

### Company Overview

Soliton, Inc. is a medical device company with a novel and proprietary platform technology licensed from MD Anderson. The Company's first commercial product uses rapid pulses of designed acoustic shockwaves to dramatically accelerate the removal of unwanted tattoos. The Company is based in Houston, Texas, and is actively engaged in bringing Rapid Acoustic Pulse ("RAP") device to the market. The Company believes this "Soliton" method cannot only dramatically accelerate tattoo removal, but also has the potential to lower removal cost for patients, while increasing profitability to practitioners, and to reduce the potential for unwanted side effects from current laser removal methods. Soliton has discovered other capabilities of the RAP technology during preclinical testing, including the potential to assist existing fat reduction technology in the reduction of fat as well as reducing the appearance of cellulite by creating mechanical stress at the cellular level and inducing significant collagen growth.
