1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of **Athene Annuity & Life Assurance Company** (the Company) have been prepared in conformity with the accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Delaware.

The Department of Insurance of the State of Delaware (the Department) recognizes only statutory accounting practices prescribed or permitted by the State of Delaware for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Delaware Insurance Law. The NAIC's Accounting Practices & Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Delaware. The Department has the right to permit other specific practices that deviate from prescribed practices.

Effective December 31, 2014, the Company received a permitted practice to use the standard scenario to determine the reserve on its variable annuity policies and thus did not calculate the stochastic scenario reserve as required under Actuarial Guideline 43. The Company does not believe this difference in valuation method has any impact on the calculated reserves. Therefore, the Company's net income and statutory surplus are not affected as a result of this permitted practice.

A reconciliation of the Company's net income and statutory surplus between practices prescribed by the State of Delaware and NAIC SAP is shown below:

	SSAP#	F/S Page	F/S Line #	09/30/2021	12/31/2020
Net Income					
(1) State basis (Page 4, Line 35, Columns 1 & 3)	XXX	XXX	XXX	\$(32,240,465)	\$ 53,887,287

Surplus					
(5) State basis (Page 3, Line 38, Columns 1 & 2)	XXX	XXX	XXX	\$ 1,537,640,525	\$ 1,699,905,341
(6) State prescribed practices that are an increase / (decrease) from NAIC SAP:					
(7) State permitted practices that are an increase / (decrease) from NAIC SAP:					
Standard scenario on variable annuities	51	3	1	–	–
(8) NAIC SAP (5-6-7=8)	XXX	XXX	XXX	\$ 1,537,640,525	\$ 1,699,905,341

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenue and expenses during the period. There are material risks and uncertainties surrounding the spread of the Coronavirus Disease of 2019 (COVID-19), which has resulted in significant volatility in the financial markets. Our estimates may vary as more information about the extent to which COVID-19 and the resulting impact on economic conditions and the financial markets become known. Actual results may differ from the estimates used in preparing the financial statements.

C. Accounting Policy

- (1) Short-term investments No Significant Changes
- (2) Bonds, other than loan-backed and structured securities, are stated at amortized cost or fair value based on their rating by the NAIC. Bonds held at amortized cost are amortized using the scientific interest method on a yield-to-worst basis.
- (3) Common stocks No Significant Changes
- (4) Effective January 1, 2021, the Company adopted the revised guidance in SSAP No. 32R, *Preferred Stock*, which requires perpetual preferred stock to be carried at fair value, not to exceed any currently effective call price. Prior to 2021, perpetual preferred stock with an NAIC designation 1-3 was valued at cost, and perpetual preferred stock with an NAIC designation 4-6 was valued at the lower of cost or fair value. The impact at adoption did not have a material effect on the Company's financial statements.
- (5) Mortgage loans No Significant Changes
- (6) Loan-backed and structured securities are stated at amortized cost or fair market value based on their rating by the NAIC. Changes to estimated cash flows on the securities are accounted for retrospectively for securities that are highly rated at the time of purchase and in which the security cannot be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. The prospective method is used for those securities where an other than temporary impairment has been taken, the security is not highly rated at the time of purchase, securities where receipt of all contractual principal cash flows is not expected, or those securities that can be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. Loan-backed and structured securities stated at amortized cost are amortized or accreted using the scientific interest method.
- (7) Investments in subsidiaries, controlled and affiliated entities No Significant Changes
- (8) Investments in joint ventures, partnerships and limited liability entities No Significant Changes
- (9) Derivatives No Significant Changes
- (10) Investment income as a factor in the premium deficiency calculation No Significant Changes
- (11) Liabilities for losses and loss/claim adjustment expenses No Significant Changes
- (12) Changes in capitalization policy No Significant Changes
- (13) Pharmaceutical rebate receivables No Significant Changes

1. Summary of Significant Accounting Policies and Going Concern (Continued)

D. Going Concern

Management's assessment of the relevant conditions through November 11, 2021 does not give rise to substantial doubt of the Company's ability to continue as a going concern.

