Leading U.S. Natural Gas Producer Grows Capstone Microturbine Fleet in the Marcellus Shale Beyond 150 Units With New Follow-On Order

Additional Order Underscores Long-Time Customer's Trust in Capstone's Clean, Reliable Power Solutions to Meet Growing Energy Demand

LOS ANGELES--(BUSINESS WIRE)-- [Capstone Green Energy Holdings, Inc.](#) (the "Company" or "Capstone") (OTCID: CGEH) and Capstone Green Energy, LLC, announced that [E-Finity Distributed Generation](#), Capstone's distributor for the Mid-Atlantic, Southeastern United States, and the Caribbean, has secured a follow-on order from one of the nation's leading natural gas producers. The order includes a pre-commissioned skid featuring three C65 microturbines and E-Finity's m-TIM controller, slated for commissioning this October in the Marcellus Shale region.

With this addition, the customer expands its Capstone fleet to more than 150 units, one of the largest microturbine fleets in the country, demonstrating long-term trust in Capstone's technology and E-Finity's service expertise. The microturbines were chosen for their ability to deliver reliable power, ultra-low emissions, and consistent performance, especially in remote, off-grid environments where uninterrupted power is essential.

The pre-commissioned skid is designed for same-day connection and startup, eliminating the need for on-site commissioning. It is also pre-engineered for future scalability, allowing a fourth C65 microturbine to be added to meet potential load growth. The system will be fueled by on-site pipeline natural gas, ensuring seamless integration with the customer's existing infrastructure.

"Our relentless focus on delivering customer value through innovative, clean, and reliable power solutions continues to resonate with leaders in the natural gas sector," said Vince Canino, President and CEO of Capstone Green Energy. "This follow-on order is a clear signal that our products and service model are making a difference where it counts, in the field, where reliability is not optional. We are proud to support our partners in driving operational success."

Capstone's microturbine systems are known for their low maintenance requirements, low emissions profile, and ability to deliver clean, reliable power in the most demanding environments. This project highlights the growing need for efficient on-site power solutions that enable operators to meet stringent air quality regulations while enhancing operational resilience.

“This order underscores the strength of our technology and service in meeting the demanding needs of natural gas producers,” said Jeff Beiter, Founder and CEO of E-Finity Distributed Generation. “The fully pre-commissioned skid enables rapid deployment with no on-site commissioning, a major advantage for operations in remote areas. Our customer’s commitment to expanding their fleet reflects the durability of Capstone microturbines and the continued faith in the E-Finity team to provide top-tier service.”

About Capstone Green Energy

For nearly four decades, Capstone Green Energy has been a leader in clean technology, pioneering the use of microturbines to revolutionize how businesses manage their energy needs in a sustainable manner. In collaboration with our global network of dedicated distributors, we have shipped over 10,600 units to 88 countries, helping customers significantly reduce their carbon footprints through high-efficiency, on-site energy systems and microgrid solutions.

Our commitment to a cleaner, more resilient energy future remains steadfast. Today, we offer a comprehensive range of microturbine products, from 65kW systems to multi-megawatt solutions, tailored to meet the specific needs of commercial, industrial, and utility-scale customers. In addition to our core microturbine technology, Capstone’s growing portfolio includes flexible Energy-as-a-Service (EaaS) offerings, such as build-own & transfer models, PPA’s, lease to own and rental solutions, are designed to provide maximum value and energy security.

Capstone’s fast, turnkey power rental solutions are designed for customers with limited capital budgets or short-term energy needs. For more information, please contact us at rentals@CGRNenergy.com.

In our pursuit of cutting-edge energy solutions, Capstone has forged strategic partnerships to expand our impact and capabilities. Through these collaborations, we proudly offer advanced technologies that leverage renewable gas and heat recovery solutions—further enhancing the sustainability, efficiency, and reliability of our clients’ operations. These integrated offerings reflect our commitment to building a cleaner, more responsible energy future.
