MACDERMID ENTHONE INDUSTRIAL SOLUTIONS SHOWCASES ZINKLAD® FOR UNRIVALED PERFORMANCE IN ANTI-CORROSION SURFACE COATINGS AT FASTENER FAIR 2019

(Waterbury, CT, USA) - MacDermid Enthone Industrial Solutions will highlight how its portfolio of high-performance coatings and its unique quality assurance program, ZinKlad®, meet future automotive manufacturing challenges at Fastener Fair 2019 in Detroit, Michigan on May 22-23, 2019. Developed to comply with the latest regulations, the cutting-edge range of coatings are specified and approved by leading automotive companies worldwide and ensure the highest performance and consistency in anti-corrosion surface finishing of fastener components.

Visitors to booth 1015 will be able to learn more about the range of ZinKlad coatings for anti-corrosion, with a highlight on:

- ZinKlad 750, recommended for electric vehicle applications. Designed for electrical grounding fasteners in automotive applications, ZinKlad 750 consists of 70 - 75% tin that can resist 23 cycles of GMW14872 cyclic corrosion testing or 1,000 hours of neutral salt spray testing.

Lammert de Boer, Global Director – ZinKlad, DecoKlad and XMAPP at MacDermid Enthone Industrial Solutions will be taking part in the expert panel at Fastener Fair USA 2019. He will also be giving a presentation at the Tech Talks Theater, Wednesday 22nd April at 1:30pm, on the importance of more robust quality systems. This is important for OEMs and Tier 1 suppliers in order to achieve a consistent performance of their fastener coatings, and how ZinKlad tackles these challenges.
