# Cleveland-Cliffs Appoints CTO Brake to Lead Green Energy Business

CLEVELAND--(BUSINESS WIRE)--

Cleveland-Cliffs Inc (NYSE: CLF) today announced that William Brake, Cliffs' executive vice president--Cliffs Metallics and chief technical officer, has been named chairman of Renewafuel, LLC, effective immediately.

Cliffs acquired controlling interest in Renewafuel in late 2007 and, earlier this month, announced the planned construction of a 150,000 ton per annum facility in Marquette, Mich. The facility will produce high-energy, low-emission biofuel cubes made from renewable and consistently available components such as corn stalks, switch grass, grains, soybean and oat hulls, wood and wood byproducts. The biofuel will be used in Cliffs' iron ore mining and processing operations as well as in other industries in Minnesota, Michigan and other Midwest states. Production is scheduled to begin in 2009.

Joseph A. Carrabba, Cliffs' chairman, president and chief executive officer, commented, "As Renewafuel successfully transitions from the conceptual stage to an integral element of Cliffs' expanding alternative energy business, establishing a formal management team to guide the operation and maximize its potential was a natural next step. Under Bill's leadership, we will further our objective of enhancing efficiencies in an environmentally responsible manner."

Todd Davis, Cliffs' director of Alternative Energy, will be instrumental in the initiative and will report directly to Brake.
