Note 1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of **Athene Annuity and Life Company** (the Company) have been prepared in conformity with the accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Iowa.

The Insurance Division, Department of Commerce, of the State of Iowa (the Division) recognizes only statutory accounting practices prescribed or permitted by the State of Iowa for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Iowa Insurance Law. The NAIC's Accounting Practices & Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Iowa. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

Among the products issued by the Company are indexed universal life insurance and indexed annuities. These products allow a portion of the premium to earn interest based on certain indices, primarily the Standard & Poor's 500 Composite Stock Price Index. Call options, futures, variance swaps and total return swaps are purchased to hedge the growth in interest credited to the customer as a direct result of increases in the related indices. In 2006, the Commissioner of the Division issued Bulletin 06-01, Accounting for Derivative Instruments Used to Hedge the Growth in Interest Credited for Index Products, which prescribes that an insurer may elect to recognize changes in the fair value of derivative instruments purchased to hedge indexed products in the statement of operations. The Company has elected to apply Bulletin 06-01 to its futures, variance swaps and total return swaps, which resulted in an increase of \$0.2 million and a decrease of \$1.5 million to the Company's net income for the six months ended June 30, 2019 and for the year ended December 31, 2018, respectively. Application of Bulletin 06-01 does not impact the Company's statutory surplus amounts.

In 2009, the Commissioner of the Division promulgated lowa Administrative Code (IAC) Section 191-97, Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve, which prescribes that an insurer may elect (i) to use an amortized cost method to account for certain derivative instruments, such as call options, purchased to hedge the growth in interest credited to the customer on indexed insurance products and (ii) to utilize an indexed annuity reserve calculation methodology under which call options associated with the current index interest crediting term are valued at zero. The Company has elected to apply IAC Section 191-97 to its over the counter (OTC) call options and reserve liabilities. As a result, the Company's net income increased by \$168.7 million and decreased by \$182.3 million for the six months ended June 30, 2019 and for the year ended December 31, 2018, respectively, and the Company's statutory surplus decreased by \$43.1 million and increased by \$38.7 million as of June 30, 2019 and December 31, 2018, respectively.

The NAIC requires annuities issued by life insurance companies on or after January 1, 2015, to use the 2012 Individual Annuity Reserving (IAR) Mortality Table. In 2015, the Division promulgated IAC Section 43.3(5), which set an elective alternative effective date of January 1, 2016 for adoption of the 2012 IAR Mortality Table. The Company chose to use the Annuity 2000 Mortality Table for all annuities issued in 2015, which resulted in an increase of \$1.0 million and \$0.6 million to the Company's net income for the six months ended June 30, 2019 and for the year ended December 31, 2018, respectively. The Company's statutory surplus increased by \$4.3 million and \$3.3 million as of June 30, 2019 and December 31, 2018, respectively.

A reconciliation of the Company's net income and statutory surplus between practices prescribed or permitted by the State of Iowa and NAIC SAP is shown below:

- B. Use of Estimates in the Preparation of the Financial Statements: No Change
- C. Accounting Policy
 - (1) No Change
 - (2) Bonds, other than loan-backed and structured securities, are stated at amortized cost or fair value based on their rating by the NAIC. Bonds held at amortized cost are amortized or accreted using the scientific interest method on a yield-to-worst basis.
 - (3) (5) No Change
 - (6) Loan-backed and structured securities are stated at amortized cost or fair market value based on their rating by the NAIC. Changes to estimated cash flows on the securities are accounted for retrospectively for securities that are highly rated at the time of purchase and in which the security cannot be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. The prospective method is used for those securities where an other than temporary impairment has been taken, the security is not highly rated at the time of purchase, securities where receipt of all contractual principal cash flows is not expected, or those securities that can be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. Loan-backed and structured securities stated at amortized cost are amortized or accreted using the scientific interest method.
 - (7) (13) No Change

D. Going Concern

Management's assessment of the relevant conditions through August 12, 2019 do not give rise to substantial doubt of the Company's ability to continue as a going concern.

Note 2. Accounting Changes and Corrections of Errors

During the current year's financial statement preparation, the Company discovered errors within prior period Annual Statements relating to reserves. After consideration of materiality and in accordance with SSAP No. 3, *Accounting Changes and Correction of Errors*, the corrections were recorded directly to surplus. The impact of the correction of reserves decreased surplus by \$3.2 million in 2019 and represented less than 1% of ending capital and surplus as of both June 30, 2019 and December 31, 2018.

