segment.”

Designed as fast-drying spray applications, Axalta’s three new aerosol topcoats come in a wide variety of solid, metallic, and custom hues that deliver beautiful finishes and superior corrosion protection to damaged machinery and equipment. Surfaces damaged by chips,

“Our aerosol spray topcoats offer a quick and convenient way for customers to easily perform spot repairs on surfaces such as construction equipment or trailers,” said Eric Kwasnicka, Product Manager, Industrial Coatings. “With one- and two-component qualities and thousands of color options to choose from, these topcoats are another innovative way Axalta adds value and offers high quality solutions to the industrial

scratches, or other minor scuffs may be restored to its original quality and shine when Axalta's aerosol topcoats are applied.

The Tufcote™ TCP-1600 polyurethane topcoat delivers good appearance with lead- and chrome-free color options while Imron® EX-1700 allows painters to achieve a premium appearance repair. Axalta IE-1500 is an acrylic topcoat that serves as the economical choice for quick spot repairs. The hermetically sealed structure of the aerosol cans helps prevent contamination to improve the overall topcoat performance and corrosion resistance.
