### Note 1. Summary of Significant Accounting Policies and Going Concern

#### A. Accounting Practices

The accompanying financial statements of **Athene Annuity and Life Company** (the Company) have been prepared in conformity with the accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Iowa.

The Insurance Division, Department of Commerce, of the State of Iowa (the Division) recognizes only statutory accounting practices prescribed or permitted by the State of Iowa for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Iowa Insurance Law. The NAIC's Accounting Practices & Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Iowa. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

Among the products issued by the Company are indexed universal life insurance and indexed annuities. These products allow a portion of the premium to earn interest based on certain indices, primarily the Standard & Poor's 500 Composite Stock Price Index. Call options, futures, variance swaps and total return swaps are purchased to hedge the growth in interest credited to the customer as a direct result of increases in the related indices. In 2006, the Commissioner of the Division issued Bulletin 06-01, *Accounting for Derivative Instruments Used to Hedge the Growth in Interest Credited for Index Products*, which prescribes that an insurer may elect to recognize changes in the fair value of derivative instruments purchased to hedge indexed products in the statement of operations. The Company has elected to apply Bulletin 06-01 to its futures, variance swaps and total return swaps, which resulted in a decrease of \$0.9 million and less than \$0.1 million to the Company's net income for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively. Application of Bulletin 06-01 does not impact the Company's statutory surplus amounts.

In 2009, the Commissioner of the Division promulgated lowa Administrative Code (IAC) Section 191-97, Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve, which prescribes that an insurer may elect (i) to use an amortized cost method to account for certain derivative instruments, such as call options, purchased to hedge the growth in interest credited to the customer on indexed insurance products and (ii) to utilize an indexed annuity reserve calculation methodology under which call options associated with the current index interest crediting term are valued at zero. The Company has elected to apply IAC Section 191-97 to its over the counter (OTC) call options and reserve liabilities. As a result, the Company's net income decreased by \$34.7 million and increased by \$97.2 million for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively, and the Company's statutory surplus decreased by \$51.3 million and \$66.2 million as of September 30, 2018 and December 31, 2017, respectively.

The NAIC requires annuities issued by life insurance companies on or after January 1, 2015, to use the 2012 Individual Annuity Reserving (IAR) Mortality Table. In 2015, the Division promulgated IAC Section 43.3(5), which set an elective alternative effective date of January 1, 2016 for adoption of the 2012 IAR Mortality Table. The Company chose to use the Annuity 2000 Mortality Table for all annuities issued in 2015, which resulted in an increase of \$0.5 million and \$1.2 million to the Company's net income for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively. The Company's statutory surplus increased by \$3.1 million and \$2.7 million as of September 30, 2018 and December 31, 2017, respectively.

The Company received a permitted practice from the Division which allowed the Company to record a surplus reset under SSAP No. 72, *Surplus and Quasi-Reorganizations*, during the quarter ended March 31, 2017. This approval is deemed a permitted practice as it was granted greater than six months following a change of control, which is the criteria outlined in SSAP No. 72. The acquisition of the Company by Athene Holding Ltd (AHL) on October 2, 2013 represented a 100% change of ultimate ownership as well as a substantive change in the operations of the Company. The surplus reset resulted in a reclassification between unassigned surplus and gross paid-in and contributed surplus of \$1,502.3 million, which is equal to the negative unassigned surplus balance on October 2, 2013 immediately following the execution of all transactions which occurred as a result of the change in control. This permitted practice has no impact on the Company's net income or total capital and surplus.

A reconciliation of the Company's net income and statutory surplus between practices prescribed by the State of Iowa and NAIC SAP is shown below:

- B. Use of Estimates in the Preparation of the Financial Statements: No Change
- C. Accounting Policy
  - (1) (5) No Change
  - (6) Loan-backed and structured securities are stated at amortized cost or fair market value based on their rating by the NAIC. Changes to estimated cash flows on the securities are accounted for retrospectively for securities that are highly rated at the time of purchase and in which the security cannot be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. The prospective method is used for those securities where an other than temporary impairment has been taken, the security is not highly rated at the time of purchase, securities where receipt of all contractual principal cash flows is not expected, or those securities that can be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. Loan-backed and structured securities stated at amortized cost are amortized or accreted using the scientific interest method.

