Tropical Weather: Two and Five Day Outlook

Convective Outlook

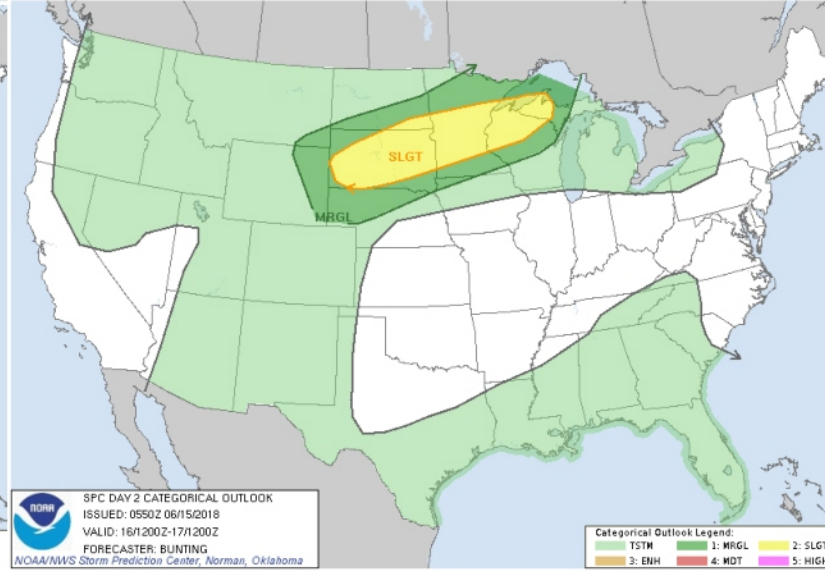

June 15 Day 1

NY/NJ No severe thunderstorms expected

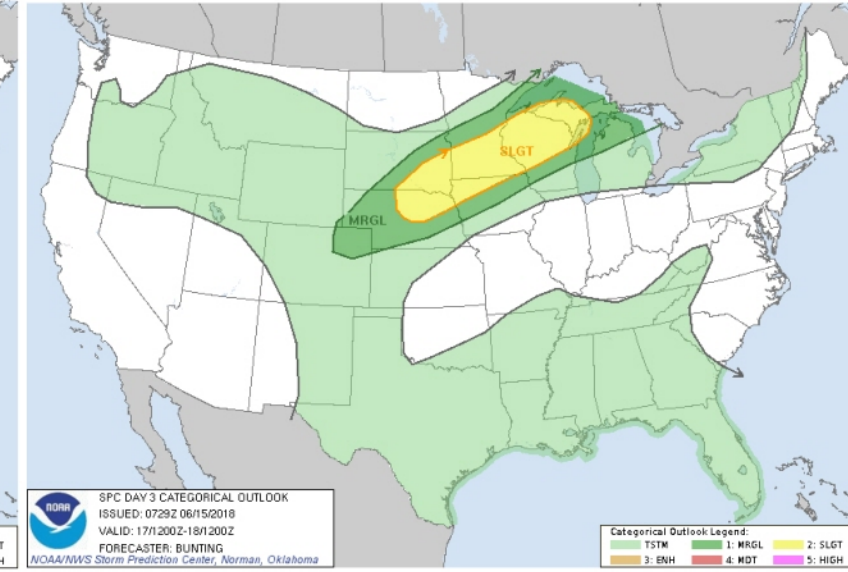

June 16, Day 2

NY/NJ: No severe thunderstorms expected

June 17, Day 3

NY/NJ: No severe thunderstorms expected

Understanding Severe Thunderstorm Risk Categories

THUNDERSTORMS (no label)	1 - MARGINAL (MRGL)	2 - SLIGHT (SLGT)	3 - ENHANCED (ENH)	4 - MODERATE (MDT)	5 - HIGH (HIGH)
No severe* thunderstorms expected	Isolated severe thunderstorms possible	Scattered severe storms possible	Numerous severe storms possible	Widespread severe storms likely	Widespread severe storms expected
Lightning/flooding threats exist with all thunderstorms	Limited in duration and/or coverage and/or intensity	Short-lived and/or not widespread, isolated intense storms possible	More persistent and/or widespread, a few intense	Long-lived, widespread and intense	Long-lived, very widespread and particularly intense

* NWS defines a severe thunderstorm as measured wind gusts to at least 58 mph, and/or hail to at least one inch in diameter, and/or a tornado. All thunderstorm categories imply lightning and the potential for flooding. Categories are also tied to the probability of a severe weather event within 25 miles of your location.