Note 3. Business Combinations and Goodwill: No Change

Note 4. Discontinued Operations: NONE

Note 5. Investments

A - C. No Change

- D. Loan-Backed Securities
 - (1) Prepayment assumptions for loan-backed bonds and structured securities were obtained from broker dealer survey values or internal estimates
 - (2) No other-than-temporary impairment was recognized on loan-backed securities due to the intent to sell or inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis.
 - (3) Other-than-temporary impairment was recognized on the following loan-backed securities due to the present value of the cash flows expected to be collected being less than the amortized cost basis:

1	2	3	4	5	6	7
	Book/Adjusted					Date of

(4) The following table shows the gross unrealized losses and fair values of loan-backed securities, which have not been impaired to fair value, aggregated by length of time that individual securities have been in a continuous unrealized loss position as of June 30, 2019.

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	
2. 12 Months or Longer	50,443,562
b. The aggregate related fair value of securities with unrealized losses:	
1. Less than 12 Months	
2 12 Months or Longer	1 261 752 328

(5) A full analysis of all relevant qualitative considerations was completed in reaching the conclusion that the impairments were not other-than-temporary, including the intent and ability to hold the investment for a period of time sufficient to allow for a recovery in value. Specific events that may influence the operations of the issuer and impaired earnings potential are reviewed in addition to length of time and extent to which the fair value has been less than cost.

 - H. There were no derivative contracts with premium cost.

Note. 9. Income Taxes: No Change

Note 10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

Some employees of Athene Employee Services LLC participate in one or more Share Award Agreements (the Agreements) sponsored by Athene Holding, Ltd. (AHL), an indirect parent of the Company, for which the Company has no legal obligation. Salary expense of Athene Employee Services LLC is partially allocated to the Company through the Shared Services Agreement. Under SSAP No. 104R, Share-Based Payments, the stock compensation expense associated with the Agreements that would have been allocated to the Company is required to be recorded as a capital contribution to the reporting entity. The Company has allocated the stock compensation expense associated with the Agreements based on the same methodology as the Shared Services Agreement. In accordance with SSAP No. 104R, the Company incurred expense and recorded a capital contribution under the Agreements totaling \$5.0 million and \$9.1 million for the six months ended June 30, 2019 and for the year ended December 31, 2018, respectively, which includes amounts contributed by the Company to downstream insurance subsidiaries.

During July 2018, the Company received a \$15.0 million capital contribution from its direct parent, Athene Annuity & Life Assurance Company (AADE), and the Company made a \$15.0 million capital contribution to its wholly-owned subsidiary, Athene Annuity & Life Assurance Company of New York (AANY).

Note 11. Debt

- A. No Change
- B. Federal Home Loan Bank (FHLB) Agreements
 - (1) The Company is a member of the FHLB of Des Moines. Through its membership, the Company is eligible to borrow under variable rate short-term federal fund arrangements to provide additional liquidity. During 2018, the Company borrowed \$183.0 million from the FHLB through their variable rate short-term federal funds program, which was accounted for as borrowed money under SSAP No. 15, *Debt and Holding Company Obligations*. The borrowing matured on August 24, 2018 and carried an interest rate of 2.16%, with interest due at maturity. The Company incurred interest expense on the short-term borrowing of \$1.3 million for the year ended December 31, 2018. There were no borrowings outstanding under the short-term federal funds borrowing arrangement as of June 30, 2019.

The Company has issued funding agreements to the FHLB of Des Moines in exchange for cash resulting in a liability of \$914.3 million as of June 30, 2019. The Company uses these funds in an investment spread strategy, consistent with its other investment spread operations. As such, the Company applies SSAP No. 52, *Deposit-Type Contracts*, accounting treatment to these funds, consistent with its other deposit-type contracts. It is not part of the Company's strategy to utilize these funds for operations, and any funds obtained from the FHLB of Des Moines for use in general operations would be accounted for consistent with SSAP No. 15 as borrowed money.

The Company must provide appropriate collateral to borrow under the arrangements described above. The borrowing capacity available to the Company under these agreements is largely a factor of the Company's ability to post eligible collateral, as well as internal limits such as single-holder exposure limits (10% of the entity's balance sheet liabilities) and NAIC capital requirements.

The tables below indicate the amount of FHLB of Des Moines stock purchased, collateral pledged, assets and liabilities related to the agreements with FHLB of Des Moines.

Note 12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

The Company had deferred compensation plans for agents which were not funded by the Company. The liability for these plans was included on Page 3, Line 21. These plans were frozen as of December 31, 2016. During 2019, the Company paid out the \$42.8 million liability.