(7) - (13) No Change

#### D. Going Concern

Management's assessment of the relevant conditions through November 14, 2018 do not give rise to substantial doubt of the Company's ability to continue as a going concern.

### Note 2. Accounting Changes and Corrections of Errors

During the current year's financial statement preparation, the Company discovered errors within prior period Annual Statements relating to A-791 amortization and reserves. After consideration of materiality and in accordance with SSAP No. 3, *Accounting Changes and Correction of Errors*, these corrections were recorded directly to surplus. The impact of the correction of A-791 amortization represented a reclassification of \$54.8 million between income and surplus, with no net impact to surplus, and the impact of the correction of reserves increased surplus by \$2.8 million in 2018. The impact of these amounts represented less than 1% of ending capital and surplus as of both September 30, 2018 and December 31, 2017.

### Note 3. Business Combinations and Goodwill: No Change

### Note 4. Discontinued Operations: NONE

#### Note 5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans: No Change

B. Debt Restructuring: No ChangeC. Reverse Mortgages: NONE

D. Loan-Backed Securities

- (1) Prepayment assumptions for loan-backed bonds and structured securities were obtained from broker dealer survey values or internal estimates.
- (2) No other-than-temporary impairment was recognized on loan-backed securities due to the intent to sell or inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis.
- (3) Other-than-temporary impairment was recognized on the following loan-backed securities due to the present value of the cash flows expected to be collected being less than the amortized cost basis:

1	2	3	4	5	6	7

#### Note 8. Derivative Instruments

A - G. No Change

There were no derivative contracts with premium cost.

Note. 9. Income Taxes: No Change

#### Note 10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

Some employees of Athene Employee Services LLC participate in one or more Share Award Agreements (the Agreements) sponsored by AHL, an indirect parent of the Company, for which the Company has no legal obligation. Salary expense of Athene Employee Services LLC is partially allocated to the Company through the Shared Services Agreement. Under SSAP No. 104R, Share-Based Payments, the stock compensation expense associated with the Agreements that would have been allocated to the Company is required to be recorded as a capital contribution to the reporting entity. The Company has allocated the stock compensation expense associated with the Agreements based on the same methodology as the Shared Services Agreement. In accordance with SSAP No. 104R, the Company incurred expense and recorded a capital contribution under the Agreements totaling \$6.9 million and \$17.6 million for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively, which includes amounts contributed by the Company to downstream insurance subsidiaries.

During February 2018, Athene Life Re Ltd. (ALRe) formed a subsidiary Bermuda reinsurer, Athene Annuity Re Ltd. (AARe) which has been licensed with the Bermuda Monetary Authority. During 2018, pursuant to a Contribution Agreement, AHL contributed Athene USA Corporation, an indirect parent of the Company, and its subsidiaries to AHL's wholly owned subsidiary ALRe.

The Company recaptured, amended, and entered into new reinsurance agreements with affiliates during 2018. See Note 23, Reinsurance for the details of those changes.

During July 2018, the Company received a \$15.0 million capital contribution from its direct parent, Athene Annuity & Life Assurance Company.

During July 2018, the Company made a \$15.0 million capital contribution to its wholly-owned subsidiary, Athene Annuity & Life Assurance Company of New York.

## Note 11. Debt

- A. No Change
- B. Federal Home Loan Bank (FHLB) Agreements
  - (1) The Company is a member of the FHLB of Des Moines. Through its membership, the Company is eligible to borrow under variable rate short-term federal fund arrangements to provide additional liquidity. During 2018, the Company borrowed \$183.0 million from the FHLB through their variable rate short-term federal funds program, which was accounted for as borrowed money under SSAP No. 15, *Debt and Holding Company Obligations*. The borrowing matured on August 24, 2018 and carried an interest rate of 2.16%, with interest due at maturity. The Company incurred interest expense on the short-term borrowing of \$1.3 million for the nine months ended September 30, 2018. There were no borrowings outstanding under the short-term federal funds borrowing arrangement as of September 30, 2018.

