Four Tecopower Units to Power Long Island Wastewater Treatment Plant

WALTHAM, MA -- (Marketwired) -- 08/24/17 -- [Tecogen® Inc.](#) (NASDAQ: TGEN), a clean energy company providing ultra-efficient, clean, natural gas powered on-site power, heating and cooling equipment, is pleased to announce the sale of four Tecopower CM-75 combined heat and power units to a wastewater treatment plant on Long Island, NY. The machines, which will have a combined total electrical capacity of 300 KW, will utilize natural gas from the local gas distribution system as opposed to biogas produced on-site. As is the case with virtually all Tecogen products, the CM-75 comes installed with the company's patented near-zero Ultera emissions control technology.

Jeffrey Glick, Vice President of Sales for Tecogen, stated, "This is a new installation at the facility that is both part of an upgrade of its heating and cooling system and at the same time will reduce the plant's reliance on the region's long under strain electric grid. Ultimately, the cost savings of this will provide at least a little bit of relief to local taxpayers."

"This project is a great example of how we are expanding our reach into heretofore untapped markets," said Tecogen Co-CEO Benjamin Locke. "Each new application of our market-leading technology provides another successful data point for potential customers to consider. The Tecopower CM-75 provides a low-cost solution to both improve a facility's energy efficiency and partially mitigate its impact on the regional power grid, especially during periods of peak demand."

About Tecogen

[Tecogen® Inc.](#) designs, manufactures, sells, installs, and maintains high efficiency, ultra-clean, cogeneration products including natural gas engine-driven combined heat and power, air conditioning systems, and high-efficiency water heaters for residential, commercial, recreational and industrial use. The company is known for cost efficient, environmentally friendly and reliable products for energy production that, through patented technology, nearly eliminate criteria pollutants and significantly reduce a customer's carbon footprint.

In business for over 30 years, Tecogen has shipped more than 2,500 units, supported by an established network of engineering, sales, and service personnel across the United States. For more information, please visit www.tecogen.com or contact us for a free [Site Assessment](#).
