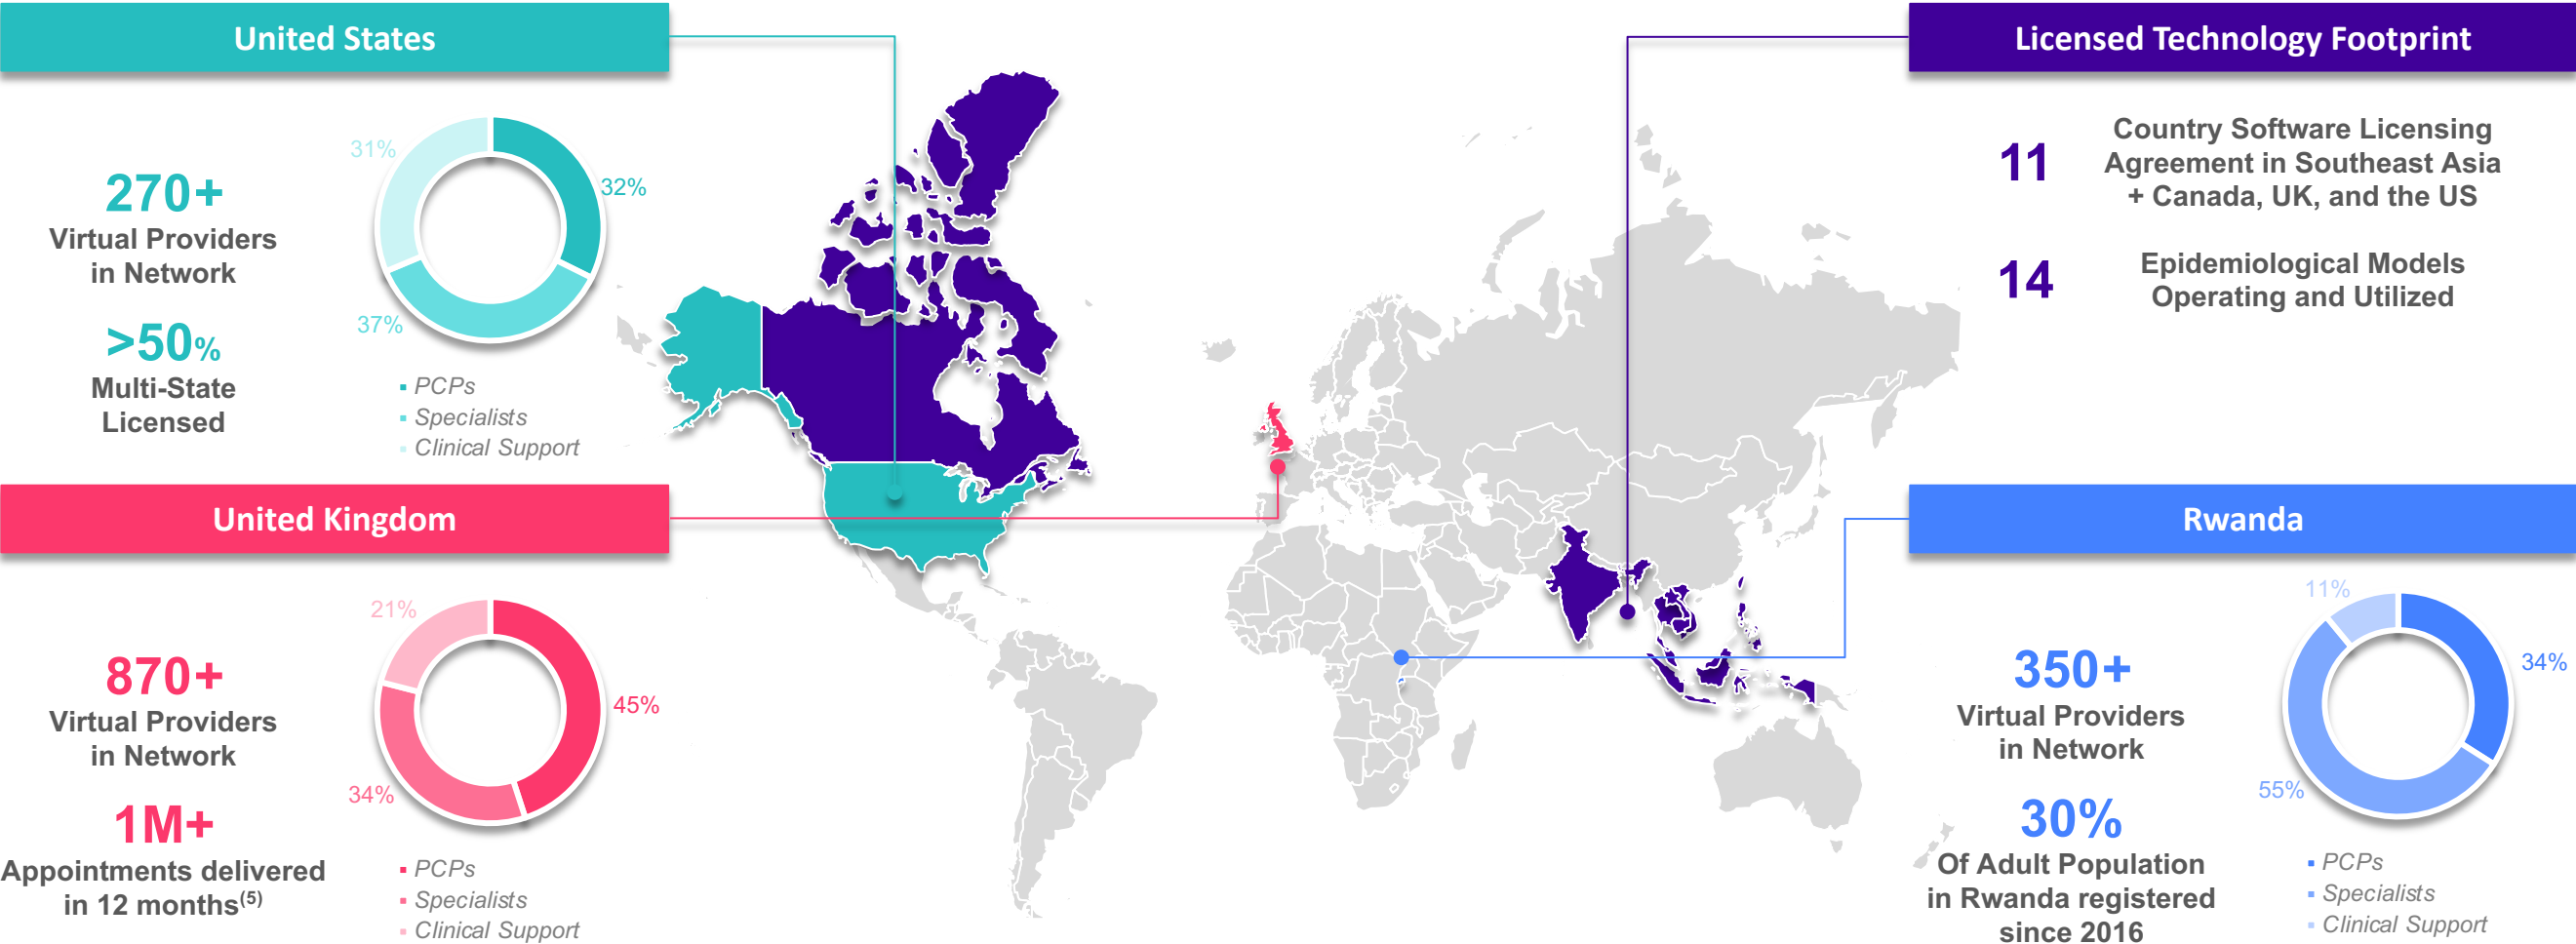

Notes: Some features or elements of features may be under active development, have not been commercialized and we cannot guarantee if / when the product will be delivered to members.

Our care model steers members to the most clinically-appropriate and resource-efficient care setting to optimize outcomes and savings

We have assembled a comprehensive global provider network to deliver the highest quality care

1,500+	90%+	20	50	82%	95%
Global Provider Network	Providers Employed in the US	Specialties ⁽¹⁾	State US Footprint ⁽²⁾	Of Members Reported Positive Clinical Impact ⁽³⁾	Of Members Give Babylon a 4-5 Star Rating ⁽⁴⁾

Our AI-led platform has been purpose-built to maximize functionality, utilize data intelligently, drive patient engagement, and enhance operational efficiency...

Depth and Breadth of Functions & Capabilities

- **Enterprise-grade**, white-labeled for **B2B clients globally**
- Localized and deployed in **15 countries**
- **EMR** and **third party integrations**
- Deployed in various payor-partner apps and services across **national health systems** and **payor organizations**

Rich, Patient Experience-Led Applications

- **Millions with access** to Babylon's technology globally via web, app, phone
- Product development guided by **significant volume of member feedback**
- **Vast array of configurations** in patient profiles, appointment types, patient journey

Data & AI-Powered Insights Embedded Across the Platform

- **100+ data sources** drive personalized insights
- Predicted **health acuity scores for 170K+ members**, enabling early intervention⁽¹⁾
- **Cutting-edge AI research** recognized for its excellence

Comprehensive Clinical Service Delivery

- **Automated 55% of post-consultation tasks**, enabling clinicians to focus on patient care
- AI designed for **clinical decision support**
- **~80% average recall** achieved by our AI vs. 84% recall by doctors⁽²⁾

~250

Technology employees globally

\$500M+

Invested in Technology

24

Patents granted in the US/UK

~30

Peer Reviewed Publications

Notes: (1) Babylon Internal Data, as of Dec '22. (2) A Comparison of Artificial Intelligence and Human Doctors for the Purpose of Triage and Diagnosis (2020). Recall (also called sensitivity) is the proportion of relevant diseases that are included in the differential.