The Company has issued funding agreements to the FHLB of Des Moines in exchange for cash resulting in a liability of \$691.8 million as of September 30, 2018. The Company uses these funds in an investment spread strategy, consistent with its other investment spread operations. As such, the Company applies SSAP No. 52, *Deposit-Type Contracts*, accounting treatment to these funds, consistent with its other deposit-type contracts. It is not part of the Company's strategy to utilize these funds for operations, and any funds obtained from the FHLB of Des Moines for use in general operations would be accounted for consistent with SSAP No. 15 as borrowed money.

The Company must provide appropriate collateral to borrow under the arrangements described above. The borrowing capacity available to the Company under these agreements is largely a factor of the Company's ability to post eligible collateral, as well as internal limits such as single-holder exposure limits (10% of the entity's balance sheet liabilities) and NAIC capital requirements.

The tables below indicate the amount of FHLB of Des Moines stock purchased, collateral pledged, assets and liabilities related to the agreements with FHLB of Des Moines.

D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming from Lawsuits: NONE

E. Joint and Several Liabilities: NONE

F. All Other Contingencies

On July 27, 2015, John Griffiths, on behalf of himself and others similarly situated, filed a putative class action complaint in the United States District Court for the District of Massachusetts. An amended complaint was filed on December 18, 2015. The complaint asserts claims against AHL, the Company and Athene London Assignment Corporation (Athene London), in addition to an Aviva defendant. AHL is a named defendant due to its purchase of Aviva USA Corporation, and the Company and Athene London are named as successors to Aviva Life Insurance Company and Aviva London Assignment Corporation, respectively. The complaint alleges a putative class of all persons who are the beneficial owners of assets which were used to purchase structured settlement annuities that Aviva Life Insurance Company, Aviva London Assignment Corporation, and Aviva International Insurance Limited (collectively, the Aviva Entities) or their predecessors, as applicable, delivered to purchasers on or after April 1, 2003 that were backed by a capital maintenance agreement issued by Aviva International Insurance Limited or its predecessor (the CMA). The complaint alleges that the Aviva Entities sold structured settlement annuities to the public on the basis that such products were backed by the CMA, which was alleged to be a source of great financial strength. The complaint further alleges that the Aviva Entities used the CMA to enhance the sales volume and raise the price of the annuities. The complaint further alleges that the Aviva Entities used the CMA to enhance the sales volume and raise the price of the annuities. The complaint claims that, as a result of Aviva USA Corporation's sale to AHL, the CMA terminated. According to the complaint, no notice of this termination was provided to the owners of the structured settlement annuities. The complaint enrichment. On October 23, 2018, the Court granted final approval of the settlement. Terms of the settlement include: (1) AHL entering into a capital maintenance agreement with Athene London re

The Company and certain of its insurance subsidiaries have experienced increased service and administration complaints related to the conversion and administration of the block of life insurance business acquired in connection with Athene Holding Ltd.'s acquisition of Aviva USA Corporation and reinsured to affiliates of Global Atlantic Financial Group Ltd. The life insurance policies included in this block have been and are currently being administered by AllianceOne, a subsidiary of DXC Technology Company, which was retained by such Global Atlantic affiliates to provide services on such policies. AllianceOne also administers certain annuity policies that were on Aviva USA Corporation's legacy policy administration systems that were also converted in connection with the acquisition of Aviva USA Corporation and have experienced similar service and administration issues.

As a result of the difficulties experienced with respect to the administration of such policies, Athene received notifications from several state regulators, including but not limited to the New York Department of Financial Services (NYDFS), the California Department of Insurance and the Texas Department of Insurance, indicating, in each case, that the respective regulator planned to undertake a market conduct examination or enforcement proceeding of the Company or one of its subsidiaries, as applicable, relating to the treatment of policyholders subject to Athene reinsurance agreements with affiliates of Global Atlantic and the conversion of such annuity policies, including the administration of such blocks by AllianceOne. On June 28, 2018, Athene Life Insurance Company of New York (ALICNY) entered into a consent order with the NYDFS resolving that matter in a manner that ultimately did not have a material impact on its financial condition, when considering AHL's indemnification from affiliates of Global Atlantic, which was passed to ALICNY in the form of a capital contribution in the third quarter of 2018.

