

Acurx Pharmaceuticals Announces Participation at The Spartan Capital Investor Conference to Showcase Growth Companies and Foster High-Level Investor Engagement

STATEN ISLAND, N.Y. , Oct. 17, 2024 /PRNewswire/ -- Acurx Pharmaceuticals, Inc. (NASDAQ: ACXP) ("Acurx" or the "Company"), a late-stage biopharmaceutical company developing a new class of antibiotics for difficult-to-treat bacterial infections, announced today that the Company will participate in the Spartan Capital inaugural investor conference on November 4, 2024 at the Pierre Hotel in New York, New York.

This participation aligns with our commitment to engage with industry leaders and investors. Our presentation will offer insight into our company's growth strategy and market position.

David P. Luci, President & CEO of the Company, commented, "We are pleased to be invited and to present at Spartan Capital's inaugural investor conference. This event provides an excellent platform to showcase our company and keep the key influencers in the capital markets apprised of our accomplishments and future plans."

The conference, organized in partnership with B2i Digital, a leading digital marketing firm specializing in investor communications, will feature presentations from over 30 carefully selected companies. The event will include panel discussions, one-on-one meetings, and networking sessions to maximize interactions between investors and presenters.

For more information about the conference and registration details, please visit [Spartan Capital's conference page](#).

About Acurx Pharmaceuticals, Inc.

Acurx Pharmaceuticals is a late-stage biopharmaceutical company focused on developing a new class of small molecule antibiotics for difficult-to-treat bacterial infections. The Company's approach is to develop antibiotic candidates with a Gram-positive selective spectrum (GPSS®) that blocks the active site of the Gram+ specific bacterial enzyme DNA polymerase III C (pol III C), inhibiting DNA replication and leading to Gram-positive bacterial cell death. Its R&D pipeline includes antibiotic product candidates that target Gram-positive bacteria, including *Clostridioides difficile*, methicillin-resistant *Staphylococcus aureus* (MRSA), vancomycin resistant *Enterococcus* (VRE) and drug-resistant *Streptococcus pneumoniae* (DRSP).
