XORTX Therapeutics Announces Filing of Provision Patent for Polycystic Kidney Disease

• Increased Xanthine Oxidase Expression in ADPKD Kidneys •

CALGARY, Alberta, Dec. 21, 2021 (GLOBE NEWSWIRE) -- XORTX Therapeutics Inc. ("XORTX" or the "**Company**") (NASDAQ: XRTX | TSXV: XRTX | Frankfurt: ANU), a pharmaceutical therapeutics company focused on developing innovative therapies to treat progressive kidney disease, is pleased to announce the filing of a provisional patent based upon recent discoveries specific to polycystic kidney disease. The provisional patent is entitled "Compositions and Methods for Diagnosis, Treatment of and Prevention of Kidney Disease". The provisional patent is based upon new evidence related to a previously unknown mechanism of injury associated with:

- aberrant purine metabolism in kidneys during progression of polycystic kidney disease;
- the health consequences of increased xanthine oxidase expression in polycystic kidney disease; and
- the health consequences of high uric acid concentration on both structure and function of polycystic kidneys.

Based upon the above discoveries, the patent application contains claims to new methods of diagnosing aberrant purine metabolism in polycystic kidney disease, compositions and formulations of agents capable of modulating aberrant purine metabolism in the kidney and claims new compositions including molecular iRNA and siRNA methods for preventing and treating progression of chronic kidney disease.

Dr. Allen Davidoff, CEO of XORTX stated, "XORTX and our research partners, look forward to publishing these important new research discoveries in the near future. These novel discoveries expand our understanding of a potential new, previously unrecognized, mechanism of injury in polycystic kidney disease and support this new provisional patent application. This patent filing is intended to expand the foundation of our patent portfolio and permit for new opportunities for product development. The Company remains dedicated to redefining kidney disease in the future and advance our lead program – XR_x-008 - on behalf of individuals with progressing kidney disease due to autosomal dominant polycystic kidney disease."

About Polycystic Kidney Disease

Polycystic Kidney Disease is characterized by an array of anatomic and physiologic abnormalities, for example hypertension, endothelial dysfunction, cardiovascular disease, liver disease, cardiovascular disease involving large, medium and small caliber blood

vessels as well as other health problems are frequently encountered by patients with polycystic kidney disease. Polycystic kidney disease is associated with genetic changes and described by two categories- autosomal dominant polycystic kidney disease (ADPKD) and autosomal recessive polycystic kidney disease (ARPKD). Other causes of polycystic kidney disease or cystic disease syndrome can be found associated with cystic fibrosis, renal dysplasia, tuberous sclerosis, Von Hippel-Lindau disease, multicystic dysplastic kidney (MCDK), medullary sponge kidney, and acquired renal cystic disease. While the origin of polycystic kidney disease is often genetic and the primary cause of the disease, approaches to diagnose and treat existing disease can be categorized as primary prevention, secondary prevention and tertiary prevention. ADPKD is leading cause of polycystic kidney disease is autosomal dominant polycystic kidney disease and contributes approximately 90% of all individuals.

About XORTX Therapeutics Inc.

XORTX Therapeutics Inc. is a pharmaceutical company with two clinically advanced products in development – XR_x-008 for Autosomal Dominant Polycystic Kidney Disease (ADPKD), XR_x-101 for acute kidney and other acute organ injury associated with Coronavirus / COVID-19 infection and XR_x-225 is a pre-clinical stage program for Type 2 Diabetic Nephropathy (T2DN). XORTX is working to advance its clinical development stage products that target aberrant purine metabolism and xanthine oxidase to decrease or inhibit production of uric acid. At XORTX Therapeutics, we are dedicated to developing medications to improve the quality of life and future health of patients. Additional information on XORTX Therapeutics is available at www.xortx.com.