In addition to the foregoing, the Company has received inquiries, and expects to continue to receive inquiries, from other regulatory authorities regarding the conversion matter. In addition to the examinations and proceedings initiated to date, it is possible that other regulators may pursue similar formal examinations, inquiries or enforcement proceedings and that any examinations, inquiries and/or enforcement proceedings may result in fines, administrative penalties and payments to policyholders. The Company is not currently able to estimate the amount of any such fines, penalties or payments arising from these matters with reasonable certainty, but it is possible that such amounts may be material.

Pursuant to the terms of the reinsurance agreements between Athene and the relevant affiliates of Global Atlantic, the applicable affiliates of Global Atlantic have financial responsibility for the ceded life block and are subject to significant administrative service requirements, including compliance with applicable law. The agreements also provide for indemnification to Athene, including for administration issues.

In 2000 and 2001, two insurance companies which were subsequently merged into the Company purchased from American General Life Insurance Company (American General) broad based variable corporate-owned life insurance (COLI) policies that, as of September 30, 2018, had an asset value of \$366.0 million. In January 2012, the COLI policy administrator delivered to the Company a supplement to the existing COLI policies and advised that American General and ZC Resource Investment Trust (ZC Trust) had unilaterally implemented changes set forth in the supplement that if effective, would: (1) potentially negatively impact the crediting rate for the policies and (2) change the exit and surrender protocols set forth in the policies. In March 2013, the Company filed suit against American General, ZC Trust, and ZC Resource LLC in Chancery Court in Delaware, seeking, among other relief, a declaration that the changes set forth in the supplement were ineffectual and in breach of the parties' agreement. The parties filed cross motions for judgment as a matter of law, and the court granted defendants' motion and dismissed without prejudice on ripeness grounds. The issue that negatively impacts the crediting rate for one of the COLI policies has subsequently been triggered and on April 3, 2018, the Company filed its suit against the same defendants in Chancery Court in Delaware seeking substantially similar relief, which defendants have moved to dismiss and the Company has opposed. The Court set the hearing for February 13, 2019. If the supplement is ultimately deemed to be effective, the purported changes to the policies could impair the Company's ability to access the value of guarantees associated with the policies. The value of the guarantees included within the asset value reflected above is \$175.8 million as of September 30, 2018.

On April 6, 2016, the U.S. Department of Labor (DOL) issued the fiduciary rule which imposes upon third parties who sell annuities within Employee Retirement Income Security Act of 1974 (as amended, ERISA) plans or to individual retirement account (IRA) holders a fiduciary duty to retirement investors. The DOL delayed the applicability date of the fiduciary rule to June 9, 2017 and the full compliance date to July 1, 2019. On March 15, 2018, the U.S. Court of Appeals for the Fifth Circuit issued an opinion vacating, in their entirety, the DOL fiduciary rule and its associated package of new and amended prohibited transaction exemptions. On June 21, 2018, the Fifth Circuit Court of Appeals issued a mandate officially vacating as a whole the DOL's 2016 Fiduciary Rule, including the Best Interest Contract Exemption, and the DOL's other related 2016 prohibited transaction exemptions.

The U.S. Securities and Exchange Commission (SEC) has indicated that it will work with the DOL to propose rules creating a uniform standard of conduct applicable to broker-dealers and investment advisers, which, if adopted, may affect the distribution of the Company's products. On April 18, 2018, the SEC released three new proposed rules addressing a uniform best interest standard of conduct requesting public comment. The public comment period has expired and the SEC is expected to release an update of the rules in the future. In addition, the NAIC is working to propose changes to the Suitability in Annuity Transactions Model Regulation to include the best interest concept. Should the SEC or NAIC rules, if adopted, not align, the distribution of the Company's products could be further complicated.

