Axalta Features its Brilliant Imron Coatings at 2nd Annual Refit International Exhibit and Conference

GLEN MILLS, Pa.--(BUSINESS WIRE)-- Axalta Coating Systems (NYSE: AXTA), a leading global supplier of liquid and powder coatings, will display its premium line of Imron® coatings at the 2nd Annual Refit Exhibit on January 26-27, 2017 at the Broward County Convention Center in Fort Lauderdale, Florida. The Refit Conference attracts captains, owners, boatyard professionals, designers and stylists whose focus is refurbishing or refitting existing yachts, as well as suppliers of marine products, services, and accessories. The Imron range of products is designed to deliver the industry's best appearance, performance, and corrosion protection specifically for the marine segment.

"Axalta looks forward to providing industry refit professionals with the most up-to-date information on our innovative paint finishes and technology for the marine market," said John Corry, Product Director for Axalta's Industrial North America business. "Our Imron marine coatings are designed to deliver long-lasting high gloss colors that can be spot repaired or polished to further extend the life of the overall finish."

Axalta will feature Imron MS600™ Single Stage Polyurethane Topcoat, Imron MS100™ Polyurethane Basecoat as well as its primers and interior marine products at booth #224. The durability and abrasion resistance of Axalta's marine coatings help yachts retain their gloss and mirror-like finish longer so that they require less maintenance over time.

The Refit Conference hosts technical seminars and live demonstrations that offer ways to help improve refit processes since executing a refit is often more challenging than a new build. For more information, visit <https://refitshow.com/>.
