Now embraced by global industrial companies, 3D printing is about to disrupt the \$12 trillion global manufacturing industry. Companies are clamoring for ways to create hypercritical components and prototypes, improve current products, reduce costs and increase speed to market. The global 3D-printing metal market, [projected to exceed \\$3 billion by 2025](#) with a CAGR of 31.8%, may grow even faster if operational and production challenges are resolved.

With its PrintRite3D software, [Sigma Labs Inc. \(NASDAQ: SGLB\)](#) has established a new paradigm in the development and commercialization of real-time, computer-aided inspection solutions. Sigma Labs PrintRite3D product is designed to resolve the bottlenecks and costly quality-control challenges that impede the 3D manufacture of precision metal parts. The company's breakthrough software could revolutionize commercial additive manufacturing by enabling nondestructive quality assurance during production and uniquely allowing errors to be corrected in real time.