Note 13. Capital and Surplus, Shareholders' Dividend Restrictions and Quasi-Reorganizations

During June 2019, the Company distributed 100% of its membership interests in Athene Securities, LLC to its direct parent, AADE, through a dividend of \$0.4 million.

Note 14. Liabilities, Contingencies and Assessments

A – E. No Change

F. All Other Contingencies

The Company and certain of its insurance subsidiaries have experienced increased service and administration complaints related to the conversion and administration of the block of life insurance business acquired in connection with Athene Holding Ltd.'s acquisition of Aviva USA Corporation and reinsured to affiliates of Global Atlantic Financial Group Ltd. The life insurance policies included in this block have been and are currently being administered by AllianceOne, a subsidiary of DXC Technology Company, which was retained by such Global Atlantic affiliates to provide services on such policies. AllianceOne also administers certain annuity policies that were on Aviva USA Corporation's legacy policy administration systems that were also converted in connection with the acquisition of Aviva USA Corporation and have experienced similar service and administration issues.

As a result of the difficulties experienced with respect to the administration of such policies, Athene received notifications from several state regulators, including but not limited to the New York Department of Financial Services (NYDFS), the California Department of Insurance (CDI) and the Texas Department of Insurance, indicating, in each case, that the respective regulator planned to undertake a market conduct examination or enforcement proceeding of the Company or one of its subsidiaries, as applicable, relating to the treatment of policyholders subject to Athene reinsurance agreements with affiliates of Global Atlantic and the conversion of such annuity policies, including the administration of such blocks by AllianceOne. On June 28, 2018, Athene Life Insurance Company of New York (ALICNY) entered into a consent order with the NYDFS resolving that matter in a manner that ultimately did not have a material impact on its financial condition, when considering AHL's indemnification from affiliates of Global Atlantic, which was passed to ALICNY in the form of a capital contribution in the third quarter of 2018. Global Atlantic is currently in negotiation with the CDI to resolve the pending action related to the converted life insurance policies. The Company does not expect any settlement to be material to its financial condition.

In addition to the foregoing, the Company has received inquiries, and expects to continue to receive inquiries, from other regulatory authorities regarding the conversion matter. In addition to the examinations and proceedings initiated to date, it is possible that other regulators may pursue similar formal examinations, inquiries or enforcement proceedings and that any examinations, inquiries and/or enforcement proceedings may result in fines, administrative penalties and payments to policyholders. The Company is not currently able to estimate the amount of any such fines, penalties or payments arising from these matters with reasonable certainty, but it is possible that such amounts may be material.

Pursuant to the terms of the reinsurance agreements between Athene and the relevant affiliates of Global Atlantic, the applicable affiliates of Global Atlantic have financial responsibility for the ceded life block and are subject to significant administrative service requirements, including compliance with applicable law. The agreements also provide for indemnification to Athene, including for administration issues.

On January 23, 2019, the Company received a letter from the NYDFS, with respect to a recent Pension Risk Transfer (PRT) transaction, which expressed concerns with the Company's interpretation and reliance upon certain exemptions from licensing in New York in connection with certain activities performed by employees in the PRT channel, including specific activities performed within New York. The Company is currently in discussions with the NYDFS to resolve its concerns. It is reasonably possible that losses experienced as a result of settling this matter may exceed the amount accrued with respect to this matter as of June 30, 2019. Currently, the Company is unable to reasonably estimate the amount of such excess, if any.

In 2000 and 2001, two insurance companies which were subsequently merged into the Company purchased from American General Life Insurance Company (American General) broad based variable corporate-owned life insurance (COLI) policies that, as of June 30, 2019, had an asset value of \$377.6 million. In January 2012, the COLI policy administrator delivered to the Company a supplement to the existing COLI policies and advised that American General and ZC Resource Investment Trust (ZC Trust) had unilaterally implemented changes set forth in the supplement that if effective, would: (1) potentially negatively impact the crediting rate for the policies and (2) change the exit and surrender protocols set forth in the policies. In March 2013, the Company filed suit against American General, ZC Trust, and ZC Resource LLC in Chancery Court in Delaware, seeking, among other relief, a declaration that the changes set forth in the supplement were ineffectual and in breach of the parties' agreement. The parties filed cross motions for judgment as a matter of law, and the court granted defendants' motion and dismissed without prejudice on ripeness grounds. The issue that negatively impacts the crediting rate for one of the COLI policies has subsequently been triggered and on April 3, 2018, the Company filed its suit against the same defendants in Chancery Court in Delaware seeking substantially similar relief, which defendants have moved to dismiss and the Company has opposed. The Court heard oral arguments on February 13, 2019 and has taken the matter under advisement. The Court issued an Opinion on July 31, 2019, that did not address the merits, but found that Chancery Court did not have jurisdiction over the Company's claims and directed the Company to either amend its Complaint or transfer the matter to Delaware Superior Court. The Company is evaluating next steps. If the supplement is ultimately deemed to be effective, the purported changes to the policies could impair the Company's ability to access the value of guarantees

