Cheniere and Bechtel Announce Substantial Completion of Train 1 at the Corpus Christi Liquefaction Project

HOUSTON--(BUSINESS WIRE)-- Cheniere Energy, Inc. ("Cheniere") (NYSE American: LNG) and Bechtel Oil, Gas and Chemicals, Inc. ("Bechtel") announced today that Substantial Completion of Train 1 of the Corpus Christi liquefaction project was achieved on February 28, 2019. Commissioning is complete and Bechtel has turned over care, custody, and control of Train 1 to Cheniere.

"Train 1 at Corpus Christi has achieved Substantial Completion, becoming the first liquefaction train placed into operation at a greenfield liquefaction facility in the lower 48 states," said Jack Fusco, President and CEO of Cheniere. "This momentous achievement was made possible by Cheniere's professionals and our EPC partner, Bechtel, who worked diligently together to ensure a seamless transition from construction to operations. I'd like to thank the Cheniere team and Bechtel for their world class execution, which has enabled us to continue our impeccable record of bringing trains online safely, ahead of schedule, and within budget."

"The entire Bechtel team is very proud of our contribution to Cheniere's success on the U.S. Gulf Coast, as we hand over custody of this historic first Texas LNG train," said Brendan Bechtel, Chairman and Chief Executive Officer of Bechtel. "It was three years ago that we were able to support Cheniere's entry into the LNG export market with Train 1 at the Sabine Pass Liquefaction project. With five trains now completed and operating well ahead of schedule, we are excited to continue working alongside Cheniere to deliver their next wave of trains with the reliability of outcome that Cheniere and Bechtel have become known for delivering. This program is a great example of how a one-team approach can bring world-class results, and I want to congratulate Jack and the Cheniere team for fostering this environment of collaboration and mutual success."

Under sale and purchase agreements ("SPAs") with Endesa S.A. and PT Pertamina (Persero), the date of first commercial delivery is expected to occur in June 2019, upon which the term of each of these SPAs commences. Additionally, bridging volumes are expected to begin in June 2019 under an SPA with Iberdrola, S.A.

With the achievement of Substantial Completion, financial results of LNG sales from Train 1 going forward will be reflected in the statement of operations of Cheniere and its applicable affiliates.

About Cheniere

Cheniere Energy, Inc. is the leading producer and exporter of liquefied natural gas (LNG) in the United States, reliably providing a clean, secure, and affordable solution to the growing

global need for natural gas. Cheniere is a full-service LNG provider, with capabilities that include gas procurement and transportation, liquefaction, vessel chartering, and LNG delivery. Cheniere has one of the largest liquefaction platforms in the world, consisting of the Sabine Pass and Corpus Christi liquefaction facilities on the U.S. Gulf Coast, with expected aggregate nominal production capacity of 36 million tonnes per annum of LNG operating or under construction. Cheniere is also pursuing liquefaction expansion opportunities and other projects along the LNG value chain. Cheniere is headquartered in Houston, Texas, and has additional offices in London, Singapore, Beijing, Tokyo, and Washington, D.C.

Forward-Looking Statements

This press release contains certain statements that may include “forward-looking statements” within the meanings of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical or present facts or conditions, included herein are “forward-looking statements.” Included among “forward-looking statements” are, among other things, (i) statements regarding Cheniere’s financial and operational guidance, business strategy, plans and objectives, including the development, construction and operation of liquefaction facilities, (ii) statements regarding expectations regarding regulatory authorizations and approvals, (iii) statements expressing beliefs and expectations regarding the development of Cheniere’s LNG terminal and pipeline businesses, including liquefaction facilities, (iv) statements regarding the business operations and prospects of third parties, (v) statements regarding potential financing arrangements, and (vi) statements regarding future discussions and entry into contracts. Although Cheniere believes that the expectations reflected in these forward-looking statements are reasonable, they do involve assumptions, risks and uncertainties, and these expectations may prove to be incorrect. Cheniere’s actual results could differ materially from those anticipated in these forward-looking statements as a result of a variety of factors, including those discussed in Cheniere’s periodic reports that are filed with and available from the Securities and Exchange Commission. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this press release. Other than as required under the securities laws, Cheniere does not assume a duty to update these forward-looking statements.
