Focus Universal Submits Application For NASDAQ Up-Listing

WALNUT, CA / ACCESSWIRE / July 26, 2018 /Focus Universal, Inc. (OTCQB: FCUV) ("Focus Universal" or the "Company"), a developer of IOT technologies including its Universal Smart Instrumentation Platform ("USIP"), has submitted its formal application to list the Company's common stock on the NASDAQ exchange.

"Being in a position to list our common stock on NASDAQ reflects significant progress that we have made in building our financial and liquidity standards positioning the Company for future growth and profitability," said Dr. Desheng Wang, Chief Executive Officer of Focus Universal.

"We believe up-listing from OTC Markets to NASDAQ will increase the awareness of Focus Universal in the financial community and provide us with more liquidity and a larger pool of investors," continued Dr. Wang. "A NASDAQ listing will help unlock some of the shareholder value we are trying to create for our stakeholders."

Acceptance for listing Company shares is subject to approval, in part, based on the Company's ability to meet minimum listing requirements for the NASDAQ Capital Market. While the Company intends to satisfy all of the applicable listing criteria, no assurance can be given that its application will be approved. During the NASDAQ review process, the Company's common stock will continue to trade on the OTC under its current symbol, FCUV.

About the NASDAQ

The NASDAQ Stock Market is global electronic marketplace for buying and selling securities. It was created by the National Association of Securities Dealers ("NASD") to enable investors to trade securities on a computerized, speedy and transparent system. For more about the NASDAQ, go to www.nasdaq.com.

About Focus Universal

Focus Universal Inc. (OTCQB: FCUV) is a Universal Smart Instrumentation Platform ("USIP") developer and Universal Smart Device ("USD") manufacturer for the Internet of Things market. The Company's USIP generalizes instruments into a reusable foundation and architecture-specific components (sensor modules), which together replace the functions of traditional instruments at a fraction of the cost. The USIP has an open architecture and features the ability to connect thousands of sensors and probes from different industries and vendors communicating with the same device. This interoperability and reusability gives Focus Universal a major edge over competitors.