Following the Fifth Circuit Court of Appeals' June 21, 2018 vacatur of the Department of Labor Fiduciary Rule, federal and state regulators have increased focus on updating the processes and requirements tied to the sale of insurance and annuity products. The U.S. Securities and Exchange Commission (SEC), NAIC, and several states have taken action or are exploring options that may impact the Company and its subsidiaries.

On June 5, 2019, the SEC adopted a rulemaking package designed to enhance the quality and transparency of retail investors' relationships with investment advisers and broker-dealers. The rule package is effective on September 10, 2019 with a compliance date of June 30, 2020. The rulemaking package included: Regulation Best Interest - the Broker-Dealer Standard of Conduct; the new Form CRS Relationship Summary; and two separate interpretations under the Investment Advisers Act of 1940. The Company, along with the industry, is evaluating the regulation, which may affect the distribution of products by the Company and its subsidiaries.

On July 17, 2018, the NYDFS issued a regulation, Suitability and Best Interests in Life Insurance and Annuity Transactions, adopting a "best interest" standard for those licensed to sell life insurance and annuity products in New York. The regulation became effective on annuity transactions on August 1, 2019 and the Company's subsidiary, AANY, has taken appropriate actions to comply with the regulation's requirements. The regulation becomes effective on life insurance transactions on February 1, 2020. The NAIC has indicated it will issue an updated version of the Suitability in Annuity Transactions Model Regulation to include concepts of best interest in 2019, that if adopted, may affect the distribution of products by the Company and its subsidiaries. If the NAIC's rules do not align with the NYDFS rule or SEC rules, the distribution of products by the Company and its subsidiaries could be further complicated.

In addition to the cases previously discussed, the Company is routinely involved in litigation and other proceedings, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. At present, no contingencies related to pending litigation and regulatory matters are considered material in relation to the financial position of the Company.

- (3) Transfers between fair value hierarchy levels are recognized at the end of the period in which the transfer occurs
- The following discussion describes the valuation methodologies and inputs used for assets and liabilities measured and disclosed at fair value. The techniques utilized in estimating the fair values of financial instruments are reliant on the assumptions used.

Fair value estimates are based on quoted market prices when available. When quoted market prices are not available, the Company utilizes commercially available pricing vendors that utilize observable market inputs, like recent trading activity, to derive fair value. When vendor prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates the fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect risk inherent in a particular methodology, model or input employed.

The Company's financial assets and liabilities carried at estimated fair value have been classified, for disclosure purposes, based on a hierarchy defined by current accounting guidance. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

The levels of the fair value hierarchy are as follows:

Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability.

- Level 2 inputs include the following:

 1. Quoted prices for similar assets or liabilities in active markets,
- 2. Observable inputs other than quoted market prices, and
- 3. Observable inputs derived principally from market data through correlation or other means.

Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

Assets and liabilities are valued as discussed below in part C.

Other Fair Value Disclosures: NONE

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety

	Aggregate					Net Asset	Not Practicable

type contracts	952,725	974,422			952,725		

Bonds and short-term investments – The Company obtains the fair value for most marketable, public bonds without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. If the Company cannot value a public bond with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3. The Company values privately placed bonds based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer. In some instances, the Company uses a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. Privately placed fixed maturity securities are classified as Level 2 or 3.

Preferred stocks and common stocks unaffiliated – The Company values equity securities, typically private equities or equity securities not traded on an exchange, using several commercial pricing services or an internal model. The securities priced by a commercial pricing service are classified as Level 2 and the securities priced by an internal model are classified as Level 3. In addition, unaffiliated common stocks include FHLB stock, which is carried at fair value, which is presumed to be par because it can only be redeemed by the bank and is classified as Level 2.

Mortgage loans – The Company estimates mortgage loans on a monthly basis using discounted cash flow analysis and rates being offered for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. The discounted cash flow model uses unobservable inputs, including estimates of discount rates and loan prepayments. Mortgage loans are classified as Level 3.

Policy loans – The fair value of policy loans classified as Level 2 is equal to the carrying value of the loans, which are collateralized by the cash surrender value of the associated insurance contracts.

