GeoVision Chooses Airgain for Superior Connectivity in IP Surveillance Cameras

Airgain to provide high performance embedded antenna system for GeoVision's GV-EFER3700 rugged hemispheric surveillance IP camera

TAIPEI, Taiwan--(BUSINESS WIRE)-- [Airgain, Inc. \(NASDAQ: AIRG\)](#), a leading provider of advanced antenna technologies used to enable high performance wireless networking across a broad range of devices and markets, including connected home, enterprise, automotive, and Internet of Things (IoT), today announced it has been selected by manufacturer of intelligent video surveillance systems, [GeoVision](#), to provide embedded antenna technology for the GV-EFER3700 rugged hemispheric surveillance IP camera. The GV-EFER3700 is a 3 MP outdoor fisheye camera with wireless connectivity support and with the WPS function, it can easily connect to Wi-Fi routers.

Available now, the [GeoVision GV-EFER3700 camera](#) utilizes an advanced embedded antenna solution, utilizing dual band Wi-Fi. The high performance Airgain embedded antenna avoids the need for an externally mounted antenna, helping to ensure the camera is weatherproof and vandal-proof, and consequently offers more flexibility for surveillance camera installation in both industrial and commercial environments.

Jacob Suen, Senior Vice President of Airgain, said: "Security and surveillance cameras depend on secure and reliable connectivity, which is why GeoVision chose to work with us to ensure their IP cameras meet their customer's expectations and their products perform as intended. Our engineering team developed an optimal performance connectivity solution to integrate seamlessly within GeoVision's GV-EFER3700, making the antenna invisible to the outside of the camera, while rivalling the performance of an external antenna solution. We are looking forward to supporting GeoVision in the future as their connectivity demands continue to evolve."

Vincent Chen, Vice President of GeoVision, said: "In today's IoT world, it is no longer acceptable for surveillance IP cameras to be restricted by local network wiring design, wireless connectivity is essential. After evaluating several antenna options and suppliers, we selected Airgain's premium embedded antenna solution because optimal performance was achievable with a zero footprint antenna, avoiding the risk of antenna failure due to weather or tampering that is associated with external antennas."

This collaboration is another example of Airgain's success through providing technology that delivers high performance solutions for products relying on powerful connectivity. For GeoVision, the Airgain antenna technology delivers high performance connectivity to the GV-EFER3700, allowing the camera to support H.265 video codec to achieve better compression ratio while maintaining high picture quality at reduced network bandwidths.

Airgain will be attending [Computex 2018](#), held June 5-9 in Taipei, Taiwan. Airgain will be demonstrating its latest embedded antenna technology and hosting meetings at the Grand Hyatt Taipei. Contact Airgain at info@airgain.com to request a meeting.

About Airgain

Airgain is a leading provider of advanced antenna technologies used to enable high performance wireless networking across a broad range of devices and markets, including connected home, enterprise, automotive, and Internet of Things (IoT). Combining design-led thinking with testing and development, Airgain works in partnership with the entire ecosystem, including carriers, chipset suppliers, OEMs, and ODMs. Airgain's antennas are deployed in carrier, fleet, enterprise, residential, private, government, and public safety wireless networks and systems, including set-top boxes, access points, routers, modems, gateways, media adapters, portables, digital televisions, sensors, fleet, and asset tracking devices. Airgain is headquartered in San Diego, California, and maintains design and test centers in the U.S., U.K., and China. About GeoVision

Founded in 1998, GeoVision Inc. is a world-leading provider of end-to-end IP-based video surveillance solutions that are flexible, scalable, and reliable. As one of the Global Top Security 50 companies, GeoVision has presence in 110 countries worldwide. GeoVision is dedicated to improving the security of people and communities with continuous innovation, including AI-infused video analytics and IoT integration.

Forward-Looking Statements

Airgain cautions you that statements in this press release that are not a description of historical facts are forward-looking statements. These statements are based on the company's current beliefs and expectations. These forward-looking statements include statements regarding the use and performance of Airgain's antenna technology in IP cameras and any statements implying what potential impact such technology may have on our future business and operating results. The inclusion of forward-looking statements should not be regarded as a representation by Airgain that any of our plans will be achieved. Actual results may differ from those set forth in this press release due to the risk and uncertainties inherent in our business, including, without limitation: the market for our antenna products is developing and may not develop as we expect; risks associated with the performance of our antenna technology; our products are subject to intense competition, and competitive pressures from existing and new companies may harm our business, sales, growth rates and market share; our future success depends on our ability to develop and successfully introduce new and enhanced products for the wireless market; and other risks described in our prior press releases and in our filings with the Securities and Exchange Commission (SEC), including under the heading "Risk Factors" in our Annual Report on Form 10-K and any subsequent filings with the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and we undertake no obligation to revise or update this press release to reflect events or circumstances after the date hereof. All forward-looking statements are qualified in their

entirety by this cautionary statement, which is made under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.