- 2. Accounting Changes and Corrections of Errors None
- 3. Business Combinations and Goodwill None

(4) All impaired securities for which an OTTI has not been recognized in earnings as a realized loss

The following table shows the gross unrealized losses and fair values of loan-backed securities, which have not been impaired to fair value, aggregated by length of time that individual securities have been in a continuous unrealized loss position as of September 30, 2021.

- a. The aggregate amount of unrealized losses:

 - 2. 12 months or longer 38,274,882
- b. The aggregate related fair value of securities with unrealized losses:

 - 2. 12 months or longer 787,853,880
- (5) A full analysis of all relevant qualitative considerations was completed in reaching the conclusion that the impairments were not other-than-temporary, including the intent and ability to hold the investment for a period of time sufficient to allow for a recovery in value. Specific events that may influence the operations of the issuer and impaired earnings potential are reviewed in addition to length of time and extent to which the fair value has been less than cost.
- E. Dollar Repurchase Agreements and/or Securities Lending Transactions None
- F. Repurchase Agreements Transactions Accounted for as Secured Borrowing None
- G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing None
- H. Repurchase Agreements Transactions Accounted for as a Sale None

10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

A. On March 8, 2021, Athene Holding Ltd. (AHL), an indirect parent of the Company, entered into an Agreement and Plan of Merger (Merger Agreement), by and among AHL, Apollo Global Management, Inc., a Delaware corporation (AGM), Tango Holdings, Inc., a Delaware corporation and a direct wholly owned subsidiary of AGM (HoldCo), Blue Merger Sub, Ltd., a Bermuda exempted company and a direct wholly owned subsidiary of HoldCo (AHL Merger Sub), and Green Merger Sub, Inc., a Delaware corporation and a direct, wholly owned subsidiary of HoldCo (AGM Merger Sub). AHL and AGM have agreed, subject to the terms and conditions of the Merger Agreement, to effect an all-stock merger transaction to combine the respective businesses by: (1) AGM merging with AGM Merger Sub, with AGM surviving such merger as a direct wholly owned subsidiary of HoldCo (AGM Merger), (2) AHL merging with AHL Merger Sub, with AHL surviving such merger as a direct, wholly owned subsidiary of HoldCo (AHL Merger and, together with the AGM Merger, Mergers), and (3) as of the effective time of the Mergers, changing the name of HoldCo to be Apollo Global Management, Inc. At the effective time of the Mergers, each AHL Class A common share, subject to certain exceptions, will be converted automatically into the right to receive 1.149 shares of HoldCo common stock. The Mergers are expected to close January 2022, subject to shareholder and regulatory approvals, and other customary closing conditions.

Some employees of Athene Employee Services LLC and Athene Annuity and Life Company (AAIA) participate in one or more Share Award Agreements (the Agreements) sponsored by AHL, for which the Company has no legal obligation. Salary expense of Athene Employee Services LLC and AAIA is allocated to the Company through the Shared Services Agreement. Under SSAP No. 104R, Share-Based Payments, the stock compensation expense associated with the Agreements that would have been allocated to the Company is required to be recorded as a capital contribution to the reporting entity. The Company has allocated the stock compensation expense associated with the Agreements based on the same methodology as the Shared Services Agreement. In accordance with SSAP No. 104R, the Company incurred expense and recorded a capital contribution under the Agreements totaling \$15.6 million and \$15.3 million for the nine months ended September 30, 2021 and for the year ended December 31, 2020, respectively, which includes amounts contributed by the Company to downstream insurance subsidiaries.

Pursuant to a tax allocation agreement, during the third quarter of 2021, the Company recorded a \$27.2 million capital contribution and made a \$27.2 million capital contribution to its wholly-owned subsidiary, AAIA, as indemnification related to a tax settlement.

