Ondas Holdings' American Robotics Receives New FAA Exemption Approving the Company's Fully-Automated Drone System for Unlimited Commercial Operations

Through the Exemption, Ondas Holdings' American Robotics now has the regulatory approval to go beyond R&D deployments to full-scale commercial deployments

WALTHAM, MA / ACCESSWIRE / August 31, 2022 /[Ondas Holdings Inc.](#)

(NASDAQ:ONDS) ("Ondas" or the "Company"), a leading provider of private wireless data, drone, and automated data solutions through its wholly owned subsidiaries, Ondas Networks Inc. and American Robotics, Inc. ("American Robotics" or "AR"), announced today that the Federal Aviation Administration (FAA) has issued [American Robotics](#) a new exemption (the "Exemption"), removing the Conditions and Limitations set on its previous exemption, which had restricted operations to "research and development, crew training, and market surveys." The new Exemption, along with American Robotics' [Waiver](#) for fully-automated beyond-visual-line-of-sight (BVLOS) operations, provides the company with the authority to operate its autonomous Scout System drone commercially without limitations on use.

"This new Exemption from the FAA is the fourth milestone approval for American Robotics in less than two years, signaling a clear trajectory towards increased implementation of nationwide autonomous commercial drone operations," said American Robotics co-founder and CEO Reese Mozer. "I am proud of the years of dedication and hard work that our team, partners, and regulators have put forth. Wide-scale adoption of autonomous drone technology represents a generational shift in how critical industries monitor, map, and

inspect assets, unlocking new efficiencies, increasing safety, and reducing environmental impact."

Following positive results in research and development, crew training, and market surveys, the FAA issued the Exemption to American Robotics, enabling unlimited commercial operations. This Exemption and the accompanying Waiver gives American Robotics and the larger commercial drone industry clear evidence that the company is able to provide a scalable commercial service that will support customers' long-term vision of deploying autonomous fleets of drones. Since its original FAA approval was granted in January 2021, American Robotics has continued to work closely with the FAA to demonstrate the safety of its advanced technology, putting American Robotics in position to lead the way to scalable commercial autonomous drone operations across the United States.

The Exemption and approval was officially granted on August 19, 2022. As American Robotics continues to propel autonomous drone operations to serve commercial industries, including oil and gas, rail, and stockpiles and mining, its continued collaboration with the FAA will be critical in realizing the vision of nationwide fully-automated commercial drone operations.

As a result of the company's leadership position, American Robotics' CEO was recently invited to participate in the [White House Summit on Advanced Air Mobility](#), which gathered stakeholders and experts from the industry for an important conversation on the future of Advanced Air Mobility and how it will benefit the American people and help the nation reach domestic policy, national security, climate, and economic goals. To learn more about American Robotics, its Scout System drone, and continued work with the FAA, click [here](#).

About Ondas Holdings Inc.

Ondas Holdings Inc. ("Ondas") is a leading provider of private wireless data and drone solutions through its wholly owned subsidiaries Ondas Networks Inc. ("Ondas Networks") and American Robotics, Inc. ("American Robotics" or "AR"). Ondas Networks is a developer of proprietary, software-based wireless broadband technology for large established and emerging industrial markets. Ondas Networks' standards-based (802.16s), multi-patented, software-defined radio FullMAX platform enables Mission-Critical IoT (MC-IoT) applications by overcoming the bandwidth limitations of today's legacy private licensed wireless networks. Ondas Networks' customer end markets include railroads, utilities, oil and gas, transportation, aviation (including drone operators) and government entities whose demands span a wide range of mission critical applications. American Robotics designs, develops, and markets industrial drone solutions for rugged, real-world environments. AR's Scout System™ is a highly automated, AI-powered drone system capable of continuous, remote operation and is marketed as a "drone-in-a-box" turnkey data solution service under a Robot-as-a-Service (RAAS) business model. The Scout System™ is the first drone system approved by the FAA for automated operation beyond-visual-line-of-sight (BVLOS) without a human operator on-site. Ondas Networks and American Robotics together provide users in oil & gas, rail, mining, agriculture, and critical infrastructure markets with improved connectivity and data collection capabilities.
