Mirion Technologies Launches On-line Radiation Monitoring System User Forum

SAN FRANCISCO--(BUSINESS WIRE)-- The [Mirion Technologies Radiation Monitoring Systems \(RMS\) Division](#) has announced the launch of "Mirion RMS" (MI-RMS), a new on-line user forum for radiation monitoring systems professionals from around the world. This innovative user forum is accessible at www.mirms.com.

This user-friendly and secure MI-RMS forum allows members to exchange valuable ideas, insights, and information on RMS products, services and applications. The MI-RMS site also has information available to members and guests regarding:

- Current events (such as trade shows, users group meetings, and product notifications);
- U.S. and international nuclear power plant information;
- Nuclear power-related web links; and
- Mirion RMS product, service and support information.

"This website was designed in direct response to what our customers have told us they want: an on-line forum that quickly and efficiently provides RMS professionals with the information and collaboration they desire," said Jean-Louis Gouronc, President of Mirion's RMS Division. "The Mirion RMS user forum offers a variety of discussion topics and encourages members to post their own questions and create new forum topics."

For more information, or to join the forum please visit: www.mirms.com.
