Maximizing Capital Allocation For All Stakeholders

**MAINTAIN STRONG BALANCE SHEET**

- >$900 million of liquidity
- $750 million revolver extended to April 2027
- Total leverage at 2.9x (a)
- Significant room under all debt covenants
- No near-term debt maturities
- Only ~20% of debt is variable-rate

**INVEST IN BUSINESS**

- Strategic deployment of capital to accelerate growth in higher RevPAR, midscale+ hotels
- Continued investment in profitable and brand-enhancing prototypes and system refresh programs
- Continued digital innovation to drive franchisees’ top and bottom lines
- Disciplined approach to strong ROI strategic transactions/acquisitions

- Development advances: -$60 million
- Capital expenditures: -$35 million
- Strategic transactions/acquisitions: TBD

**RETURN EXCESS CAPITAL TO SHAREHOLDERS**

- Target mid-30s dividend payout ratio
- Deploy excess cash to bolster shareholder return
- Record $561 million of capital returned to shareholders during 2022 (7% of market cap)
- Repurchased 15% of outstanding shares since spin-off

Dividend Payout Ratio

- 2019: 35%
- 2020: 55%
- 2021(b): 40%
- 2022(b): 32%
- 2023(c): -35%

(a) Just below the low end of our 3-4x target range.
(b) Based on 2021/2022 actual adjusted net income and annualized $0.32 per share quarterly dividend.
(c) Based on 2023 estimated adjusted net income and annualized $0.35 per share quarterly dividend, consistent with currently quarterly cash dividend policy.
2023 Key Priorities

**DRIVE NET ROOM GROWTH**
Grow direct franchise system 2-4%, including continued improvement of retention rate
Continued investment in new brands, system refreshes and other programs
Expand portfolio reach across adjacent segments and geographies

**INCREASE OWNERS’ PROFITABILITY**
Optimize our franchisees’ top-line and market share through continued digital innovation and best practices
Capture increased share of growing spend from the Infrastructure & CHIPS Acts
Reduce on-property labor and operating costs for our franchisees through state-of-the-art, owner-first technology solutions and services
Infrastructure Category Represents Large Growth Opportunity in Coming Years

**INCREMENTAL U.S. INFRASTRUCTURE & CHIPS ACTS SPEND**

(Billions)

- Roads, bridges, major projects: $110
- Water: $105
- Power infrastructure: $73
- Passenger and freight rail: $66
- Broadband infrastructure: $65
- Manufacturing plants for chipmakers: $52
- Public transit: $39
- Airports: $25
- Environmental remediation: $21
- Ports and waterways: $17
- Safety: $11
- All other: $16

**WH WELL-POSITIONED FOR FUTURE OPPORTUNITY**

- In 2019, the federal government spent $71 billion on infrastructure; the 2021 Infrastructure Act & 2022 CHIPS Act provide for a total of ~$1.5 trillion in infrastructure spend over eight years

- WH is well-positioned to capture expected hotel demand in markets receiving the largest infrastructure dollars, including CA, FL, TX, GA and IL

- Represents a $150 million+ opportunity to WH over the spend period

- Margin of -85% on gross $4.7 million per point impact; assumes cost mitigation of -15%
- Funds expected to break-even until RevPAR declines in excess of ~10% (likely ~-$2.4 million per point)
- Not RevPAR-based but is sensitive to overall travel demand; subject to a $70 million floor
- Not RevPAR-based but is somewhat sensitive to overall travel demand; predominately represents fee-based revenues from ancillary services provided to franchisees, including procurement and technology, as well as revenue associated with our co-branded credit card program

## Non-GAAP Reconciliations

The following tables reconcile certain non-GAAP financial measures. The presentation of these adjustments is intended to permit the comparison of particular adjustments as they appear in the income statement in order to assist investors’ understanding of the overall impact of such adjustments. We believe that adjusted EBITDA provides useful information to investors about us and our financial condition and results of operations because adjusted EBITDA is among the measures used by our management team to evaluate our operating performance and make day-to-day operating decisions and because adjusted EBITDA is frequently used by securities analysts, investors and other interested parties as a common performance measure to compare results or estimate valuations across companies in our industry. Explanations for adjustments within the reconciliations can be found in our fourth quarter 2022 Earnings Release at investor.wyndhamhotels.com.

