

Airgain® Launches High Power Fixed Wireless Access AirgainConnect® Solutions for Robust Broadband Communications in Public Safety and Utility Applications

- *The new AirgainConnect AC-HPUE-FWA high power antenna-modem for fixed wireless access maximizes coverage and reliability for critical communications applications*
- *AirgainConnect is now available in black for purchase and deployment nationwide*

SAN DIEGO--(BUSINESS WIRE)-- [Airgain, Inc. \(Nasdaq: AIRG\)](#), a leading provider of advanced wireless connectivity solutions and technologies used to enable high performance wireless networking across a broad range of devices and markets, including consumer, enterprise, and automotive, today announced the release of its first fixed wireless access (FWA) solution from the AirgainConnect platform, along with a new black form factor offered for all platform products.

The AirgainConnect [AC-HPUE-FWA](#) includes an integrated multi-band high power LTE antenna-modem designed specifically for fixed wireless access. The AC-HPUE-FWA is designed to enable maximum coverage and reliability for fixed wireless access at police departments, fire departments, EMS dispatch centers, government buildings, public and private utility sites, airline emergency operations centers, hospitals, private medical practice locations, schools, private security dispatch centers, and media outlets. This rugged fixed wireless access antenna-modem tightly couples essential LTE radio components with the modem to meet the most demanding needs of locations that require more reliable and secure communications before, during, and after an event or disaster.

The AirgainConnect [AC-HPUE™](#) antenna-modem, Airgain's first product from the platform, is also offered in a black form factor along with the white model that is currently available. AirgainConnect's patented technology is capable of transmitting the maximum allowable radiated power directly to the LTE antenna elements. When compared to a conventional modem, the AC-HPUE maximizes coverage, building penetration, and throughput for critical communications applications.

"The AC-HPUE-FWA brings more reliable connectivity when base stations are compromised, which is critical especially during disaster scenarios," said Morad Sbahi, Senior Vice President of Global Product and Marketing at Airgain. "Omnidirectional fixed wireless access reconnects to backup LTE base stations if a primary station goes down, providing first responders with the highest degree of readiness available. We are proud to

offer new product innovations that expand the AirgainConnect platform for more robust public safety offerings.”

The new AirgainConnect platform options will be showcased in Airgain’s booth #657 at [IWCE \(International Wireless Communications Expo\)](#), which takes place in Las Vegas, NV on September 27-30, 2021. Brian Goodyear, Product Line Director at Airgain, will be discussing how AirgainConnect provides increased coverage for first responders in a [speaking session](#) on September 27, 2021 at 11:30 a.m. PT during IWCE in the Las Vegas Convention Center. For more information, please email events@airgain.com.

Availability

The [AC-HPUE-FWA](#) is available for order now, and all [AC-HPUE](#) models are currently available to order in black or white form factor options. Both products can be ordered through Airgain’s trusted channel partners or call direct at 1-855-AIRGAIN. About Airgain, Inc.

Airgain is a leading provider of advanced wireless connectivity solutions and technologies used to enable high performance wireless networking across a broad range of devices and markets, including consumer, enterprise, and automotive. Airgain's mission is to connect the world through advanced antenna systems and integrated wireless solutions. Combining design-led thinking with testing and development, Airgain's technologies are deployed in carrier, fleet, enterprise, residential, private, government, and public safety wireless networks and systems, including set-top boxes, access points, routers, modems, gateways, media adapters, portables, digital televisions, sensors, fleet, and asset tracking devices. Through its pedigree in the design, integration, and testing of high-performance embedded antenna technology, Airgain has become a leading provider to the residential wireless local area networking, also known as WLAN, market, supplying to leading carriers, original equipment manufacturers, or OEMs, original design manufacturers, or ODMs, and chipset manufacturers who depend on Airgain to achieve their wireless performance goals. Airgain is headquartered in San Diego, California, and maintains design and test centers in the U.S., U.K., and China. Forward-Looking Statements

Airgain cautions you that statements in this press release that are not a description of historical facts are forward-looking statements. These statements are based on the company's current beliefs and expectations. These forward-looking statements include statements regarding the expected performance of, and market for, Airgain’s products and the ability of the AirgainConnect platform to maximize coverage, building penetration, and throughput for critical communications applications. The inclusion of forward-looking statements should not be regarded as a representation by Airgain that any of our plans will be achieved. Actual results may differ from those set forth in this press release due to the risk and uncertainties inherent in our business, including, without limitation: the market for our products is developing and may not develop as we expect; risks associated with the

performance of our products, including bundled solutions with third-party products; if our channel partners fail to perform, or our partnerships are unsuccessful, we may not be able to bring our product solutions to market successfully or on a timely basis; our products are subject to intense competition, and competitive pressures from existing and new companies may harm our business, sales, growth rates and market share; the COVID-19 pandemic may continue to disrupt and otherwise adversely affect our operations and those of our suppliers, partners, distributors and ultimate end customers; risks associated with quality and timing in manufacturing our products and our reliance on third-party manufacturers; we may not be able to maintain strategic collaborations under which our bundled solutions are offered; if we cannot protect our intellectual property rights, our competitive position could be harmed or we could incur significant expenses to enforce our rights; and other risks described in our prior press releases and in our filings with the Securities and Exchange Commission, including under the heading "Risk Factors" in our Annual Report on Form 10-K and any subsequent filings with the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and we undertake no obligation to revise or update this press release to reflect events or circumstances after the date hereof. All forward-looking statements are qualified in their entirety by this cautionary statement, which is made under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.
