In conjunction with Airgain's antenna solutions, Axon's in-car and on-officer video technologies can help save lives and reduce injuries in multiple ways. Axon body cameras help deescalate interactions and provide immediate safety alerts and evidence access. The solution is seamlessly connected in real-time over dedicated

wireless networks, so public safety customers can focus on what matters – people, not paperwork.

"Axon is leading the way with innovative public safety video solutions that rely on a quality wireless connection to deliver maximum impact. However, customers need not only great technical solutions, but demand fast delivery times and great long-term reliability," said Reed Pangborn, Vice President, Channel Sales North America at Airgain. "Axon's choice of Airgain as their exclusive partner for Fleet 2 confirms our ability to deliver an industry-leading antenna, built in the USA, that meets and exceeds customer needs. We're especially proud

that two Arizona-based companies are working so closely together to provide law enforcement agencies with critical connectivity solutions to assure safety and certainty in the field.”

“Axon has worked with the team at Airgain for some time and has seen first-hand their ability to deliver excellent antenna solutions for first responders and public sector customers across North America,” said Trey Mills, Senior Product Manager at Axon. “After evaluating other manufacturers in the space, we are delighted to make them the exclusive antenna partner for Axon Fleet 2.”

The Airgain Solution

The antennas for Axon’s Fleet 2 solution are designed and built to order in Scottsdale, Arizona, only three miles from Axon headquarters. This combination enables Airgain to quickly design and build custom antennas to match Axon’s exact requirements, with an industry-leading short lead time.

Airgain has designed and built a range of small form factor and high-performance antennas for use in Axon solutions. The expanding portfolio includes the [ULTRAMAX MIMO 5-in-1 antenna](#), the new [MULTIMAX FV 5-in-1 antenna](#), and new M2M Wi-Fi Puck antenna built specifically to meet Axon’s needs. Airgain products are highly configurable with designs that easily meet the needs of changing requirements.

Forward-Looking Statements

Airgain cautions you that statements in this press release that are not a description of historical facts are forward-looking statements. These statements are based on the company's current beliefs and expectations. These forward-looking statements include statements regarding our ability to provide industry-leading antenna solutions that meet and exceed customer needs and of the performance of Axon's in-car video technologies in conjunction with our antenna solutions. The inclusion of forward-looking statements should not be regarded as a representation by Airgain that any of our plans will be achieved. Actual results may differ from those set forth in this press release due to the risk and uncertainties inherent in our business, including, without limitation: the market for our products is developing and may not develop as we expect; risks associated with the performance of our products; risks associated with quality and timing in manufacturing our products; and other risks described in our prior press releases and in our filings with the Securities and Exchange Commission, including under the heading "Risk Factors" in our Annual Report on Form 10-K and any subsequent filings with the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and we undertake no obligation to revise or update this press release to reflect events or circumstances after the date hereof. All forward-looking statements are qualified in their entirety by this cautionary statement, which is made under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.
