## **Alico Reports Second Quarter Earnings**

LA BELLE, Fla., May 10, 2011 (GLOBE NEWSWIRE) -- Alico, Inc. (Nasdaq:ALCO), a land management company, today announced financial results for the second quarter and six months ended March 31, 2011.

### **Fiscal 2011 Second Quarter Results**

The Company reported net income for the three months ended March 31, 2011 of \$2.7 million or \$0.37 per share, as compared with net income of \$1.4 million or \$0.18 per share for the three months ended March 31, 2010. Operating revenues were \$36.5 million and \$31.7 million for the three months ended March 31, 2011 and 2010, respectively, representing a 15.3% improvement in the quarter-over-quarter comparison. Income from operations was \$6.5 million for the three months ended March 31, 2011, compared with income of \$2.3 million for the three months ended March 31, 2010. The increase in operating income was primarily due to improvements in agriculture operations, and can be principally attributed to higher citrus and sugarcane prices and increased sugarcane volume.

### **Fiscal 2011 Six Month Results**

Net income for the first six months of fiscal 2011 rose to \$2.6 million or \$0.36 per share from a loss of \$20 thousand or (\$0.002) per share for the same period of fiscal 2010. For the six months ended March 31, 2011, revenue increased 15.9% to \$53.0 million from \$45.8 million for the same period in 2010. Operating income increased to \$7.0 million during the six months ended March 31, 2011, up from \$1.2 million in 2010.

JD Alexander, President and Chief Executive Officer, noted, "Our results for the first half of fiscal 2011 reflect favorable market pricing for our citrus, sugarcane and cattle. We were fortunate to avoid any significant damage from winter weather events but benefited from the impact those events had on market supply and therefore pricing. We continue to focus our efforts on controlling costs. Unfortunately, Farm Credit has indefinitely suspended the revolvment of allocated surplus earned by its members in prior years. This resulted in a \$1.7 million charge against pre-tax earnings in the current quarter. Alico's net income for the six months ended March 31, 2011 before the charge would have been approximately \$3.7 million as compared to the \$20 thousand loss in the same period of fiscal 2010. "