In addition to the cases previously discussed, the Company is routinely involved in litigation and other proceedings, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. At present, no contingencies related to pending litigation and regulatory matters are considered material in relation to the financial position of the Company.

Common stock of \$8.6 million was transferred from Level 1 to Level 2 during the quarter ended September 30, 2018 as the fair value of these assets was measured using valuation techniques utilizing observable market inputs rather than quoted market prices for the quarter.

(2) Fair value measurements in (Level 3) of the fair value hierarchy

Description for each class of asset or liability	Ending Balance at 06/30/2018	Transfers into Level 3	Transfers out of Level 3	Total gains and (losses) included in Net Income	Total gains and (losses) included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance at 09/30/2018
a. Assets					•					
Common stocks unaffiliated	1,225,946				482,892					1,708,838
Total Assets	1,225,946				482,892					1,708,838

- (3) Transfers between fair value hierarchy levels are recognized at the end of the period in which the transfer occurs.
- (4) The following discussion describes the valuation methodologies and inputs used for assets and liabilities measured and disclosed at fair value. The techniques utilized in estimating the fair values of financial instruments are reliant on the assumptions used.

Fair value estimates are based on quoted market prices when available. When quoted market prices are not available, the Company utilizes commercially available pricing vendors that utilize observable market inputs, like recent trading activity, to derive fair value. When vendor prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates the fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect risk inherent in a particular methodology, model or input employed.

The Company's financial assets and liabilities carried at estimated fair value have been classified, for disclosure purposes, based on a hierarchy defined by current accounting guidance. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

The levels of the fair value hierarchy are as follows:

Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability.

Level 2 inputs include the following:

- 1. Quoted prices for similar assets or liabilities in active markets,
- 2. Observable inputs other than quoted market prices, and
- 3. Observable inputs derived principally from market data through correlation or other means.

Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

Assets and liabilities are valued as discussed below in part C.

- B. Other Fair Value Disclosures: NONE
- C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

						Net Destinable	Net Asset
	l					Not Practicable	( /
	Aggregate	Admitted				(Carrying	Included in

type contracts	252,081	234,285			252,081		

Bonds and short-term investments – The Company obtains the fair value for most marketable, public bonds without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. If the Company cannot value a public bond with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3. The Company values privately placed bonds based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer. In some instances, the Company uses a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. Privately placed fixed maturity securities are classified as Level 2 or 3.

Preferred stocks and common stocks unaffiliated – The Company values equity securities, typically private equities or equity securities not traded on an exchange, using several commercial pricing services or an internal model. The securities priced by a commercial pricing service are classified as Level 2 and the securities priced by an internal model are classified as Level 3. In addition, unaffiliated common stocks include FHLB stock, which is carried at fair value, which is presumed to be par because it can only be redeemed by the bank and is classified as Level 2.

Mortgage loans – The Company estimates mortgage loans on a monthly basis using discounted cash flow analysis and rates being offered for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. The discounted cash flow model uses unobservable inputs, including estimates of discount rates and loan prepayments. Mortgage loans are classified as Level 3.

Policy loans – The fair value of policy loans classified as Level 2 is equal to the carrying value of the loans, which are collateralized by the cash surrender value of the associated insurance contracts.

Derivatives – Derivative contracts can be exchange traded or over-the-counter. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, measures of volatility, prepayment rates, and correlation of the inputs. The Company considers and incorporates counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. The Company also evaluates and includes its own nonperformance risk in valuing derivatives. The majority of the Company's derivatives trade are in liquid markets; therefore, the Company can verify model inputs and model selection does not involve significant management judgment and are classified within Level 2. If the Company cannot verify model inputs and model selection does involve significant management judgment, the derivatives are classified as Level 3.