Caribbean Area Hazardous Weather Outlook

Rip Currents Threat
Valid from 6 AM AST Jun 15, 2018 to 6 PM AST Jun 15, 2018

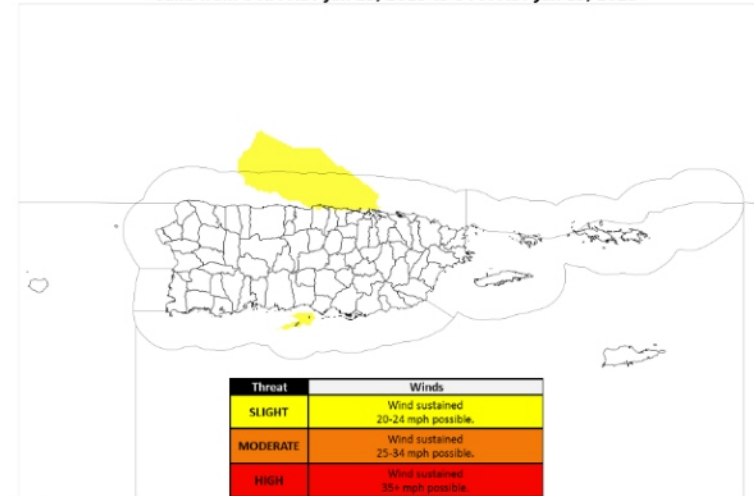

Threat	Rip Current
SLIGHT	The risk for rip currents is low. Rip currents often occur in the vicinity of reefs and piers.
MODERATE	Life threatening rip currents are possible in the surf zone.
HIGH	Life threatening rip currents are likely in the surf zone.

National Terrorism Advisory System

National Terrorism Advisory System

Type	Subject	Advisory Summary	Issued / Expires	TYPES OF ADVISORIES
Bulletin	Terrorism Threat	<ul style="list-style-type: none"> We continue to face one of the most challenging threat environments since 9/11, as foreign terrorist organizations exploit the Internet to inspire, enable, or direct individuals already here in the homeland to commit terrorist acts. Homegrown terror suspects increasingly rely on technology, such as end-to-end encrypted social media applications, to avoid detection. Terrorist groups are urging recruits to adopt easy-to-use tools to target public places and events. Specific attack tactics have included the use of vehicle ramming, small arms, straight-edged blades or knives, homemade explosives, and poisons or toxins. Some terrorist groups overseas are using battlefield experiences to pursue new technologies & tactics, such as unmanned aerial systems & chemical agents that could be used outside the conflict zones. Terrorists continue to target commercial aviation and air cargo, including with concealed explosives. Violent extremist media encourages individuals worldwide to launch attacks using all means possible. Continued U.S. and partner successes in disrupting and defeating terrorists on the battlefield may encourage homegrown terrorists to carry out acts of violence in the homeland instead of attempting to travel overseas to fight or in retaliation for apparent losses. Additionally, foreign terrorist fighters who have acquired training and battle-tested terrorism experience may flee from terrorist-controlled territories with a desire to conduct attacks elsewhere, including the US. 	Issued: 5/9/18 Expires: 9/14/18	Bulletin: Describes current developments or general trends regarding threats of terrorism. Elevated Alert: Warns of credible terrorism threat against US. Imminent Alert: Warns of credible, specific & impending terrorism threat against US.

National Counterterrorism Center Historical Calendar

Date	Location	Event
22 JUN 1993	Tiburon, CA	Unabomber T. Kaczynski bomb injures scientist from University of California
24 JUN 1993	New Haven, CT	Unabomber T. Kaczynski bomb injures professor at Yale University
24 JUN 1993	NYC	Sheikh Omar Abdel Rahman and others arrested for role in World Trade Center bombing, thwarting plans to bomb United Nation Headquarters, the Lincoln Tunnel, the Holland Tunnel, the George Washington Bridge, and FBI offices in New York City

FEMA Region II Staff and Administrative Highlights

- **RRCC and IMAT Annual Readiness Exercise 2018 (Muddy Waters)**

This coming week of June 18th Region II will be conducting its 2018 Hurricane Preparedness Exercise (formerly known as Muddy Waters).

