Tego Cyber CEO Shannon Wilkinson to Appear Live Today on Cheddar News to Discuss Cybersecurity

LAS VEGAS, NV / ACCESSWIRE / August 23, 2021 Tego Cyber Inc. (OTCQB:TGCB), an emerging developer of proactive cyber threat intelligence applications and solutions, today announced that Shannon Wilkinson, Chief Executive Officer and Chief Financial Officer of Tego Cyber, will be a guest today, August 23, 2021, on Fast Forward airing on Cheddar News at approximately 11:30 a.m. Eastern Time with Jill Wagner and J.D. Durkin. Mrs. Wilkinson will be discussing the Company's technology and its Tego Threat Intelligence Platform as well as the current state of cybersecurity.

Jill Wagner and J.D. Durkin host Fast Forward, a weekly morning business news show that explores the potential permanent changes, across industries, that we adopt after the pandemic is over. Today's show is entirely focused on cybersecurity.

The company broadcasts from the trading floor of the New York Stock Exchange.

About Tego Cyber Inc.

Tego Cyber Inc. (OTCQB:TGCB, "the Company") was created to capitalize on the emerging cyber threat intelligence market. The Company has developed a cyber threat intelligence application that integrates with top end security platforms to gather, analyze, then proactively identify threats to an enterprise network. The Tego Threat Intelligence Platform (TTIP) takes in vetted and curated threat data and after utilizing a proprietary process, the platform compiles, analyzes, and then delivers that data to an enterprise network in a format that is timely, informative, and relevant. The threat data provides additional context including specific details needed to identify and counteract threats so that security teams can spend less time searching for disparate information. The first version of the TTIP will integrate with the widely accepted SPLUNK platform to provide real-time threat intelligence to macro enterprises using the SPLUNK architecture. The Company plans on developing future versions of the TTIP for integration with other established SIEM systems and platforms including: Elastic, IBM QRadar, AT&T Cybersecurity, Exabeam, and Google Chronical.