11. Debt

- A. Effective May 1, 2021, the Company entered into an unsecured revolving promissory note (the Promissory Note), with Athene USA (AUSA) and certain of AUSA's other subsidiaries, pursuant to which the Company and other borrower parties thereto may borrow up to \$200 million from AUSA. The Promissory Note has a 5 year term and was approved by the Delaware Department of Insurance. Interest shall accrue on the principal balance from time to time outstanding at a rate per annum equal to 2.085%. The Company shall pay such interest in arrears quarterly on the last day of each March, June, September and December, on any day any portion of the principal balance is repaid or prepaid. No amount was drawn under the Promissory Note by the Company during the nine months ended September 30, 2021, and as such, no interest expense has been incurred by the Company during the nine months ended September 30, 2021.
- B. FHLB (Federal Home Loan Bank) Agreements
 - (1) Through its membership in the FHLB of Indianapolis, the Company's predecessor by merger, Athene Life Insurance Company (ALIC), had issued funding agreements in exchange for cash advances. On August 11, 2016, ALIC provided the FHLB of Indianapolis with notice of its withdrawal of membership. The merger of ALIC effective December 31, 2018 terminated ALIC's membership in the FHLB of Indianapolis. The Company held FHLB Class B Membership Stock which was redeemed on August 12, 2021. There are no remaining funding agreement liabilities with the FHLB of Indianapolis.

During 2019, the Company became a member of the FHLB of Des Moines and is eligible to borrow under variable-rate short-term federal fund arrangements to provide additional liquidity. Total available borrowings are determined by the amount of collateral pledged, but cannot exceed 20% to 40% of the Company's total assets dependent upon the internal credit rating. The Company did not participate in short-term federal funds borrowing during the nine months ended September 30, 2021, and thus did not incur interest expense during the nine months ended September 30, 2021.

Corporate-owned Life Insurance (COLI) Matter - In 2000 and 2001, two insurance companies which were subsequently merged into AAIA, purchased broad based variable COLI policies from American General Life Insurance Company (American General) that, as of September 30, 2021, had an asset value of \$422.9 million, and is included as an admitted asset on AAIA's balance sheets. In January 2012, the COLI policy administrator delivered to AAIA a supplement to the existing COLI policies and advised that American General and ZC Resource Investment Trust (ZC Trust) had unilaterally implemented changes set forth in the supplement that if effective, would: (1) potentially negatively impact the crediting rate for the policies and (2) change the exit and surrender protocols set forth in the policies. In March 2013, AAIA filed suit against American General, ZC Trust, and ZC Resource LLC in Chancery Court in Delaware, seeking, among other relief, a declaration that the changes set forth in the supplement were ineffectual and in breach of the parties' agreement. The parties filed cross motions for judgment as a matter of law, and the court granted defendants' motion and dismissed without prejudice on ripeness grounds. The issue that negatively impacts the crediting rate for one of the COLI policies has subsequently been triggered and on April 3, 2018, we filed suit against the same defendants in Chancery Court in Delaware seeking substantially similar relief. Defendants moved to dismiss and the Court heard oral arguments on February 13, 2019. The Court issued an opinion on July 31, 2019 that did not address the merits, but found that Chancery Court did not have jurisdiction over our claims and directed us to either amend our complaint or transfer the matter to Delaware Superior Court. The matter has been transferred to the Delaware Superior Court. Defendants renewed their motion to dismiss and the Superior Court heard oral arguments on December 18, 2019. The Superior Court issued an opinion on May 18, 2020 in which it granted in p

Regulatory Matters - Certain insurance subsidiaries of the Company have experienced increased complaints related to the conversion and administration of the block of life insurance business acquired in connection with Athene Holding Ltd.'s acquisition of Aviva USA Corporation (Aviva USA) and reinsured to affiliates of Global Atlantic Financial Group Ltd. (Global Atlantic). The life insurance policies included in this block have been and are currently being administered by AllianceOne Inc. (AllianceOne), a subsidiary of DXC Technology Company, which was retained by such Global Atlantic affiliates to provide third party administration services on such policies. AllianceOne also administers a small block of annuity policies that were on Aviva USA's legacy policy administration systems that were also converted in connection with the acquisition of Aviva USA and have experienced similar service and administration issues, but to a lesser degree.

