Blade Urban Air Mobility Named Official Air Mobility Partner of The 2025 Ryder Cup at Bethpage Black

- *Blade's air mobility activation will be one of the largest multi-day civilian helicopter movements in U.S. history*
- *Passengers departing from Manhattan and surrounding areas will land at Blade's Vertiport located directly on the course at Bethpage*
- *The 2025 Ryder Cup has built more than 1.7 million square feet of infrastructure, the largest buildout in PGA of America Spectator Championship history or PGA of America history*

NEW YORK--(BUSINESS WIRE)-- Blade Urban Air Mobility, Inc. ("Blade", "Company"), a division of Joby Aviation (NYSE:JOBY), announced its role as the Official Air Mobility Partner of the 2025 Ryder Cup, taking place September 25–28, 2025, at the iconic Bethpage Black Course in Farmingdale, NY. The Ryder Cup, a biennial men's team golf competition between the United States and Europe, is one of the most prestigious events in global sports.

Blade will facilitate one of the largest civilian helicopter

movements to a sporting event in U.S. history. Over the course of four days, Blade is expected to transport approximately 3,000 passengers between three Blade Lounges in Manhattan, surrounding New York areas, the BLADE Vertiport at Bethpage, and neighboring Republic Airport.

Blade's Ryder Cup Vertiport has 15 landing zones onsite at Bethpage Red, in addition to an amphibious seaplane landing zone at Republic Airport. Passengers will enjoy seamless access through Blade's on-course Ryder Cup Lounge, located inside the PGA's VIP Corporate Scan Gate entrance, and golf-cart transfers directly to the championship grounds.

The Blade Ryder Cup Lounge will include a dedicated Blade bar serving Ryder Cup-themed cocktails, the 'Pitchbook Swing Suite' with a golf simulator powered by Five Iron, and an exclusive vantage point just steps from the action. The level of hospitality to be provided by Blade's Flier Experience team will be commensurate with the experience our fliers enjoy in lounges every day, worldwide.

A key highlight will be a next-generation all-electric and emission-free air taxi displayed by Blade's parent company, Joby Aviation. Ryder Cup attendees will enjoy the opportunity to not only learn more about the aircraft from the Joby Team but to "fly" the aircraft aboard Joby's augmented reality flight simulator.

This unique activation highlights the transition from conventional rotorcraft operations to electric vertical take-off and landing ("eVTOL") aircraft, which will offer quieter, emissions-free air travel.

"Given the significant strain on ground infrastructure during major PGA events, offering Blade service to Ryder Cup attendees enables us to demonstrate the power of urban air mobility," said Christiana Weller, VP of Marketing at Blade. "We are also proud to showcase our parent company's next-generation quiet and emission-free aircraft that we hope guests will fly on during the next U.S. Ryder Cup in 2029."

"Blade is helping make travel to the Ryder Cup faster, seamless, and more enjoyable for our guests," John Handley, Director of Partnerships & Championship Sales of the PGA, said. "Together, we are committed to providing a world-class experience to and from Bethpage Black."

Blade flights are available by-the-seat and by private charter through the Blade app, which reduces the hours-long drive into a 12-minute flight.

About Joby

Joby Aviation, Inc. (NYSE:JOBY) is a California-based transportation company developing an all-electric, vertical take-off and landing air taxi. Joby intends to both operate its fast, quiet, and convenient air taxi service in cities around the world and sell its aircraft to other operators and partners. Forward-Looking Statements

This release contains "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, including but not limited to, statements regarding the expectation for Blade to transport approximately 3,000 passengers over the course of four days; the development and performance of the Joby aircraft; and Joby's business plan, objectives, goals and market opportunity. You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as "anticipate", "estimate", "expect", "project", "plan", "intend", "believe", "may", "will", "should", "can have", "likely" and other words and terms of similar meaning in connection with any discussion of the timing or nature of future

operating or financial performance or other events. All forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially, including: weather and passenger demand for Blade's services may impact the number of passengers flown; Joby's ability to launch its air taxi service and the growth of the urban air mobility market generally; its ability to produce aircraft that meet its performance expectations in the volumes and on the timelines that it projects; the competitive environment in which it operates; its future capital needs; its ability to adequately protect and enforce its intellectual property rights; its ability to effectively respond to evolving regulations and standards relating to our aircraft; its reliance on third-party suppliers and service partners; and other important factors discussed in the section titled "Risk Factors" in Joby's Annual Report on Form 10-K, filed with the Securities and Exchange Commission (the "SEC") on February 27, 2025, Quarterly Reports on Form 10-Q filed with the SEC on May 8, 2025 and August 7, 2025, and in future filings and other reports it files with or furnishes to the SEC. Any such forward-looking statements represent management's estimates and beliefs as of the date of this release. While we may elect to update such forward-looking statements at some point in the future, we disclaim any obligation to do so, even if subsequent events cause our views to change.