Independent analysis has proven the efficacy of our digital-first model in the UK; we are seeing similar leading indicators of progress in the US

In-Person Care

25%+ Reduction in ER Visit Likelihood⁽¹⁾

Acute Care Utilization

~35% Acute Care Cost Savings⁽²⁾

Member Engagement

Over 60% Reduction in Likelihood of NHS 111 Call⁽¹⁾

Reduction in Depression and Anxiety which is a Leading Indicator for **Reduced Physical Care Costs**

Reduction of **Inpatient Admissions** in our Longest-Tenured Contract

Engagement of High Risk Members in the First 6 Months of Contract ⁽³⁾

Notes: (1) Based on an evaluation by Ipsos Mori of NHS data, comparing newly registered patients at our Babylon GP at Hand (NHS) service to patients newly registered at London GP Practices. London, UK is used as the comparator as Babylon GP at Hand is based in this area. (2) Based on UK data, specifically for our Babylon GP at Hand (NHS) service. Babylon GP at Hand acute care cost per weighted patient in 2019/20 was compared to the North West London average in 2019/20, using NHS funding formulae to account for age, sex and other factors influencing health need. North West London is used as the comparator as Babylon GP at Hand is based in this area. (3) Based on data from Georgia and Mississippi cohorts.

We are seeing strong medical margin improvement in our digital-first cohorts...

...and our clinical performance continues to accelerate as we learn from each VBC contract

Our business model is modular to best meet client needs and has three revenue streams

Notes: (1) Represents 2021A revenue breakdown.

We continue to deliver strong growth...

Sources: 2021 20-F filed 03/28/2022 and Form 6-K filed on November 10, 2022.

Notes: (1) : Actual revenue for 2020 and 2021 in IFRS. Estimated revenue for 2022 on both an IFRS and U.S. GAAP basis, including any revenue relating to discontinued operations. As per the January 12, 2023 press release filed with the SEC on Form 8-K on January 12, 2023. This financial result is preliminary, unaudited and subject to change in connection with the completion of Babylon's financial closing process and the preparation of its audited financial statements for 2022, which will be reported in U.S. GAAP.

...while proactively diversifying the risk profile of our member base with a focus on Medicare and commercial lives

Notes: (1) Other includes certain revenue generating items not included within Medicaid, Medicare and commercial categories such as Higi revenue and third party admin fee revenue.

We have consistently enhanced our margin profile through scale and successful execution of cash runway enhancement measures

Notes: (1) For greater detail, refer to the Appendix for a reconciliation of Adjusted EBITDA and the calculation of other non-IFRS measures. Revenue and Adjusted EBITDA (IFRS) figures exclude \$28.4m of one-off upfront revenue recognition in connection with a software licensing arrangement in Q1 2021.

Preliminary Results for 2022: Beating Expectations

Our **2022 revenue is expected to exceed \$1.05⁽¹⁾ billion** on both an International Financial Reporting Standards (IFRS) and U.S. GAAP basis (exceeding the lower end of our previous guidance of \$1.05 to \$1.1 billion).

In July 2022 we announced cost reductions expected to deliver **\$100 million in yearly savings**. As a result of additional cost saving measures, we expect to **deliver an additional 25% in cost reductions** on an annualized basis.

Our **2022 IFRS Adjusted EBITDA** is expected to **beat** our previous guidance of **\$(270)⁽¹⁾ million or less**.

We expect the proceeds from the planned **sale of our IPA business** in California in early 2023 to **fund Babylon to profitability**.

Thank you!

Value-based care revenue	—	\$26,038	\$27,259	\$39,133	\$55,715	\$98,745	\$246,575	\$244,098	\$267,686
Claims expense	—	—	(23,917)	(40,384)	(51,298)	(104,026)	(247,552)	(238,764)	(264,283)
Medical Loss Ratio %	—	—	88%	103%	92%	105%	100%	98%	99%
Medical Margin %	—	—	12%	(3%)	8%	(5%)	(0%)	2%	1%

Note: We are not able to reconcile projected 2022 Adjusted EBITDA or 2022 Adjusted EBITDA Margin to their respective most directly comparable IFRS measures as we are not able to forecast IFRS loss for the period on a forward-looking basis without unreasonable efforts due to the high variability and difficulty in predicting certain items that affect IFRS loss for the period, including, but not limited to, changes in fair value of warrant liabilities, impairment expense, share-based compensation, restructuring and other one-time benefits, foreign exchange gains or losses and gains and losses on sale of subsidiaries. Adjusted EBITDA should not be used to predict IFRS loss for the period as the difference between the two measures is variable and may be significant.