As a result of the difficulties experienced with respect to the administration of such policies, certain insurance subsidiaries of the Company have received notifications from several state regulators, including but not limited to the New York Department of Financial Services (NYDFS), the California Department of Insurance (CDI) and the Texas Department of Insurance (TDI), indicating, in each case, that the respective regulator planned to undertake a market conduct examination or enforcement proceeding of one of the Company's subsidiaries, as applicable, relating to the treatment of policyholders subject to the reinsurance agreements with affiliates of Global Atlantic and the conversion of such life and annuity policies, including the administration of such blocks by AllianceOne. The Company's subsidiaries have entered into consent orders with the regulators of several states, including the NYDFS, CDI and the TDI to resolve the underlying matters in the respective states. All fines and costs, including those associated with remediation plans, paid in connection with the consent orders were subject to indemnification by Global Atlantic or affiliates of Global Atlantic.

In addition to the examinations and proceedings initiated to date, it is possible that other regulators may pursue similar formal examinations, inquiries or enforcement proceedings and that any examinations, inquiries and/or enforcement proceedings may result in fines, administrative penalties and payments to policyholders. The Company is not currently able to estimate the amount of any such fines, penalties or payments arising from these matters with reasonable certainty, but it is possible that such amounts may be material.

Pursuant to the terms of the reinsurance agreements between the Company's subsidiaries and the relevant affiliates of Global Atlantic, the applicable affiliates of Global Atlantic have financial responsibility for the ceded life block and are subject to significant administrative service requirements, including compliance with applicable law. The agreements also provide for indemnification to Athene, including for administration issues.

Fiduciary or Best Interest Standards - The U.S. Securities and Exchange Commission (SEC), Department of Labor (DOL), NAIC, and several states have taken action or are exploring options around a fiduciary standard or best interest standard that may impact the Company and its subsidiaries. If these rules do not align, the distribution of products by the Company and its subsidiaries could be further complicated.

In 2019 the SEC adopted a rulemaking package designed to enhance the quality and transparency of retail investors' relationships with investment advisers and broker-dealers. The rulemaking package included: Regulation Best Interest - the Broker-Dealer Standard of Conduct; the new Form CRS Relationship Summary; and two separate interpretations under the Investment Advisers Act of 1940. The Company believes the Regulation may impact the distribution of its subsidiaries' products through third party broker-dealers that distribute the products to retail customers, the impact of which is still being determined.

The NAIC has adopted the Suitability in Annuity Transactions Model Regulation (SAT), which places responsibilities upon issuing insurance companies with respect to the suitability of annuity sales, including responsibilities for training agents. On February 13, 2020, the SAT was amended to incorporate a "best interest" or similar standard with respect to the suitability of annuity sales. The amendments include a requirement for producers to act in the "best interest" of a retail customer when making a recommendation of an annuity. A producer is considered to have acted in the best interest of the customer if they have satisfied certain prescribed obligations regarding care, disclosure, conflict of interest and documentation. State adoption of these revisions, and any future changes in such laws and regulations, could adversely affect the way our US insurance subsidiaries market and sell their annuity products. Several states, including lowa, have adopted or are in the process of adopting a version of the revised SAT that includes a best interest concept. The NYDFS issued a circular letter emphasizing insurers' obligations under laws and regulations based on SAT when replacing a deferred annuity contract with an immediate annuity contract. On July 22, 2018, the NYDFS issued amendments to its regulation based on SAT to incorporate a "best interest" standard with respect to the suitability of life insurance and annuity sales. Future changes in such laws and regulations, including those that impose a "best interest" standard could adversely impact the way we market and sell our annuity products.

14. Liabilities, Contingencies and Assessments (Continued)

In April 2016, the DOL issued regulations expanding the definition of "investment advice" and broadening the circumstances under which distributors and manufacturers of insurance and annuity products could be considered "fiduciaries" and subject to certain standards in providing advice. These regulations were vacated effective June 2018. Thereafter, the DOL issued proposed regulatory action to address the vacated definition and issued final regulatory action on December 15, 2020. The DOL's final guidance confirms the reinstatement of the definition of "investment advice" that applied prior to 2016 but broadens the circumstances under which producers, including insurance producers, could be considered fiduciaries under ERISA in connection with recommendations to "rollover" assets from a qualified retirement plan to an IRA. This guidance reverses an earlier DOL interpretation suggesting that rollover advice did not constitute investment advice giving rise to a fiduciary relationship. In connection with the final regulatory action, the DOL issued a prohibited transaction class exemption that would allow fiduciaries to receive compensation in connection with providing investment advice, including advice about rollovers, that would otherwise be prohibited as a result of their fiduciary relationship to the ERISA Plan. The DOL has indicated they intend to issue further guidance or regulations with regards to these types of annuity sales by the end of 2021. We continue to monitor the situation and will be reviewing whatever is issued to determine how it might apply to and impact our business.

