Energous and TAGnology Partner to Bring Over-The-Air Wireless Power Solutions to European Customers

TAGnology becomes an industrial design house partner to accelerate innovative WattUp wireless charging 2.0 technology implementation for European customers

SAN JOSE, Calif.--(BUSINESS WIRE)-- Energous Corporation (Nasdaq: WATT), the developer of WattUp®, a revolutionary RF-based wireless charging technology that supports charging of electronic devices at-a-distance, today announced a partnership with [TAGnology RFID GmbH](#), a leading European provider of wireless technology, contactless identification and RTLS (real time location system) solutions serving a wide range of applications from industrial, medical, automotive to Internet of Things (IoT). Under the arrangement, TAGnology will work as an industrial design house for Energous customers, helping to implement wireless power solutions, proofs of concept (PoCs), and manage development projects. In addition, TAGnology delivers training and technical support in the region and will serve as a provider of Energous' wireless power solutions and developer kits in Europe through its ecommerce website and distribution channel.

“Energous WattUp wireless charging 2.0 technology is an innovative and scalable solution and TAGnology is excited to bring this ground-breaking technology to the European market and to deliver a new level of consumer experience and industrial capability,” said Markus Schriebl, chief executive officer, TAGnology. “We believe joining the Energous ecosystem will offer European manufacturers new wireless power options that will revolutionize product charging in a wide range of use cases and applications.”

Capable of charging multiple devices simultaneously at-a-distance, Energous' WattUp technology enables a variety of wireless charging scenarios from near field to far field over the air, at a wide range of distances. WattUp is suitable for a broad range of applications ranging from small form factor devices to industrial IoT sensors to larger electronics and peripherals.

“TAGnology's technical expertise and consulting capabilities will enable our customers to accelerate adoption of our wireless charging technology into their product designs,” said Cesar Johnston, acting CEO, chief operating officer and executive vice president of engineering for Energous. “With more than 15 years of experience in the design and production of innovative wireless solutions and a broad established customer base, TAGnology brings significant industry knowledge and experience to our partnership in a new, emerging market for Energous technologies.”

About Energos Corporation

Energos Corporation (Nasdaq: WATT) is the global leader of Wireless Charging 2.0 technology. Its award-winning WattUp® solution is the only technology that supports both contact and distance charging through a fully compatible ecosystem. Built atop fast, efficient, and highly scalable RF-based charging technology, WattUp is positioned to offer improvements over older, first generation coil-based charging technologies in power, efficiency, foreign device detection, freedom of movement and overall cost for consumer electronics, medical devices, retail, military, industrial/commercial IoT, automotive, military, retail and industrial applications. Energos develops silicon-based wireless power transfer (WPT) technologies and customizable reference designs, and provides worldwide regulatory assistance, a reliable supply chain, quality assurance, and sales and technical support to global customers. The company received the world's first FCC Part 18 certification for at-a-distance wireless charging and has been awarded more than 200 U.S. patents for its WattUp wireless charging technology to-date.

Safe Harbor Statement

This press release contains "forward-looking statements" within the meaning of the Securities Act of 1933, as amended, the Securities Exchange Act of 1934, as amended, and the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact included in this press release are forward-looking statements. Forward-looking statements may describe our future plans and expectations and are based on the current beliefs, expectations and assumptions of Energos. These statements generally use terms such as "believe," "expect," "may," "will," "should," "could," "seek," "intend," "plan," "estimate," "anticipate" or similar terms. Examples of our forward-looking statements in this release include but are not limited to our statements about the future of the global wireless charging industry, our technology, the success of our collaborations with our partners or statements about any governmental approvals we may need to operate our business, and statements with respect to its expected functionality and company growth. Factors that could cause actual results to differ from what we expect include: uncertain timing of necessary regulatory approvals; timing of customer product development and market success of customer products; our dependence on distribution partners; and intense industry competition. We urge you to consider those factors, and the other risks and uncertainties described in our most recent annual report on Form 10-K as filed with the Securities and Exchange Commission (SEC), any subsequent quarterly reports on Form 10-Q as well as in other documents that may be subsequently filed by Energos, from time to time, with the SEC, in evaluating our forward-looking statements. In addition, any forward-looking statements represent Energos' views only as of the date of this release and should not be relied upon as representing its views as of any subsequent date. Energos does not assume any obligation to update any forward-looking statements unless required by law.