Derivatives – Derivative contracts can be exchange traded or over-the-counter. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, measures of volatility, prepayment rates, and correlation of the inputs. The Company considers and incorporates counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. The Company also evaluates and includes its own nonperformance risk in valuing derivatives. The majority of the Company's derivatives trade are in liquid markets; therefore, the Company can verify model inputs and model selection does not involve significant management judgment and are classified within Level 2. If the Company cannot verify model inputs and model selection does involve significant management judgment, the derivatives are classified as Level 3.

Other invested assets – Within other invested assets, partnerships are valued based on net asset value information provided by the general partner or related asset manager. These partnership interests usually include multiple underlying investments for which either observable market prices or other valuation methods are used to determine the fair value. These investments are reported in the Net Asset Value (NAV) column. Other than partnerships, other invested assets may include surplus notes and other investments with bond or stock characteristics and the Company attempts to value these using several commercial pricing services, which would be classified as Level 2 assets. If the Company cannot value with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3 assets.

Separate account assets (variable products) – Separate account assets classified as Level 2 are valued based on the fair value of the underlying funds. Fair values and changes in the fair values of the underlying funds accrue directly to the policy owners and are not included in the Company's revenues and expenses or surplus.

Separate account assets (group annuity) – Financial instruments within this separate account classified as Level 2 and 3 or included in the NAV column are valued using the same fair value assumptions and methods utilized in the general account.

Deposit-type contracts (including separate account group annuity) – Deposit-type contracts classified as Level 3 include single premium immediate annuities (SPIA) and supplemental contracts. Fair value of SPIA and supplemental contracts are calculated by discounting best estimate cash flows based on mortality and market interest rate assumptions.

- D. Not Practicable to Estimate Fair Value: NONE
- E. Net Asset Value

The Company invests in certain non-fixed income, alternative investments in the form of limited partnerships (investment funds) which are reported at NAV. Adjustments to the carrying amount reflect the Company's pro rata ownership percentage of the operating results as indicated by NAV in the investment fund financial statements. The NAV from the investment fund financial statements can be on a lag of up to three months when investee information is not received in a timely manner. These investments are listed in the NAV column of the fair value tables above as this is the primary method for reporting fair value for these investments.

As of June 30, 2019, the Company has \$823.3 million unfunded commitments to invest in these investment funds.

Note 21. Other Items: No Change

Note 22. Events Subsequent

Subsequent events have been considered through August 12, 2019 for the statutory statement dated June 30, 2019. There have been no Type I events subsequent to the close of the books and accounts for this statement that have a material effect on the financial condition of the Company.

Type II events subsequent consisted of the following:

Subsequent to June 30, 2019, the Company entered into a Capital Maintenance Agreement to provide capital support to its wholly-owned subsidiary, AANY, such that the Company has agreed to maintain AANY's total adjusted capital in an amount at least equal to 300% of AANY's company action level risk based capital. Given the current capital level of AANY, the likelihood of payment by the Company under the terms of this agreement is remote.

Note 23. Reinsurance

Effective April 1, 2019, the Company entered into a modified coinsurance agreement with Athene Annuity Re Ltd. to cede 80% of certain pension risk transfer business issued on or after the effective date of the treaty. The agreement is on a modified coinsurance basis, under which the Company retains the reserves and supporting assets relating to this business. These reserves and assets are held in one or more separate accounts and the reinsurance is recorded in the corresponding separate account. Modified coinsurance reserves for this agreement were \$592.6 million as of June 30, 2019.

On March 6, 2019, Scottish Re (U.S.), Inc. (Scottish Re), a reinsurer of the Company, was ordered into receivership for purposes of rehabilitation by the Court of Chancery of the State of Delaware. On May 16, 2019, the Iowa Insurance Division suspended Scottish Re's license to do business in Iowa. Since Scottish Re has gone into receivership, the Company has not received any financial information on Scottish Re to assess the impacts on recoverability of the reinsurance. On July 26, 2019, the Iowa Insurance Division confirmed that Iowa companies in a reinsurance relationship with Scottish Re were permitted to continue to take reserve credit on business reinsured to Scottish Re.

Note 34. Separate Accounts

During 2019, the Company formed Athene Annuity and Life Company WY Group Annuity Dedicated Separate Account, an insulated dedicated separate account that will support annuities payable under group fixed annuity contracts issued to an employer, in respect of the employer's pension plan. The group fixed annuity contracts obligate the Company's general account to make annuity payments if the separate account is not able to do so. As of June 30, 2019, this separate account had assets of \$1.5 billion.

Note 35. Loss/Claim Adjustment Expenses: NONE