In addition to the cases previously discussed, the Company is routinely involved in litigation and other proceedings, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. At present, no other contingencies related to pending litigation and regulatory matters are considered material in relation to the financial position of the Company.

There were no transfers into or out of Level 3 of the fair value hierarchy during this quarter.

- (3) Transfers between fair value hierarchy levels are recognized at the end of the period in which the transfer occurs.
- (4) The following discussion describes the valuation methodologies and inputs used for assets and liabilities measured and disclosed at fair value. The techniques utilized in estimating the fair values of financial instruments are reliant on the assumptions used.

20. Fair Value Measurements (Continued)

Fair value estimates are based on quoted market prices when available. When quoted market prices are not available, the Company utilizes commercially available pricing vendors that utilize observable market inputs, like recent trading activity, to derive fair value. When vendor prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates the fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect risk inherent in a particular methodology, model or input employed.

The Company's financial assets and liabilities carried at estimated fair value have been classified, for disclosure purposes, based on a hierarchy defined by current accounting guidance. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

The levels of the fair value hierarchy are as follows:

- Level 1 Unadjusted quoted prices for identical assets or liabilities in an active market.
- · Level 2 Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability.

- Level 2 inputs include the following: 1. Quoted prices for similar assets or liabilities in active markets,
- 2. Observable inputs other than quoted market prices, and
- 3. Observable inputs derived principally from market data through correlation or other means.
- Level 3 Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

Asset and liabilities are valued as discussed below in part C.

- (5) See parts (1) through (4) above.
- Other Fair Value Disclosures None
- Fair Values for All Financial Instruments by Level 1, 2 and 3

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	Level 1	Level 2	Level 3		Not Practicable (Carrying Value)

Assets - Separate account: variable products	17,107,912	17,107,912		17,107,912			
Liabilities - Deposit-type contracts							
Liabilities - Derivative liabilities	15,107,951	51,612,813		15,107,951			
Liabilities - Derivative and other collateral	193.936.000	193.936.000	193.936.000				

Bonds and short-term investments - The Company obtains the fair value for most marketable, public bonds without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. If the Company cannot value a public bond with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and is considered to be Level 3. The Company values privately placed bonds based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer. In some instances, the Company uses a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. Privately placed fixed maturity securities are classified as Level 2 or 3.

Preferred stocks and common stocks unaffiliated - The Company values equity securities, typically private equities or equity securities not traded on an exchange, using several commercial pricing services or an internal model. The securities priced by a commercial pricing service are classified as Level 2 and the securities priced by an internal model are classified as Level 3. In addition, unaffiliated common stocks include FHLB stock, which is carried at fair value, which is presumed to be par because it can only be redeemed by the bank and is classified as Level

Mortgage loans - The Company estimates mortgage loans on a monthly basis using discounted cash flow analysis and rates being offered for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. The discounted cash flow model uses unobservable inputs, including estimates of discount rates and loan prepayments. Mortgage loans are classified as Level 3.

Policy loans - The fair value of policy loans classified as Level 2 is equal to the carrying value of the loans, which are collateralized by the cash surrender value of the associated insurance contracts.

20. Fair Value Measurements (Continued)

Derivatives – Derivative contracts can be exchange traded or over-the-counter. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates, and correlation of the inputs. The Company considers and incorporates counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. The Company also evaluates and includes its own nonperformance risk in valuing derivatives. The majority of the Company's derivatives trade are in liquid markets; therefore, the Company can verify model inputs and model selection does not involve significant management judgment and are classified within Level 2. If the Company cannot verify model inputs and model selection does involve significant management judgment, the derivatives are classified as Level 3.