APPENDIX

Non-GAAP Reconciliations

The following table reconciles certain non-GAAP financial measures. We define free cash flow to be net cash provided by operating activities less property and equipment additions, which we also refer to as capital expenditures. We believe free cash flow to be a useful operating performance measure to us and investors to evaluate the ability of our operations to generate cash for uses other than capital expenditures and, after debt service and other obligations, our ability to grow our business through acquisitions and investments, as well as our ability to return cash to shareholders through dividends and share repurchases, to the extent permitted. We believe free cash flow conversion to be a useful liquidity measure to us and investors to evaluate our ability to convert our earnings to cash. These non-GAAP measures are not necessarily a representation of how we will use excess cash. A limitation of using free cash flow versus the GAAP measure of net cash provided by operating activities as a means for evaluating Wyndham Hotels is that free cash flow does not represent the total cash movement for the period as detailed in the consolidated statement of cash flows.

Definitions & Disclaimer

Definitions:
Adjusted EBITDA: Represents net income excluding net interest expense, depreciation and amortization, early extinguishment of debt charges, impairment charges, restructuring and related charges, contract termination costs, transaction-related items (acquisition, disposition-, or separation-related), foreign currency impacts of highly inflationary countries, gain/(loss) on asset sales, stock-based compensation expense, income taxes and development advance notes amortization. Adjusted EBITDA is a financial measure that is not recognized under U.S. GAAP and should not be considered as an alternative to net income or other measures of financial performance or liquidity derived in accordance with U.S. GAAP. In addition, our definition of Adjusted EBITDA may not be comparable to similarly titled measures of other companies. Adjusted EBITDA also assists our investors in evaluating our ongoing operating performance by adjusting for certain items which may be recurring or non-recurring and in which our view do not necessarily reflect ongoing performance. We also internally use these measures to assess our operating performance, both absolutely and in comparison to other companies, and in evaluating or making selected compensation decisions. The supplemental disclosures included in this presentation are in addition to GAAP reported measures. The non-GAAP reconciliation tables included in this presentation should not be considered a substitute for, nor superior to, financial results and measures determined or calculated in accordance with GAAP. During the first quarter of 2021, we modified the definition of adjusted EBITDA to exclude the amortization of development advance notes to reflect how our chief operating decision maker reviews operating performance beginning in 2021. We have applied the modified definition of adjusted EBITDA to all periods presented included in this presentation.

Free Cash Flow: We define free cash flow to be net cash provided by operating activities less property and equipment additions, which we also refer to as capital expenditures. We believe free cash flow to be a useful operating performance measure to us and investors to evaluate the ability of our operations to generate cash for uses other than capital expenditures and after debt service and other obligations, our ability to grow our business through acquisitions and investments, as well as our ability to return cash to shareholders through dividends and share repurchases. Free cash flow is not necessarily a representation of how we will use excess cash. A limitation of using free cash flow versus the GAAP measure of net cash provided by operating activities a means for evaluating Wyndham Hotels is that free cash flow does not represent the total cash movement for the period as detailed in the condensed consolidated statement of cash flows.

Non-GAAP Financial Measures:
Financial information contained in this presentation includes certain financial measures that are calculated and presented on the basis of methodologies other than in accordance with U.S. generally accepted accounting principles (GAAP), such as adjusted EBITDA and free cash flow, which include or exclude certain items from the most directly comparable GAAP financial measure. Any non-GAAP financial measures presented are not, and should not be viewed as, substitutes for financial measures required by GAAP, have no standardized meaning prescribed by GAAP and may not be comparable to the calculation of similar measures of other companies. Reconciliations of non-GAAP financial measures to the most directly comparable GAAP financial measures can be found in this presentation. In some instances, we have provided certain financial metrics only on a non-GAAP basis because, without unreasonable effort, we are unable to predict with reasonable certainty the occurrence or amount of potential adjustments that may arise in the future during the forward-looking period, which can be dependent on future events that may not be reliably predicted. Based on past reported results, where one or more of these items have been applicable, such excluded items could be material, individually or in the aggregate, to the reported results.
