Anixa Biosciences Announces Chief Development Officer Dr. Pam Garzone to Speak at the Alliance for Cancer Gene Therapy Summit 2025 on March 19th

SAN JOSE, Calif., March 3, 2025 /PRNewswire/ -- [Biosciences, Inc.](#) ("Anixa" or the "Company") (NASDAQ: ANIX), a biotechnology company focused on the treatment and prevention of cancer, today announced Dr. Pam Garzone, Chief Development Officer of Anixa, will be attending the Alliance for Cancer Gene Therapy (ACGT) Summit 2025 and participating as a panelist on the Gynecologic and Breast Cancers panel. The Alliance for Cancer Gene Therapy Summit 2025 is being held on Wednesday and Thursday, March 19 - 20, 2025, at the Alexandria Center for Life Science in New York City.

Dr. Garzone will join leading experts in the field to discuss advancements in cell and gene therapy, including Anixa's CAR-T therapy for ovarian cancer, and its potential impact on gynecologic and breast cancers. The panel is scheduled for Wednesday, March 19, 2025, from 11:15 AM – 12:15 PM ET.

Dr. Amit Kumar, Chairman and CEO of Anixa, stated, "We are pleased that Anixa and Dr. Garzone were invited to share insights at the ACGT Summit. Our discussions and contributions to the development of novel cancer therapies will help drive meaningful discussions on the future of gene-based treatments for gynecologic and breast cancers."

The Alliance for Cancer Gene Therapy Summit 2025 will bring together leading physician scientists advancing research to develop curative cell and gene therapies for solid tumor cancers.

For more information about the conference, visit [Alliance for Gene Therapy Summit 2025](#).

About Anixa Biosciences, Inc.

Anixa is a clinical-stage biotechnology company focused on the treatment and prevention of cancer. Anixa's therapeutic portfolio consists of an ovarian cancer immunotherapy program being developed in collaboration with Moffitt Cancer Center, which uses a novel type of CAR-T, known as chimeric endocrine receptor-T cell (CER-T) technology. The Company's

vaccine portfolio includes vaccines being developed in collaboration with Cleveland Clinic to treat and prevent breast cancer and ovarian cancer, as well as additional cancer vaccines to address many intractable cancers, including high incidence malignancies in lung, colon, and prostate. These vaccine technologies focus on immunizing against "retired" proteins that have been found to be expressed in certain forms of cancer. Anixa's unique business model of partnering with world-renowned research institutions on all stages of development allows the Company to continually examine emerging technologies in complementary fields for further development and commercialization.
