Mirion Technologies To Provide Radiation Monitoring Systems to Russia

SAN FRANCISCO--(BUSINESS WIRE)--

Mirion Technologies Radiation Monitoring Systems Division has received orders to supply equipment to the nuclear power plants in Kursk, Smolensk, Volgodonsk, Novovoronezh and Beloyarsk in Russia. The orders were placed by RadiCo, and include process and event monitoring systems.

"We are honored to have been selected to assist in the modernization activities across a large proportion of the Russian nuclear power market," said Jean-Louis Gouronc, President, of Mirion's Radiation Monitoring Systems Division. "We will continue to work with qualified local partners in selected territories to meet market requirements."

ABOUT MIRION TECHNOLOGIES

Mirion Technologies is one of the world leaders in radiation detection, measuring and monitoring. Mirion has 14 facilities in Europe, Asia, and North America. Mirion Technologies is headquartered in the San Francisco Bay area and is a portfolio company of American Capital (NASDAQ:ACAS).
