

Airgain® Grows Its Portfolio of 5G Antennas

SAN DIEGO--(BUSINESS WIRE)-- [Airgain, Inc. \(NASDAQ: AIRG\)](#), a leading provider of advanced wireless connectivity technology and systems, today announced the launch of a high performance antenna platform to meet the growing demand for 5G connectivity in fleet, industrial, and public safety applications. The Multimax™ 5G is an outdoor antenna with an OEM-style shark fin housing and single mounting hole, making it the ideal combination of aesthetic and simplicity.

The Multimax™ 5G includes a rugged UV protected enclosure, multiple mounting options, and customizable cable, connector, and antenna configurations for maximum flexibility. Its true power, however, lies in its ability to scale to meet almost any connectivity need with up to seven elements. These include up to two cellular 5G antennas, up to three Wi-Fi6E antennas, and an optional GNSS and LMR or Tetra Whip. In addition, two Multimax™ 5G antennas can be installed to support 4x4 MiMo 5G NR. The two antenna configuration gives higher isolation between antennas and increases diversity to improve the quality and reliability of a wireless link.

The Multimax™ 5G compliments the Centurion™ 5G platform in Airgain's growing line of 5G offerings. The Centurion™ 5G was designed specifically to provide high performance LTE and 5G connectivity all in a single, robust and compact housing. It connects to almost any vehicular router or modem and is equipped with up to nine elements, including up to four high-gain cellular elements, up to 4 high gain tri-band Wi-Fi6E elements, and an optional GNSS element.

"With the introduction of so many new 5G vehicle routers in the market, it was critical for us to provide flexibility to our customers to get the most out of the growing 5G infrastructure," said Patrick Hibbs, Sr. Director of Product Marketing at Airgain. "If you need a single unit that integrates as many connections as possible, we offer Centurion™ 5G. If you have an application that needs the highest in performance and can utilize two or more antennas to increase diversity, we offer Multimax™ 5G. Both provide the ultimate in high bandwidth connectivity."

About Airgain, Inc.

Airgain is a leading provider of advanced wireless connectivity technologies and systems used to enable high performance networking across a broad range of devices and markets, including consumer, enterprise, and automotive. Airgain's mission is to connect the world through optimized integrated wireless solutions. Combining design-led thinking with testing and development, Airgain's technologies are deployed in carrier, fleet, enterprise, residential, private, government, and public safety wireless networks and systems, including set-top boxes, access points, routers, modems, gateways, media adapters, portables, digital

televisions, sensors, fleet tracking, in-vehicle networking, and asset tracking devices. Through its pedigree in the design, integration, and testing of high-performance wireless modules and antenna technology, Airgain has become a leading provider of integrated communications products that solve critical connectivity needs. Airgain is headquartered in San Diego, California, and maintains design and test centers in the U.S., U.K., and China. Forward-Looking Statements

Airgain cautions you that statements in this press release that are not a description of historical facts are forward-looking statements. These statements are based on the company's current beliefs and expectations. These forward-looking statements include statements regarding the expected performance of, and market for, Airgain's products. The inclusion of forward-looking statements should not be regarded as a representation by Airgain that any of our plans will be achieved. Actual results may differ from those set forth in this press release due to the risk and uncertainties inherent in our business, including, without limitation: the market for our products is developing and may not develop as we expect; risks associated with the performance of our products, including bundled solutions with third-party products; if our channel partners fail to perform, or our partnerships are unsuccessful, we may not be able to bring our product solutions to market successfully or on a timely basis; our products are subject to intense competition, and competitive pressures from existing and new companies may harm our business, sales, growth rates and market share; the COVID-19 pandemic may continue to disrupt and otherwise adversely affect our operations and those of our suppliers, partners, distributors and ultimate end customers; risks associated with quality and timing in manufacturing our products and our reliance on third-party manufacturers; we may not be able to maintain strategic collaborations under which our bundled solutions are offered; if we cannot protect our intellectual property rights, our competitive position could be harmed or we could incur significant expenses to enforce our rights; and other risks described in our prior press releases and in our filings with the Securities and Exchange Commission, including under the heading "Risk Factors" in our Annual Report on Form 10-K and any subsequent filings with the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and we undertake no obligation to revise or update this press release to reflect events or circumstances after the date hereof. All forward-looking statements are qualified in their entirety by this cautionary statement, which is made under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.
