

# The Future of Exodus

# Today.

# 2011

Buy your coffee  
with bitcoin.

The market demanded  
**the dollar.**

The dollar is  
the core asset  
inside Exodus.

# Agents need money.

AI agents become everyone's assistant.

# TAM is in the trillions.

hrs a day

Agents don't need bank accounts

They need

**Self-custodial  
wallets**

The agentic future  
runs on Exodus.

# XO Cash

- 01 **Self-custodial**
- 02 **On Solana**
- 03 **Earns Yield**

Money for the Agent Era

# Your agent. Your money. Your rules.

Give any AI agent its own wallet — with budgets and rules you set, on rails Exodus already runs.

```
npm install @exodus/xocash
```

QUICK START

```
import { XO } from "@exodus/xocash"

const agentWallet = await XO.createAgentWallet({
  parent: exodusPay.user,
  rules: { dailyLimit: "$200" },
});

await agentWallet.send("solana:...", "5 XO");
// gas: 0 • chain: solana ✓
// works with x402 • MCP • REST
```

Agent wallets per human

# MoonAgents Card

Spend directly from your  
onchain wallet at the  
moment of transaction.

A prediction.

**Agentic commerce  
on stablecoins is  
measured in billions.**

When something  
goes wrong with  
your money,  
we pick up the  
phone.

**That's what  
you own.**
