## **Westell Technologies Chosen to Speak at OSP EXPO**

AURORA, Ill.--(BUSINESS WIRE)-- Westell Technologies, Inc. (NASDAQ: WSTL), a global leader of intelligent site management, in-building wireless, cell site optimization, and outside plant solutions, has been chosen to speak at OSP EXPO 2014, an industry-leading telecommunications tradeshow focusing on the wireless and wireline network evolution. OSP EXPO will be held at the Baltimore Convention Center in Maryland from September 30 to October 2, 2014.

Westell will speak on “Intelligent equipment enclosures: making the right choices” on Thursday, October 2 from 8am – 9am. During the presentation, you’ll learn how to make equipment enclosures intelligent and integrated into a new or existing wireless or wireline network. Customer examples of intelligent enclosures already in use will be discussed including the operational, capital, and space savings that are possible.

Additionally, Westell will be exhibiting in booth #723 throughout the event. Visit the booth to learn more about our solution and product offerings including site management, tower mounted amplifiers, distributed antenna systems management, and outside plant and industrial networks.

### **About Westell**

Westell Technologies, headquartered in Aurora, Illinois, is a global leader of intelligent site management, in-building wireless, cell site optimization, and outside plant solutions focused on wireless innovation at your network’s edge. The comprehensive solutions Westell provides enable service providers, tower operators, and other network operators to reduce operating costs and improve network performance. With millions of products successfully deployed worldwide, Westell is a trusted partner for transforming networks into high quality, reliable systems.