Other invested assets — Within other invested assets, partnerships are valued based on net asset value information provided by the general partner or related asset manager. These partnership interests usually include multiple underlying investments for which either observable market prices or other valuation methods are used to determine the fair value. The investments are classified as Level 3 due to the limited market activity and price transparency inherent in the market for such investments. Other than partnerships, other invested assets may include surplus notes and other investments with bond or stock characteristics and the Company attempts to value these using several commercial pricing services, which would be classified as Level 2 assets. If the Company cannot value with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3 assets.

Separate account assets (variable products) – Separate account assets classified as Level 2 are valued based on the fair value of the underlying funds. Fair values and changes in the fair values of the underlying funds accrue directly to the policy owners and are not included in the Company's revenues and expenses or surplus.

Separate account assets (group annuity) – Financial instruments within this separate account classified as Level 2 and 3 are valued using the same fair value assumptions and methods utilized in the general account.

Deposit-type contracts (including separate account group annuity) – Deposit-type contracts classified as Level 3 include single premium immediate annuities (SPIA) and supplemental contracts. Fair value of SPIA and supplemental contracts are calculated by discounting best estimate cash flows based on mortality and market interest rate assumptions.

Separate account liabilities (funding agreements) – Fair value of the funding agreements within this separate account are calculated by discounting future cash flows using market rates on the valuation date, and are classified as Level 2.

D. Not Practicable to Estimate Fair Value: NONE

### Note 21. Other Items: No Change

#### Note 22. Events Subsequent

Subsequent events have been considered through November 14, 2018 for the statutory statement dated September 30, 2018. There have been no Type I or Type II events subsequent to the close of the books and accounts for this statement that have a material effect on the financial condition of the Company.

### Note 23. Reinsurance

Effective January 1, 2018, the Company entered into a coinsurance agreement with Athene Annuity & Life Assurance Company to cede 50% of all retail annuity business issued by the Company on or after January 1, 2018. This treaty is applied prior to any further cession of this business under other treaties

Effective January 1, 2018, the Company recaptured a modified coinsurance reinsurance agreement originally entered into with ALRe on April 1, 2017. This agreement ceded 80% of the pension risk transfer business issued on or after April 1, 2017. The Company subsequently entered into a modified coinsurance agreement with AARe effective January 1, 2018 to cede the same 80% quota share of the pension risk transfer business. The modified coinsurance reserves that were recaptured from ALRe and ceded to AARe were \$1,781.5 million as of January 1, 2018.

Effective January 1, 2018, the Company recaptured a modified coinsurance reinsurance agreement originally entered into with ALRe on October 1, 2013. The agreement ceded 80% of all fixed spread annuity and fixed spread life insurance business inforce as of October 1, 2013. The Company subsequently entered into a modified coinsurance agreement with AARe effective January 1, 2018 to cede the same 80% quota share of this business. The modified coinsurance reserves that were recaptured from ALRe and ceded to AARe were \$810.2 million as of January 1, 2018.

Effective January 1, 2018, the Company partially recaptured a modified coinsurance reinsurance agreement originally entered into with ALRe on October 1, 2013. The agreement ceded 100% of all inforce and future funding agreements in both the general and the separate accounts and 80% of all inforce (as of October 1, 2013) and future annuity business which is not covered by the fixed spread treaty. The annuity business was recaptured, and the funding agreements remain ceded to ALRe. The Company subsequently entered into a modified coinsurance agreement with AARe effective January 1, 2018 to cede the same 80% quota share of the inforce and future annuity business, after the impacts of all other reinsurance agreements are applied. The modified coinsurance reserves that were recaptured from ALRe and ceded to AARe were \$34,100.6 million as of January 1, 2018.

## Note 34. Separate Accounts

During 2018, the Company formed Athene Annuity and Life Company Texas Group Annuity Commingled Separate Account, an insulated commingled separate account that will support annuities payable under group fixed annuity contracts issued to various employers, or trusts established by such employers, in respect of an employer's pension plan. The group fixed annuity contracts obligate the Company's general account to make annuity payments if the separate account is not able to do so. The Company's general account contributed \$100.0 million of seed money to the separate account. As of September 30, 2018, this separate account had assets of \$199.6 million.

Note 35. Loss/Claim Adjustment Expenses: NONE