Other invested assets – Within other invested assets, partnerships are valued based on net asset value information provided by the general partner or related asset manager. These partnership interests usually include multiple underlying investments for which either observable market prices or other valuation methods are used to determine the fair value. These investments are reported in the Net Asset Value (NAV) column. Other than partnerships, other invested assets may include surplus notes and other investments with bond or stock characteristics and the Company attempts to value these using commercial pricing services, which would be classified as Level 2 assets. If the Company cannot value with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3 assets.

Separate account assets (variable products) – Separate account assets classified as Level 2 are valued based on the fair value of the underlying funds. Fair values and changes in the fair values of separate account assets accrue directly to the policyowners and are not included in the Company's revenues and expenses or surplus.

Deposit-type contracts – Deposit-type contracts are classified as Level 3 include single premium immediate annuities (SPIA), supplemental contracts, and group pension contracts. Fair value of SPIA, supplemental contracts, and group pension are calculated by discounting best estimate cash flows based on mortality and market interest rate assumptions.

- D. Not Practicable to Estimate Fair Value None
- E. Nature and Risk of Investments Reported at NAV

The Company invests in certain non-fixed income, alternative investments in the form of limited partnerships (investment funds) which are reported at net asset value (NAV). Adjustments to the carrying amount reflect the Company's pro rata ownership percentage of the operating results as indicated by NAV in the investment fund financial statements. The NAV from the investment fund financial statements can be on a lag of up to three months when investee information is not received in a timely manner. These investments are listed in the NAV column of the fair value tables above as this is the primary method for reporting fair value for these investments.

As of September 30, 2021, the Company has \$625.1 million unfunded commitments to invest in these investment funds.

21. Other Items - No Significant Changes

22. Events Subsequent

Subsequent events have been considered through November 11, 2021 for the statutory statement dated September 30, 2021.

During October 2021, the Company borrowed \$80 million with an interest rate of 0.32% and a one-month term under the FHLB short-term arrangement. The Company also issued \$370 million of FHLB funding agreements during October 2021.

The Company did not write any accident and health insurance premium that is subject to Section 9010 of the federal Affordable Care Act.

23. Reinsurance - No Significant Changes

24. Retrospectively Rated Contracts & Contracts Subject to Redetermination

- A. Method Used to Estimate Not Applicable
- B. Method Used to Record Not Applicable
- C. Amount and Percent of Net Retrospective Premiums Not Applicable
- D. Medical Loss Ratio Rebates Required Pursuant to the Public Health Service Act Not Applicable
- E. Risk-Sharing Provisions of the Affordable Care Act (ACA)
 - (1) Accident and health insurance premium subject to the Affordable Care Act risk-sharing provisions

Did the reporting entity write accident and health insurance premium which is subject to the Affordable Care Act risk sharing provisions? No

- (2) Impact of Risk-Sharing Provisions of the Affordable Care Act on admitted assets, liabilities and revenue for the current year Not Applicable
- (3) Roll-forward of prior year ACA risk-sharing provisions for the following asset (gross of any nonadmission) and liability balances, along with the reasons for adjustments to prior year balance Not Applicable
- (4) Roll-forward of risk corridors asset and liability balances by program benefit year Not Applicable
- (5) ACA risk corridors receivable as of reporting date Not Applicable
- 25. Change in Incurred Losses and Loss Adjustment Expenses None
- 26. Intercompany Pooling Arrangements None
- 27. Structured Settlements None
- 28. Health Care Receivables None
- 29. Participating Policies No Significant Changes
- 30. Premium Deficiency Reserves None
- 31. Reserves for Life Contracts and Annuity Contracts No Significant Changes
- 32. Analysis of Annuity Actuarial Reserves and Deposit Type Contract Liabilities by Withdrawal Characteristics No Significant Changes

- 33. Analysis of Life Actuarial Reserves by Withdrawal Characteristics No Significant Changes
- 34. Premiums and Annuity Considerations Deferred and Uncollected None
- 35. Separate Accounts No Significant Changes
- 36. Loss/Claim Adjustment Expenses None