Players will be Regional IMAT, the RRCC, the Region V IMAT, and the NRCC.

If you have a rostered RRCC position, please be prepared to participate in this exercise unless you have pre-approved leave scheduled and it is entered in DTS.

The RRCC staff will have to participate on Monday, June 18 – Wednesday, June 20 (including travel).

IMAT participation is scheduled for Monday, June 18 – Friday, June 22 (including travel).

Fund code for this event is: **2018-OS-QB07-R021-2100-D**

Please see the link below for the RRCC Roster and double check if you are required to participate.

<https://intranet.fema.net/org/regions/region2/collab/Rosters/Forms/AllItems.aspx>

If you have any questions regarding RRCC participation, please contact Jason Wind or Jose DosSantos.

Federal Employee Viewpoint Survey

- **The 2018 FEVS will end Thursday, June 21, 2018, at 11:59 p.m. ET.**
- As of May 17th, the Agency's response rate is 26%. This year the FEVS was sent to all FEMA employees on board since October 2017, so please take the time to submit your survey today!
- Permanently employed, non-political, non-seasonal, full/part-time employees on board as of October 2017, will receive an email from EVHS@opm.gov. The email subject line will read: **2018 Federal Employee Viewpoint Survey**. Also, employees from this group who complete the 2018 FEVS will be invited to participate in an OPM pilot survey entitled: "Inspire the Future, Modernize the FEVS."
- Reservists, COREs and temporary-full-time employees on board as of October 2017, will receive an email from USASurvey@opm.gov. The email subject line will read: **FEMA 2018 Stafford Act Employee Viewpoint Survey**. [FEMA's previous FEVS results can be viewed online.](#)

#fbf Picture of the Day – Friday

Freeport, N.Y., June 14, 2016—Newly placed stone revetments on the shore of Fundy Channel will help prevent scour, which erodes materials from bridge foundations and embankments. Coastal revetments are built to preserve the existing uses of the shoreline and to protect the slope, as defense against erosion. The funding for the project was made available through FEMA's Hazard Mitigation Grant Program, which aims to increase resiliency, reduce hardship and mitigate the risks of loss and damage from natural disasters. K.C.Wilsey/FEMA

Convective Outlook

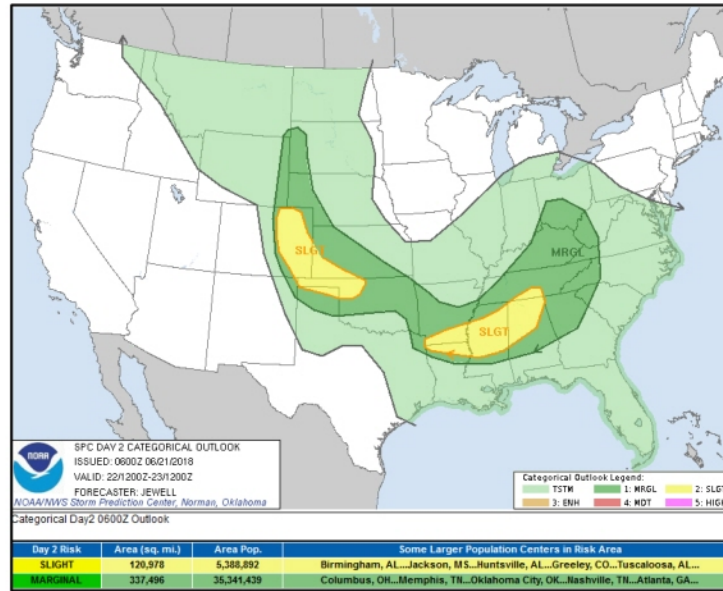

June 21 Day 1:

NY/NJ: No severe thunderstorms expected

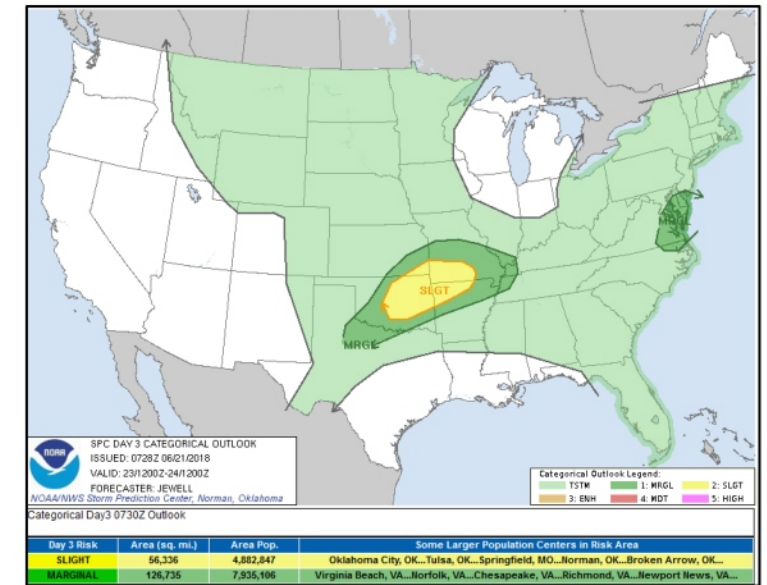

June 22, Day 2

NY/NJ: No severe thunderstorms expected

June 23, Day 3

NY/NJ: Marginal risk for southern NJ

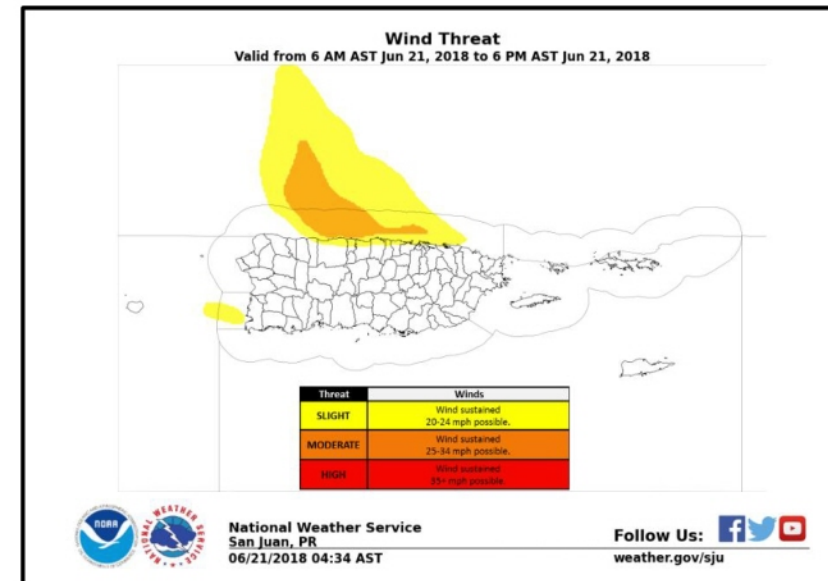

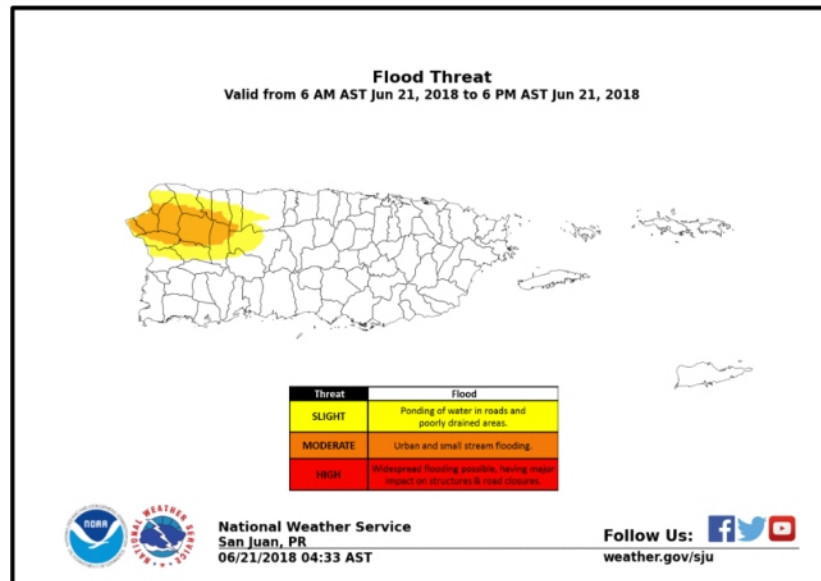

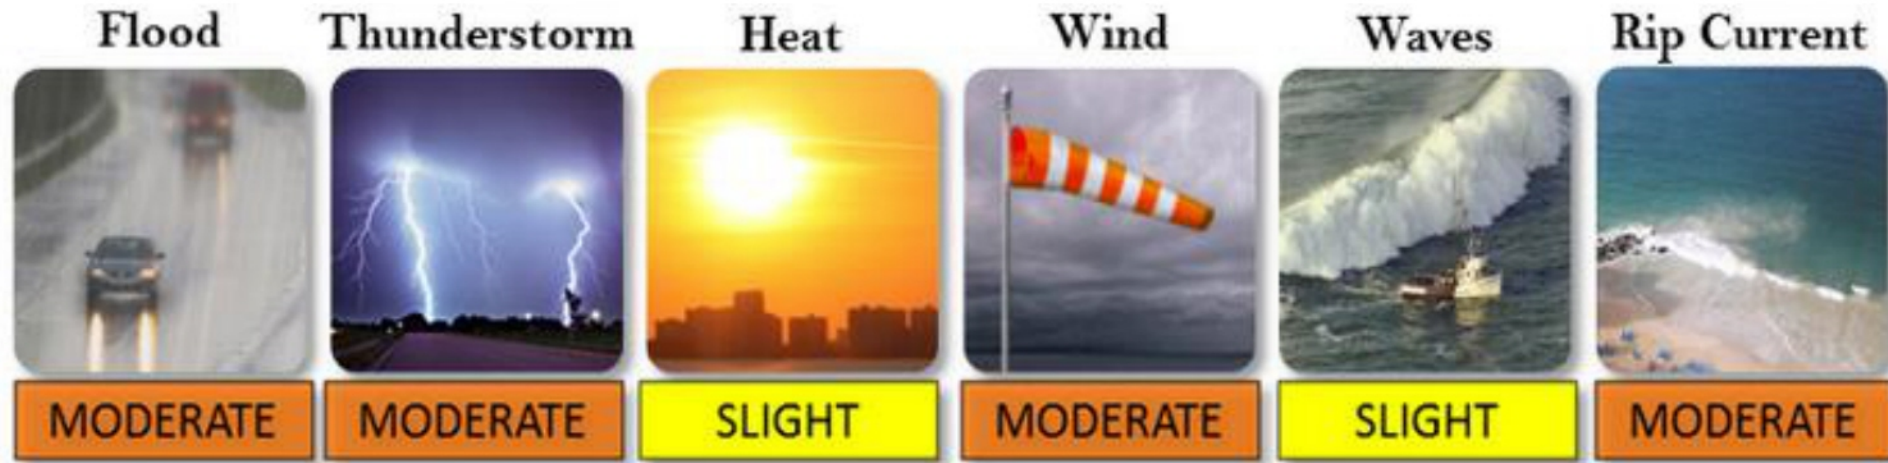

Understanding Severe Thunderstorm Risk Categories

THUNDERSTORMS (no label)	1 - MARGINAL (MRGL)	2 - SLIGHT (SLGT)	3 - ENHANCED (ENH)	4 - MODERATE (MDT)	5 - HIGH (HIGH)
No severe* thunderstorms expected	Isolated severe thunderstorms possible	Scattered severe storms possible	Numerous severe storms possible	Widespread severe storms likely	Widespread severe storms expected
Lightning/flooding threats exist with all thunderstorms	Limited in duration and/or coverage and/or intensity	Short-lived and/or not widespread, isolated intense storms possible	More persistent and/or widespread, a few intense	Long-lived, widespread and intense	Long-lived, very widespread and particularly intense
					

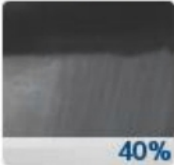

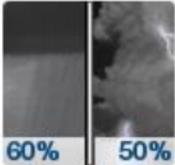

* NWS defines a severe thunderstorm as measured wind gusts to at least 58 mph, and/or hail to at least one inch in diameter, and/or a tornado. All thunderstorm categories imply lightning and the potential for flooding. Categories are also tied to the probability of a severe weather event within 25 miles of your location.

Caribbean Area Hazardous Weather Outlook

Extended Forecast

New York City:

National Terrorism Advisory System

National Terrorism Advisory System				
Type	Subject	Advisory Summary	Issued / Expires	TYPES OF ADVISORIES
Bulletin	Terrorism Threat	<ul style="list-style-type: none"> We continue to face one of the most challenging threat environments since 9/11, as foreign terrorist organizations exploit the Internet to inspire, enable, or direct individuals already here in the homeland to commit terrorist acts. Homegrown terror suspects increasingly rely on technology, such as end-to-end encrypted social media applications, to avoid detection. Terrorist groups are urging recruits to adopt easy-to-use tools to target public places and events. Specific attack tactics have included the use of vehicle ramming, small arms, straight-edged blades or knives, homemade explosives, and poisons or toxins. Some terrorist groups overseas are using battlefield experiences to pursue new technologies & tactics, such as unmanned aerial systems & chemical agents that could be used outside the conflict zones. Terrorists continue to target commercial aviation and air cargo, including with concealed explosives. Violent extremist media encourages individuals worldwide to launch attacks using all means possible. Continued U.S. and partner successes in disrupting and defeating terrorists on the battlefield may encourage homegrown terrorists to carry out acts of violence in the homeland instead of attempting to travel overseas to fight or in retaliation for apparent losses. Additionally, foreign terrorist fighters who have acquired training and battle-tested terrorism experience may flee from terrorist-controlled territories with a desire to conduct attacks elsewhere, including the US. 	<p>Issued: 5/9/18</p> <p>Expires: 9/14/18</p>	<p>Bulletin: Describes current developments or general trends regarding threats of terrorism.</p> <p>Elevated Alert: Warns of credible terrorism threat against US.</p> <p>Imminent Alert: Warns of credible, specific & impending terrorism threat against US.</p>

FEMA Region II Staff and Administrative Highlights

RRCC and IMAT Annual Readiness Exercise 2018 (Puerto Rico 2018)

This week, Region II is conducting their 2018 Hurricane Preparedness. Players are Region II IMAT, RII RRCC, Region V IMAT, and NRCC.

If you have a rostered RRCC position, be prepared to participate unless you have pre-approved leave scheduled and it is entered in DTS.

- IMAT participation is from June 18 – 22 (including travel).
- Fund code for this event: **2018-OS-QB07-R021-2100-D**

See the link below for the RRCC Roster and to confirm if you are required to participate:

<https://intranet.fema.net/org/regions/region2/collab/Rosters/Forms/AllItems.aspx>

If you have any questions regarding RRCC participation, please contact Jason Wind or Jose DosSantos.

FEMA Region II Staff and Administrative Highlights

Federal Employee Viewpoint Survey

- **The 2018 FEVS will end Thursday, June 21, 2018, at 11:59 p.m. ET.**
- As of May 17th, the Agency's response rate is 26%. This year the FEVS was sent to all FEMA employees on board since October 2017, so please take the time to submit your survey today!
- Permanently employed, non-political, non-seasonal, full/part-time employees on board as of October 2017, will receive an email from EVHS@opm.gov. The email subject line will read: **2018 Federal Employee Viewpoint Survey**. Also, employees from this group who complete the 2018 FEVS will be invited to participate in an OPM pilot survey entitled: "Inspire the Future, Modernize the FEVS."
- Reservists, COREs and temporary-full-time employees on board as of October 2017, will receive an email from USASurvey@opm.gov. The email subject line will read: **FEMA 2018 Stafford Act Employee Viewpoint Survey**. [FEMA's previous FEVS results can be viewed online.](#)
